FEDERAL REAL AND PERSONAL PROPERTY INVENTORY
REPORT (CIVILIAN AND MILITARY) OF THE U.S. GOVERN-
MENT, COVERING ITS PROPERTIES LOCATED IN THE
UNITED STATES, IN THE TERRITORIES, AND OVERSEAS,
AS OF JUNE 30, 1966

PART I

INTRODUCTION

This Federal property inventory report represents a compilation of assigned values of real and personal property owned or controlled by the Federal Government, located throughout the world, as of June 30, 1966. This comprehensive recording of assets of the Government is the 11th such report issued by the House Committee on Government Operations. The committee has issued, on an annual basis, inventory reports of federally owned real and personal properties, on a fiscal year basis, from June 30, 1955, through June 30, 1964. Early in 1965 it was determined by the chairman of the committee that future inventory reports of the committee would be issued on a biennial basis. Consequently, a report was not issued as of June 30, 1965.

The committee staff assigned to this project, aided by the experience of Government department and agency representatives, has explored inventory accounting systems employed by the Federal Government in an effort to include all assets of a department and to bring records covering such assets under accounting control. A comparison of our previous inventory reports, as listed below, shows clearly the great progress which has been made in improving accounting methods and recordkeeping operations employed in recording the amounts of real and personal property owned or controlled by the Federal Government. Constant attention is being focused on accurate and complete accounting of these assets. The utilization of up-to-date accounting systems, motivated by stimulated interest in property inventories, has strengthened the efforts of Government departments and agencies in bringing inventories under accounting control. This progress, which is being observed by the public, Members of the Congress, and especially by the membership of this committee, has been most encouraging.

Comparison of reported inventory values, worldwide

[In billions of dollars]

Year	Person- alty	Realty	Grand total	Year	Person- alty	Realty	Grand total
1955.....	\$168	\$40	\$208	1961.....	\$201	\$82	\$283
1956.....	180	56	236	1962.....	213	86	299
1957.....	186	63	249	1963.....	225	90	315
1958.....	195	67	262	1964.....	230	94	324
1959.....	193	72	265	1966.....	244	103	347
1960.....	200	76	276				

In this report, as has been done previously, Capitol Hill realty is recorded at estimated present-day evaluations; also public domain is recorded at estimated present-day evaluations. Federal realty listed on Government records at "zero value" or at "\$1 for accounting purposes" is listed in the report at estimated present-day evaluations.

In June 1960 the committee published a document entitled "The Federal Property Inventory Undertaking of the House Committee on Government Operations—An Endeavor to List Real and Personal Assets of the Federal Government on a Worldwide Basis—A Long Overdue Accomplishment." The document records, in narrative history form, preparations involved in recording real and personal assets of the Federal Government, on a worldwide basis, as well as the accomplishments of the Committee on Government Operations from 1955 until 1960. The document is designed to be helpful to Members of Congress and others who are interested in studying and analyzing the improvements which have been made in real property management and accounting control over an investment aggregating billions of dollars which is represented in real and personal property of our Government located throughout the world. The document also described how the inventory undertaking was conceived and the steps taken to obtain data for inclusion in the inventory report.

FEDERAL PERSONALTY

Most Federal personalty figures in this report are furnished directly by the Department of the Treasury, on request of the committee chairman. The Department of Defense reports all its inventories, real and personal, directly to the committee for inclusion in the report. These figures cover assets of the three military departments and the Corps of Engineers, civil functions. Personalty inventories of the Architect of the Capitol, the Sergeant at Arms of the U.S. Senate, the Clerk of the House of Representatives, the Library of Congress, the Supreme Court of the United States, the U.S. Courts of Appeals, U.S. District Courts, and special U.S. courts are reported directly to the committee.

Federal personalty (exclusive of cash and related cash items) is reported herein at acquisition cost. This manner of reporting these assets has been discussed with, and approved by, officials of the General Accounting Office and the Department of the Treasury. It is the consensus that this approach represents a realistic method of recording personal property, especially when comparing replacement costs and amounts received for such items when they are declared surplus and offered for sale by the Government. In recording values of paintings, portraits, statues, numerous publications, and volumes of books where records are unavailable as to the known costs, an estimated value has been recorded. Numerous personalty assets of the Federal Government are listed on its inventory records at "no value" inasmuch as some such items were donated to the Federal Government (at no cost) and in many instances it is impossible to place a realistic value on these properties because of their patriotic or sentimental value rather than intrinsic value. Such is the case of numerous items to be found in the Library of Congress, the Smithsonian Institution, the National Archives, and in other storehouses of the Nation. The famous Hope diamond, which was donated to the Government, has

a value ranging from something like \$200,000 to \$2 million. This particular asset is worth a considerable sum of money, yet its value is not included in the committee's inventory report for it was obtained at no cost to the Government.

The increase in personalty figures in our reports during the past few years represents refinements in improved recordkeeping activities within the Government or improvements resulting from inventories having been brought under inventory accounting control. The Department of the Treasury has been instrumental in furnishing personalty data which reflect refinements in many areas of accounting throughout the Government.

FEDERAL REALTY (EXCLUDING PUBLIC DOMAIN)

Federal realty is listed herein, for the most part, at acquisition cost—with usage categories and number of acres noted. In 1960 the committee requested departments and agencies which had realty under their jurisdiction which had been donated to the Government, or obtained at no cost, listed on the books of the Government at "no value" or recorded at "\$1 (for accounting purposes)" to affix thereon an estimated present-day value of such realty. Cooperation was received in this endeavor from each department and agency concerned. Methods employed in the evaluation of public domain lands were used in the establishment of current evaluations of "no value" lands. This practice has been followed again this year and up-to-date figures on such properties are recorded herein. This additional refinement has been accomplished by the efforts of experienced and qualified personnel within the departments, thus making unnecessary the expense of engaging outside appraisal firms for the undertaking. The committee is gratified with its accomplishment of having the property inventory report reflect either estimated present-day values or acquisition cost of all Federal realty.

At the request of the committee, the Architect of the Capitol has again furnished realty figures for inclusion in this report which reflect estimated present-day evaluations of properties under his control.

Construction work-in-progress figures for all Government departments and agencies, including the Department of Defense, are again recorded in the realty portion of this report. The accepted procedure of recording the value of a Federal building project (on the books of the Government) is to await its completion. When the Government actually takes possession of a building project, the title thereof is then recorded on the books of the Government. It is felt that a realistic manner of recording the Government's investment in a project which is in the process of construction is to record the actual investment at the close of the fiscal year, rather than await the completion of the project to record its value. Our manner of recording construction-in-progress figures is in keeping with our objective of providing a comprehensive and complete listing of all Federal assets in all areas at a given time. This is also consistent with good bookkeeping practices.

It should be borne in mind that the acquisition costs recorded for some buildings and facilities may also represent present-day evaluations. This is true when considering the value of buildings and facilities which have been constructed or purchased during the past few years.

Recorded in the realty portion of the report this year is a listing of Federal realty, excluding public domain, by departmental jurisdiction and general location (whether located in the United States, in the territories, or overseas), as well as a breakdown of acreage in the various States. This additional information is of particular interest not only to the congressional offices, but to the general public as well. A further breakdown of real property by State, county, and department, as well as cross-indexed listings of federally owned realty, is available in the offices of the Committee on Government Operations, House of Representatives, or from the General Services Administration.

PUBLIC DOMAIN PROPERTIES

The term "public domain land" embraces all the areas, title to which was vested in the U.S. Government by virtue of its sovereignty. The term, "public domain lands," includes original public domain lands which have never left Federal ownership and lands still within Federal ownership which were obtained by the Government in exchange for public lands or for timber on such lands. It also includes original public domain lands which have reverted to Federal ownership through the operation of public land laws.

Public domain acreage is listed in this report at estimated present-day evaluations. In some instances, Federal departments and agencies have been able to place an estimated present-day evaluation on buildings, structures, and facilities located on public domain lands. However, these estimates are included for information purposes only in the public domain summary table. In order to avoid duplication and for the sake of clarity, all buildings, structures, and facilities are recorded in the realty section of the inventory report at acquisition cost. The method used in this report has been adopted so as not to confuse the reader and at the same time so as to avoid the overlapping of figures and properties. In some instances, because of the nature of the property and the location of the installation itself, it has not been possible to determine, because of intermingling, whether some structures are located on public domain or other Federal property.

Estimated present-day evaluations of public domain have been determined by field representatives employed in real property field offices of the departments. As a result of their assistance, evaluations have been determined without having to engage the services of private professional appraisers. Methods used in the appraisal of public domain lands have been determined by qualified field representatives, based on long experience in the property appraisal field and on evaluation criteria employed in the evaluating of adjoining federally or privately owned properties.

The Department of the Interior is responsible for determining overall values of mineral resources for all Government departments and agencies. Estimated overall values of timberlands, grazing lands, and grazing rights are included in public domain data furnished the committee directly by the department or agency controlling such property.

Since its Federal property inventory report, as of June 30, 1956, the Committee on Government Operations has listed public domain lands in inventory reports at a realistic estimated present-day evaluation. Prior to that date those lands had been listed at "no value." An attempt was made in 1937 by representatives of the Federal Govern-

ment to evaluate public domain acreage. After considerable time, effort, and funds had been expended in this endeavor, the end result was an overall evaluation of these properties at \$1.25 per acre. Such an unrealistic figure in no way reflects the true value of these lands either in 1937 or today. One of the objectives of the committee's preparation of a Federal property inventory report has been to encourage improved accounting of known Federal property assets on a realistic basis.

As a result of much effort, coupled with experience and concentrated interest, it has been possible for all departments and agencies to complete the job of placing estimated present-day values on public domain acreage under their control.

"FUNCTIONAL USE BASIS" DATA

This Federal property inventory report reflects assets—real and personal—in a manner prescribed for Federal usage. Major categories, as listed, represent inventories as of June 30, 1963, 1964, and 1966 (for comparative purposes), and cover the major functions of—

- (a) National defense;
- (b) International affairs and finance;
- (c) Space research and technology;
- (d) Agriculture and agricultural resources;
- (e) Natural resources;
- (f) Commerce and transportation;
- (g) Housing and community development;
- (h) Health, labor, and welfare;
- (i) Education;
- (j) Veterans' benefits and services; and
- (k) General government.

This functional breakdown follows the same analysis as the receipts and expenditure classifications, and has some utility in illustrating how the assets of the Government are being utilized.

ACKNOWLEDGMENTS

Acknowledgment is made to the Government department and agency representatives who have been of such great assistance to the committee in the preparation of this report. Representatives of the property offices of the Architect of the Capitol, the Supreme Court of the United States, the Library of Congress, the Sergeant at Arms of the U.S. Senate, the Clerk of the House of Representatives, and the Administrative Office of the U.S. Courts have also been most helpful in furnishing data direct to the committee for inclusion in this report.

Without this able assistance, the compilation of accurate and comprehensive data in the realty and personalty fields, as represented herein, would not have been possible. The committee is grateful for this continued interest and cooperation.

CONCLUSION

The compilation of Federal Real and Personal Property Inventory Reports by the Committee on Government Operations has been a most rewarding experience for the committee, and those who have

followed the progress made by our offices in this endeavor continue to focus attention on the committee accomplishment. The reports contain such a wealth of information concerning investments in real and personal property assets of the Federal Government, on a world-wide basis—an up-to-date compilation of the Nation's worth as visualized in the objectives of House Resolution No. 26, introduced in the House of Representatives on January 5, 1955, by former Congressman Martin Dies (which resolution was referred to the House Committee on Government Operations). The resolution recommended the compilation of an inventory report covering assets of the Federal Government. Our initial report, as of June 30, 1955, was a starting point and the report recorded Government-owned assets in the form of an annual property inventory report. Until the issuance of our initial report, there was no one central location where all real and personal property assets of the United States, located throughout the world, could be located. Inventory records up to that time were incomplete and up-to-date inventory accounting systems were not in operation. Good bookkeeping practices dictated that this situation be changed, and the committee feels today that property accounting records, centrally located, are current, accurate, and that inventory records are under accounting control.

The Federal Property Inventory Reports continue to stimulate interest among Government representatives—Federal, State, and local—as well as schools, organizations, and individuals. The data contained in the reports are particularly helpful to congressional offices, libraries, news media, and individuals who may be writing articles or compiling statistics about Federal assets, whether located in a particular area of the country, the entire United States, or worldwide. Rather than having to refer to several documents or contact individual Government departments and agencies, it is possible to obtain the desired information from this one document.

Increased inquiries about, and requests for copies of the report, are being received from congressional offices, Federal departments and agencies, schools, and universities located throughout the United States and abroad, as well as from State governments and private research organizations. The report has been the subject of many newsletters originating in congressional offices, and it has been mentioned in discussions on the floors of the Senate and the House of Representatives of the United States.

Many State governments for a number of years have been attempting to compile current inventories of their real properties which reflect acquisition cost as well as present-day values thereon. There exists differences in the methods and manner of recording property values in many States; however, methods for establishing a uniform evaluation procedure are under consideration and study by a number of State property accounting officials. The Federal Property Inventory Report, issued by the Committee on Government Operations, is being used as a handbook in many areas at the present time and more and more attention is being focused on this publication and the scope of property accounted for in the document.

Participation in our property inventory endeavor by Government representatives has been unanimous and the results are evidenced in figures listed in this report, and those recorded in our reports during the past few years.

One of the primary objectives in improving our Federal property inventory reports has been the recording of real and personal property assets of the Federal Government in a realistic manner—recording realty assets at acquisition cost, as well as at estimated present-day values where possible, and recording personal property assets at acquisition cost. Personal property assets will continue to be reported in inventory reports at acquisition cost. This decision has been made by the chairman of the committee as a result of recommendations made by the General Accounting Office representatives and other accounting specialists within the Government.

As stated earlier, the report lists estimated present-day evaluations of public domain properties, as well as real properties previously recorded at “zero value, or at \$1 (for accounting purposes)”. This accomplishment has been achieved as a result of efforts of property representatives of departments and agencies having such properties under their control and a dedicated interest in a quest for evaluation knowledge in attempting to place a realistic evaluation on such properties. This undertaking has been a tremendous task and the results achieved have been most gratifying.

The scope of an inventory covering properties owned by the Federal Government is tremendous in size and complex in nature. These inventories are located in areas throughout the world and the recording and reporting of such assets is a massive undertaking. Government property representatives assisting in the property inventory endeavor are keenly interested in improving their property records. It has been definitely established that the need is great for an up-to-date Federal property inventory accounting such as the committee has undertaken. The project will continue to reflect various economic changes in values, as well as improved inventory reporting practices. These results, represented in informative report form, will be of constant utility.

In compiling and reporting data of a classified nature for inclusion in this report, the committee has, of course, complied with necessary security regulations. Efforts have been made to record classified data in a manner which will insure secrecy, and at the same time remain informative and accurate. This is reflected particularly in some areas of Department of Defense inventories. Breakdown figures have been used in each instance possible, and only in restricted areas have lump-sum figures been recorded. Substantial data covering classified areas are available within the departments for those qualified to see and study on a need-for-use basis.

This Federal property inventory report records Federal real and personal property assets located throughout the world as being \$347 billion, as of June 30, 1966. It is evident that recordkeeping operations involved in the accurate accounting of inventories of this magnitude is an exacting undertaking. Likewise, when considering the values of real and personal property listed in our Federal property inventory, it is interesting to observe the recorded amount of our national debt. It was \$320 billion as of June 30, 1966.

Favorable commendations continue to be received on the inventory project and the work the committee is doing in continuously improving this worthwhile and informative public undertaking. The results attained to date bear eloquent validating evidence of an effective performance by the Committee on Government Operations of a task assigned to it by the Congress of the United States. Even so, we remain mindful of the fact that constant surveillance of inventories is necessary to assure that they are kept up to date and that the federally owned property assets are properly and accurately accounted for.

TREASURY DEPARTMENT

Washington, D.C.

SUMMARY STATEMENT

The chairman of the Committee on Government Operations, House of Representatives, in a letter dated January 26, 1966, to the Secretary of the Treasury, requested data as of June 30, 1966, on personal property of Government departments and agencies. These data have been requested by the committee each year since 1956 with the exception of fiscal year 1965.

Supplement No. 1 (revised) dated June 16, 1965, to Treasury Department Circular No. 966, requires all agencies not reporting under Circular No. 966 to submit financial statements as of June 30 of each fiscal year. All agencies furnishing statements of financial condition to the Treasury did so with complete cooperation and assistance. These reports enabled the Treasury to prepare the "Statement of Personal Property of the U.S. Government" shown in part III and a statement on "Related Real Property of Selected Agencies, Other Than Defense" shown in part VI of this report.

As in the past, the greater part of the asset reports of the legislative branch, the judiciary, and the Department of Defense, were sent directly to the House committee. By mutual agreement, the amounts reported directly to the committee by the legislative branch and the judiciary, and certain personal property items reported by the Department of Defense directly to the Treasury, are included in this section of the report.

In addition to the comparative summaries that follow, overall summaries that contain public domain, donated property, and other real property have been prepared and are included in part II of this report.

Comparative figures on personal property of the U.S. Government (excluding the greater part of the Department of Defense shown elsewhere in this report) as of June 30, 1966 and 1964¹

[In thousands of dollars]

Classification	June 30, 1966	June 30, 1964 ¹	Increase or decrease (—)
Cash on hand, in banks, etc.....	\$13,631,357	\$11,724,882	\$1,906,475
Investments (other than public debt).....	7,579,011	5,946,436	1,632,575

Machinery and equipment.....	14,608,240	13,493,916	1,114,324
Other assets.....	13,996,422	13,660,294	336,128
Total.....	100,393,531	94,934,149	5,459,382

¹ Figures as of June 30, 1965, were not compiled.

NOTE.—All assets herein reported are shown in gross amounts with no deductions for allowances for losses or depreciation. Only wholly Government-owned corporation assets and other wholly owned assets are included. Assets under trust arrangements and interagency assets, including public debt securities, are excluded. The assets are in the main valued at acquisition cost (known or estimated).

As shown in the above summary, total personal property inventories increased during the fiscal years 1965 and 1966 by a net amount of \$5,459 million. The largest increase occurred in cash on hand and in banks amounting to \$1,906 million represented by an increase of \$1,372 million in the cash balance of the Treasurer of the United States and an increase of \$534 million in other cash balances. Other major increases in asset classifications were as follows: Investments, \$1,633 million; accounts and notes receivable, \$1,003 million; loans receivable, \$1,370 million, this amount being analyzed by type of loan in a summary table below; and machinery and equipment, \$1,114 million. Decreases in personal property inventory occurred in commodities for sale in the amount of \$1,239 million, and materials and supplies, \$869 million.

¹ Includes materials for national defense.

² Includes foreign currency loans amounting to \$4,808,512,325 (see footnote 3).

³ Includes balances of foreign currencies in the dollar equivalent of \$2,463,668,174. These currencies, acquired primarily without the payment of dollars, were generated under various Government programs, primarily the Agricultural Trade Development and Assistance Act of 1954, as amended, and the Mutual Security Acts, as amended. Dollar equivalents are computed, for reporting purposes, to provide a common denominator for the currencies of the many countries involved. Foreign currencies on hand and on deposit, and loans under sec. 104(e) of the Agricultural Trade Development and Assistance Act of 1954, are stated at the rates as of June 30, 1966, at which the United States could purchase currencies on the market for regular operating purposes. Other loans are stated at the rates at which they are to be repaid or at rates in effect when the loans were extended. Currencies that are dollar denominated or guaranteed as to rate of exchange are stated at rates specified in the agreements.

⁴ Excludes \$855,245,723 representing loans financed by the sale of certificates of interest by the Commodity Credit Corporation to private financial institutions, and included in the Corporation's liabilities.

⁵ Includes certain figures on personal property for the Department of Defense not included under the special section of real and personal property of that Department in this report.

⁶ Has been reduced by participation certificates issued under trust agreements by the Federal National Mortgage Association, participation sales fund. The face amounts of participation certificates outstanding for these programs as of June 30, 1966, were—

Federal National Mortgage Association:

Management and liquidating functions.....	\$130,000,000
Special assistance functions.....	655,000,000
Small Business Administration.....	350,000,000
Veterans' Administration.....	
Direct loans to veterans and reserves.....	708,700,000
Loan guaranty revolving fund.....	206,300,000
Includes judgments of \$290,795,894 in favor of the United States transferred from other agencies. No reduction has been made for possible uncollectible items.	
⁷ Does not include the principal of World War I debt accounts amounting to \$11,427,523,084 on which payments have not been received since 1933.	
⁸ Includes World War I indebtedness of Finland amounting to \$4,892,000. Does not include an amount of \$28,102,000 representing loans to various States pursuant to an act approved June 23, 1936, on which payments have not been received.	
⁹ Excludes \$1,385,005,723 representing loans financed by the sale of participation certificates to private financial institutions, and included in the Bank's liabilities.	
¹⁰ Less than \$500.	

NOTE.—All assets herein reported are shown in gross amounts, with no deductions for allowances for losses and depreciation. Only wholly Government-owned corporation assets and other wholly owned assets are included. Assets held under trust arrangements and interagency assets, including public debt securities owned, are excluded. The assets are, in the main, valued at acquisition cost (known or estimated).

¹ Includes materials for national defense.

² Includes foreign currency loans amounting to \$4,808,512.325 (see footnote 3).

³ Includes balances of foreign currencies in the dollar equivalent of \$2,463,668.174. These currencies, acquired primarily without the payment of dollars, were generated under various Government programs, primarily the Agricultural Trade Development and Assistance Act of 1954, as amended, and the Mutual Security Acts, as amended. Dollar equivalents are computed, for reporting purposes, to provide a common denominator for the currencies of the many countries involved. Foreign currencies on hand and on deposit, and loans under sec. 104(e) of the Agricultural Trade Development and Assistance Act of 1954, are stated at the rates as of June 30, 1966, at which the United States could purchase currencies on the market for regular operating purposes. Other loans are stated at the rates at which they are to be repaid or at rates in effect when the loans were extended. Currencies that are dollar denominated or guaranteed as to rate of exchange, are stated at rates specified in the agreements.

⁴ Includes \$835,723 representing loans financed by the sale of certificates of interest in the Corporation to private financial institutions, and included in the Corporation's liabilities.

⁵ Includes certain figures on personal property for the Department of Defense not included under the special section of real and personal property of that Department as reported.

⁶ Has been reduced by participation certificates issued under trust agreements by the Federal National Mortgage Association, participation sales fund. The face amounts of participation certificates outstanding for these programs as of June 30, 1966, were—

PERSONAL PROPERTY INVENTORY OF THE ARCHITECT OF THE CAPITOL
AS OF JUNE 30, 1966

Property under this heading is valued at acquisition cost and is located at the Capitol Building, Senate Office Buildings, House Office Buildings, and Grounds, including the Rayburn House Office Building; Capitol Power Plant and Grounds; Library Buildings and Grounds; U.S. Supreme Court Building and Grounds; and U.S. Botanic Garden and Nursery.

Personal property

1. Office furniture, furnishings, and equipment.....	\$2, 211, 876. 07
2. Mechanical equipment.....	1, 777, 493. 30
3. Supplies and materials (including plant material of Botanic Garden and Nursery).....	2, 146, 852. 41
4. Works of art.....	1, 589, 512. 80
5. Furniture, furnishings, and equipment, excluding restaurant furniture and equipment, of the Rayburn House Office Build- ing—transferred to the Clerk of the House of Representa- tives, but being reported by the Architect of the Capitol for this report.....	2, 600, 000. 00
Total personal property.....	10, 325, 734. 58

ARCHITECT OF THE CAPITOL,
Washington, D.C., December 9, 1966.

HON. WILLIAM L. DAWSON,
*Chairman, Committee on Government Operations,
House of Representatives, Washington, D.C.*

MY DEAR MR. CHAIRMAN: In reply to an inquiry by a member of your staff concerning the inclusion of furniture, furnishings, and equipment procured for the Rayburn House Office Building by the Architect of the Capitol, the following information is submitted.

Furniture and furnishings, which normally fall under the jurisdiction of the Clerk of the House, were transferred to his control as indicated by the following extract from a letter of the Architect of the Capitol, dated June 23, 1966:

"Pursuant to direction of the House Office Building Commission, all furniture and furnishings purchased by the Architect of the Capitol for the Rayburn Building except restaurant furniture are hereby transferred to your jurisdiction and furniture and furnishings hereafter received will be transferred to you as outlined."

The approximate value of the furniture, furnishings, and equipment thus transferred is \$2,600,000. Restaurant furniture and equipment have been included elsewhere in the personal property inventory report.

I hope the above information will enable you to include this property in your inventory report in an appropriate manner.

Sincerely yours,

J. GEORGE STEWART,
Architect of the Capitol.

U.S. SENATE,
OFFICE OF THE SERGEANT AT ARMS,
Washington, D.C., November 9, 1966.

HON. WILLIAM L. DAWSON,
Chairman, Committee on Government Operations,
House of Representatives, Washington, D.C.

DEAR CONGRESSMAN DAWSON: Enclosed is the inventory report of personal property under the jurisdiction of the Sergeant at Arms of the U.S. Senate, as of June 30, 1966, according to your request.

Very truly yours,

ROBERT G. DUNPHY.

PERSONAL PROPERTY INVENTORY UNDER THE JURISDICTION OF THE
SERGEANT AT ARMS, U.S. SENATE, AS OF JUNE 30, 1966

Cash held by disbursing officer.....	\$479, 949. 84
Office supplies and equipment, furniture and carpets.....	624, 546. 02

OFFICE OF THE CLERK,
HOUSE OF REPRESENTATIVES,
Washington, D.C., November 28, 1966.

HON. WILLIAM L. DAWSON,
*Chairman, Committee on Government Operations,
House of Representatives, Washington, D.C.*

DEAR MR. CHAIRMAN: In compliance with your request, I have the honor to submit herewith an inventory of personal property of the House of Representatives. This statement reflects the specific number of items in various classifications as well as the actual or approximate cost of a class of items, as nearly as possible obtainable, to the date of June 30, 1966. This inventory is classified in nine categories identified as schedules A through I, inclusive, with totals as follows:

A. Furniture, carpet, and drapes, including furniture for the House side of the Capitol but not including furnishings in the Rayburn Building-----	\$2, 582, 256. 04
B. Supplies and material (for construction and repair of furniture, drapes, venetian blinds, rugs, etc.)-----	45, 845. 23
C. Machinery, tools, and accessories (for repair shops)-----	13, 400. 82
D. Cleaning supplies and other equipment for committees and offices in the Capitol, i.e., Attending Physician, Doorkeeper, Sergeant at Arms, etc.-----	19, 687. 94
E. Manual typewriters-----	214, 980. 48
F. Electrical and mechanical equipment-----	3, 569, 021. 00
G. Stationery room-----	91, 787. 75
H. Recording studio-----	40, 459. 00
I. Miscellaneous equipment, folding room, post office, etc-----	215, 316. 43

Sincerely yours,

RALPH R. ROBERTS,
Clerk, U.S. House of Representatives.

RECAPITULATION—PERSONAL PROPERTY INVENTORY OF THE CLERK OF
THE HOUSE OF REPRESENTATIVES AS OF JUNE 30, 1966

Cash held by disbursing officer-----	\$445, 121. 34
Furniture, carpet and drapes, including furniture for the House side of the Capitol (not including Rayburn Building)-----	2, 582, 256. 04
Supplies and materials (for construction and repair of furniture, drapes, venetian blinds, rugs, etc.)-----	45, 845. 23
Machinery, tools and accessories (for repair shop)-----	13, 400. 82
Cleaning supplies and other equipment for committees and offices in the Capitol, i.e., attending physician, Doorkeeper, Sergeant at Arms, etc.-----	19, 687. 94
Manual typewriters-----	214, 980. 48
Electrical and mechanical equipment-----	3, 569, 021. 00
Stationery room-----	91, 787. 75
Recording studio-----	40, 459. 00
Miscellaneous equipment, folding room, post office, etc-----	215, 316. 43
Total, personal property-----	7, 237, 876. 03

THE LIBRARIAN OF CONGRESS,
Washington, D.C., October 25, 1966.

HON. WILLIAM L. DAWSON,
Chairman, Committee on Government Operations,
House of Representatives, Washington, D.C.,

DEAR MR. DAWSON: I submit herewith three copies of the estimate of the Library's personal property evaluation, including collections, card catalogs, and other categories as reported in previous years. Should further information be desired in this connection I shall be happy to provide it.

Sincerely yours,

L. QUINCY MUMFORD,
Librarian of Congress.

ADMINISTRATIVE OFFICE OF THE U.S. COURTS,
Washington, D.C., October 20, 1966.

HON. WILLIAM L. DAWSON,
Chairman, Committee on Government Operations,
House of Representatives, Washington, D.C.

DEAR MR. CHAIRMAN: In accordance with your request of Jan-
uary 25, 1966, I am submitting the acquisition cost of personal
property of the U.S. Courts of Appeals, U.S. District Courts, U.S.
Customs Court, and the Administrative Office of the U.S. Courts,
located within the 50 States of the United States and the several
territories, which was acquired through the expenditure of appro-
priated funds. This report was compiled as of June 30, 1966. The
various categories of property and the costs thereof are as follows:

Item	Units	Acquisition cost
Electric typewriters.....	2, 907	\$1, 088, 726
Manual typewriters.....	1, 447	190, 452
Portable typewriters.....	227	15, 227
Dictating machines and auxiliary equipment.....	1, 222	420, 910
Adding machines.....	670	222, 985
Duplicating machines and auxiliary equipment.....	348	191, 607
Copying machines.....	505	181, 960
Addressing machines.....	186	19, 423
Folding machines.....	128	34, 344
Registers.....	343	27, 208
Envelope sealers.....	152	22, 220
Microfilm equipment.....	32	19, 468
Check signing machines.....	50	15, 704
Envelope inserting machines.....	41	39, 060
ADP machines and auxiliary equipment.....		33, 362
Miscellaneous items: Seals, brief cases, copyholders, pen sets, trimmers, numbering machines, and so forth.....		176, 568
Furniture.....		3, 195, 218
Subtotal.....		5, 894, 442
Miscellaneous supply items issued from stockroom.....		63, 284
Law libraries.....		21, 654, 374
Total acquisition cost.....		27, 612, 100

This report covers personal property only as the Federal judiciary
does not have title to any real property. Also, this report necessarily
excludes furniture which has been provided by the General Services
Administration since July 1, 1962.

Sincerely yours,

WARREN OLNEY III, *Director.*

REAL AND PERSONAL PROPERTY

OF THE

DEPARTMENT OF DEFENSE

AS OF 30 JUNE 1966

INTRODUCTION AND SUMMARY

Introduction

The National Security Act of 1947 requires the Secretary of Defense to report annually to the President and to the Congress on the property records on "... the fixed property, installations, and major equipment items, and stored supplies of the military departments maintained on both a quantitative and monetary basis ..." (Section 410 of the National Security Act of 1947, as amended, as codified in Section 2701 of Title 10, United States Code).

This report showing the status of Department of Defense real and personal property as of 30 June 1966 has been designed to meet the statutory requirement.

The values reflected in the report for land and buildings and for long-life equipment, such as ships, represent acquisition cost. Acquisition costs of ships as well as land and buildings are often substantially below current replacement values. Construction in progress is valued on the basis of cost of material and labor incorporated in the projects under construction. The value of items other than major equipment in supply system inventories is generally based upon standard prices, representing replacement or estimated purchase price. The value of major equipment is derived from the unit cost based on the most recently executed contract for large quantity production.

As has been the case in each year, coverage of the report has been improved in some areas. In December 1965 there was included in Army supply system inventories the value of complete non-strategic surface-to-air and surface-to-surface missile systems under the management of the Army Missile Command. Prior to that time, it had been believed, under an interpretation of the reporting instructions, that these missiles, like complete aircraft, were to be excluded from supply system reporting, although the value of these items was included in the equipment in use area. The inclusion of Army non-strategic missiles in the supply system totals, therefore, does not represent new coverage for Department of Defense assets in total; the value of these items in store at 30 June 1966 amounts to \$680 million. Representing completely new coverage, reported for the first time by Air Force, are the values of cryptologic equipment (\$9 million), and of some special project and account materiel (\$117 million), and the value of secondary separable items which represents that portion of the total of all reparable items that statistical experience shows would have been condemned if repair had been attempted on all items. Heretofore, these have been discounted, but until they are, in fact, condemned, a decision was made to include their value (\$285 million at 30 June 1966) in the Air Force supply system inventory and to stratify them as potential DOD excess. The foregoing represent examples of entirely new categories of reporting in the supply system; new weapons systems or other new items added to the inventory as a result of procurement are considered as normal addition which for the purpose of this report require no special comment.

The total value as reported is exclusive of: (1) properties and

equipment of the National Industrial Plant and Equipment Reserve, which is under the custody of the General Services Administration; and (2) properties and supplies under the jurisdiction of the Civil Works Division, Office of the Chief of Engineers, Department of the Army. The value of properties in these two excluded segments are shown separately, however; the value of the National Industrial Reserve is shown in Section C of Part II of this report and the value of Civil Works properties shown in a footnote to Table 2.

Although reports on some of the inventories of the Department of Defense contain details which, for reasons of military security, cannot be publicly released, detailed, classified data will be made available to appropriate committees of the Congress as required.

Department of Defense Summary (Tables 1 and 2; Charts 1 and 2)

The value of Department of Defense property at the end of the fiscal year, 30 June 1966, was \$183.6 billion, \$7.3 billion more than was reported a year ago. Of this increase, \$0.8 billion represents the increased cost of real property which rose from \$37.6 billion to \$38.4 billion during the year. The value of personal property increased \$6.5 billion, from \$137.2 billion to \$143.7 billion. Slightly more than \$1 billion of this increase was as a result of the increased coverage cited above.

As has been the case each year, more effective and more expensive equipment has been acquired together with improved facilities. This results in an increased value of Department of Defense-owned property, but the rising costs of individual weapons and facilities may be offset to some extent by disposal of much larger quantities of obsolete and unneeded property which was acquired at a lower cost. As a possible indicator of

Excess, Surplus, and Foreign Excess Property Inventories	2,650	333	1,250	59	-

1/ Excluded from the totals are properties of the Civil Works Division, Chief of Engineers, Department of the Army, as shown in Footnote 1, Table 2.

2/ Includes \$2.0 billion of expenditures charged for work in place on vessels under construction or conversion.

3/ Consists of materials, supplies, and net (unbilled) work in process.

this disposal, the trend of physical quantities stored each year is downward, as shown by the continuing decrease in occupied net storage space owned by the Department of Defense elements. During fiscal year 1966, this decrease amounted to 7.8 million square feet (4.2 percent of the total of occupied covered and improved open storage space in major supply installations). From this, it will be seen that the reduction in physical quantities of equipment and supplies held, which results from the Defense program of the past several years of purging the inventory of long supply, particularly excess, stocks, offset to some extent the net increase of \$0.7 billion in the value of supply system inventories.

Table 1 shows the total value of property held by each Department of Defense component, i.e., military service or Defense agency. Weapons and supporting equipment assigned to operational units, amounting in value to \$87.6 billion, makes up the largest segment (47.7 percent) of the Department of Defense total of \$183.6 billion; last year it was \$85.0 billion (48.2 percent). The reported value of real property, surpassing for the second consecutive year the value of supply system inventories, is the next largest segment, \$38.4 billion or 20.9 percent of the total. The third largest segment of Defense property is the supply system inventories, those items of equipment and supply that are needed to support the operating forces. These are valued at \$37.7 billion, and represent 20.6 percent of the total of all property. Attention is invited at this point to the fact that the ratio between the value of the inventories of equipment, parts, and supplies that support military personnel and the weapons and military equipment that they use, and the value of those weapons and equipment has been steadily diminishing. In 1959, the value of supply inventories

was 70 percent of the value of weapons; by 1961 this had been reduced to a little over 60 percent; at the end of 1964, it had dropped below half to 47.8 percent, and today stands at 43.0 percent.

While this results from the interaction of two factors, the mounting cost of weapons (the reported value of which has, admittedly, increased with enlarged coverage) and the generally decreasing value of inventories in store (also affected by increased coverage), which over this period have been reduced by a little over 15 percent, the facts show that today, for each dollar of operational equipment only 43 cents is tied up in bases and depots, whereas six years ago, 62 cents was required. Or, to put it another way, if \$88 billion of weapons were represented by 61.7 percent of depot stocks to support it, as was on hand in 1960, there would be \$54 billion of inventories in store today instead of \$37.7 billion. The saving amounts to \$16.3 billion.

Navy again reported the largest value of property of all kinds, \$73.9 billion, an increase of \$4.2 billion during the year, and 40.3 percent of the total. Air Force owned \$68.6 billion as of 30 June 1966, \$1.3 billion more than last year, \$0.4 billion of which was owing to the increased coverage. Army reported a total of \$38.2 billion, an increase of \$1.8 billion during the year, about \$0.7 billion of which can also be laid to the increased coverage noted above. Defense Supply Agency and other elements of the Department of Defense account for \$2.8 billion, less than 2 percent of the total.

Table 2 shows the geographic distribution of properties by major type located (1) in the United States, (2) in U. S. possessions including the Commonwealth of Puerto Rico, and (3) in foreign countries and afloat. Of the \$183.6 billion total, \$136.7 billion (almost 75 percent)

Personal Property	311	311	-	-

2/ Relatively minor values of supply system inventories located in U. S. Possessions are included in overseas areas and reported in the "Foreign" column.

3/ Includes Reserve Fleet.

4/ Includes Active Fleet, Supplies Afloat, and organic property of Fleet Marine Force.

5/ Less than \$0.5 million.

was located in the United States; \$44.2 billion was in the foreign countries and afloat category, more than half of which is accounted for by the Navy active fleet and the Fleet Marine Forces; and \$2.6 billion was in U. S. possessions. Property in the 50 states increased \$2.6 billion during the year; that outside increased \$4.7 billion, reflecting the deployment of U. S. forces. Again this year, reports of supply system inventories, by location, place inventories located in U. S. possessions and foreign countries together in a combined "overseas" total.

PART I - MILITARY REAL PROPERTY

Section A - Inventory of Military Real Property1. General

This section of the report presents a summary and a brief analysis of the inventory of military real property as of 30 June 1966. Detailed statistics on Civil Works property (river and harbor and flood control property under the jurisdiction of the Secretary of the Army) are not included in this report; however, summary totals for informational purposes are shown as memorandum items.

The real property under the control of the military departments is one of the most important assets of the Department of Defense. In order to achieve maximum defense at minimum cost, such real property must be administered in accordance with modern management principles. The real property inventory provides information required to achieve management objectives of better utilization, use of existing real property in lieu of new acquisitions, and reduction of real property holdings and maintenance costs by effecting prompt disposition of excess property.

The first inventory report of the military departments submitted under uniform instructions (Department of Defense Instruction 4165.14) covered an inventory of 1 January 1954 which was completed in November 1954. Data from this first report and each of the subsequent inventory reports have been used in the preparation of Congressional reports by the Department of Defense and the General Services Administration.

The inventory data covering military real property include land and improvements on such property including installed equipment such as fixed overhead crane runways, elevators, lavatories, plumbing and

electrical systems. Machine tools and production equipment at such installations, however, are not included, but are included under personal property, Part II.

2. Department of Defense Summary of Real Property

Cost of Property Controlled - The total cost to the United States Government of real property controlled by the three military departments as of 30 June 1966 was \$38.39 billion (see Table 3). The increase of 2.2 percent over the \$37.56 billion reported one year earlier was about the same change as occurred during the preceding year; the dollar increase for FY 1966 was \$832 million as compared with \$822 million during FY 1965. During the year ending 30 June 1964, the percentage increase in net inventory was only 0.5, the lowest reported since 1955. A large part of the indicated status quo in activity during FY 1964 was the reflection of final disposition actions on properties declared excess in prior years. Continuing emphasis on disposal of unneeded properties reflects in annual inventories as final disposition is accomplished.

The \$832 million net increase during the year ending 30 June 1966 resulted from increases of \$389 million for the Air Force, \$243 million for the Army and \$200 million for the Navy. During the preceding year, increases of \$124 million for the Navy and \$763 million for the Air Force were offset somewhat by a \$65 million decrease in Army property inventory.

Larger increases occurred in properties outside the United States during FY 1966 than during the preceding year. Of the \$832 million net increase on a world-wide basis \$524 million was in properties in the United States, \$160 million in properties in the possessions, and \$148

million in properties in foreign countries. During the year ending 30 June 1965 the increases had been \$754 million for the United States, \$29 million for possessions, and \$39 million for foreign countries.

The distribution of inventory by military department is illustrated in Chart 3. Of the \$38.4 billion total as of 30 June 1966, \$32.6 billion was in the United States, \$1.3 billion in the United States possessions, and \$4.5 billion in foreign countries friendly to the United States.

"Controlled," as used throughout this report, has reference to the right of directing the use of property. In connection with buildings, structures, or land, it includes (1) owned (acquired through purchase, condemnation, donation, or transfer); (2) leased; (3) public domain (withdrawn permanently or temporarily by the military departments); (4) temporary use (acquired through license or permit, temporary public land order, temporary executive or territorial order); (5) easements (utility, clearance, etc.); (6) foreign rights (base rights agreements, reciprocal aid, requisitioned, etc.)

This \$38.4 billion of military real property does not indicate present market value. Some of the land now owned by the military departments was donated, such as part of Fort Monroe, the original portion of which was donated to the Army by the State of Virginia. Also, some of the land used by the military departments was withdrawn from the public domain. There is no cost for public domain lands and in many instances no costs, or only nominal costs, for donated lands. Land and buildings in some cases were acquired a century or more ago when land prices and building costs were only a fraction of today's prices and costs. Cost data, in some

as of 30 June 1966

DEPARTMENT OF DEFENSE

(Thousands of Dollars)

Location	Department of Defense	Army	Navy (Including Marine Corps)	Air Force
<u>TOTAL</u> ^{2/}	\$ 38,389,795	\$ 10,990,491	\$ 10,417,428	\$ 16,981,876
United States ^{3/}	32,565,503	9,719,658	8,830,743	14,015,102
Possessions	1,314,254	285,828	672,353	356,073
Foreign Countries	4,510,038	985,005	914,332	2,610,701

^{1/} Does not include amount of rentals paid (see Table 12) nor the value of property under lease; does include costs of improvements on leased properties.

^{2/} Includes DoD Agencies.

^{3/} Excludes real property in the amount of \$7,758 million under the jurisdiction of the Civil Works Division, Office, Chief of Engineers, Department of the Army.

instances, include estimates from old records, and are not always precisely accurate representations of original cost.

Offsetting this tendency to understate real property values is the fact that no allowance for loss of value as a result of depreciation is reflected. However, because the data represent an inventory as of a given date, they do not include costs of structures which were demolished prior to that date. As additional construction or acquisition is accomplished, it is written into the inventory at the cost to the United States. The original cost figure is of significance as an historical measure of the military real property holdings of the Department of Defense, and in the absence of current appraised valuations (which would be very costly and of doubtful utility), is the only monetary measure of the Federal proprietary interest.

The data on cost to the Government do not include the amount of rentals paid nor the value of the property under lease. These data, however, do include costs of any improvements made and owned by the Government on the leased properties.

At the request of the House Committee on Government Operations, an estimate has been made of the current value of the donated land and of the public domain land which is controlled by the Department of Defense. These estimates for either public domain or donated lands are not included in the \$183.6 billion book value total of the real and personal property for military use or in the \$11.1 billion total reported separately for civil functions.

The estimates for public domain lands are shown in Tables 4 and 5. Table 4 shows total estimates for military and civil functions separately, and Table 5 distributes the estimates for military functions by military department.

The estimates for the lands donated to the Department of Defense are shown in Tables 6 and 7. Table 6 shows total estimates for military and civil functions separately, and Table 7 distributes the estimates for military functions by military department.

The types of activities on the donated lands used for military and civil functions include:

Military Functions

Reserve Training Centers	Naval Air Stations
National Guard Training	Naval Stations
Military Headquarters	Shipyards
Hospitals	Industrial
Depots and Supply Centers	Communications
Military Schools	Cemeteries

Civil Functions

Flood Control	Harbor and Port Terminals
Navigation	Storage
Harbor	Boatyard

Real Property in Foreign Countries - The \$4.5 billion investment in real property in friendly foreign countries represents the cost of that real property to the United States. It consists of troop and family housing, storage facilities, airfields, maintenance facilities, hospitals, and various other kinds of real property required by our armed forces overseas.

International agreements which make it possible to station our armed forces in friendly countries provide the basis for the occupancy

by our forces of real property in those countries and for United States investment in such real property. In recent years negotiation of such agreements has provided some recognition of the residual value of United States facilities constructed with appropriated funds. Occupancy, in effect, is on a term basis varying from month to month (revocable at the sole discretion of the host government) to a firm term of 99 years. Areas occupied vary from small amounts of privately-owned space to large holdings of host governments.

In the occupied area of West Berlin, some occupancies have been effected through the use of requisitions. These occupancies are financed from the Berlin Magistrate Budgets by the Federal Republic of Germany with Deutschmarks. This report includes only the cost, if any, to the United States of properties in this area.

During the past few years, a number of properties in Japan, Korea, West Germany, and other countries have been released by the Department of Defense to the governments of these countries.

In certain countries, title to improvements constructed by the Department of Defense is vested in the United States until termination of agreements by which occupancy was established. Upon expiration of such an agreement disposition of the property is accomplished in accordance with terms of the agreement. (Title may pass automatically to the host country or the property may be removed or sold by the United States or its ultimate disposition may be left open for further negotiations.) In other instances, residual value clauses provide that, upon termination

of agreements, the host government agrees to pay the residual value of the improvements constructed by the Department of Defense in such amounts as may be jointly agreed upon by the host government and the United States.

These facts emphasize the desirability of awareness that our real property in foreign countries is carried on the books of the Department of Defense and in this report at its cost to the United States. The physical facility represented by an investment in a foreign country may be identical with a facility within the United States owned by our Government but it represents a very different type of an investment. It is an investment arising from the world situation at the time it was made and the resulting national commitments of the United States.

The report does not include any investment by the United States for Infrastructure (the NATO common infrastructure program), which is a term used to identify the fixed military facilities needed to support effective combat operations by the integrated NATO forces. Construction costs for Infrastructure facilities are shared by all NATO nations. Actual construction is the responsibility of the nation in whose territory a project is located.

Ownership and Status - The figures in Table 3 show that on a cost basis 84.8 percent of the military real property controlled is located within the United States. Of the remainder, 3.4 percent is in the United States possessions and 11.8 percent in foreign countries. As of 30 June 1960 the proportions were 83.1 for United States, 3.7 for possessions, and 13.2 for foreign countries.

The distribution by military department of world-wide military real property of the Department of Defense has continued to change with

the Air Force total moving up more rapidly than that of the other two military departments. A large part of this is accounted for by construction, which has been larger for the Air Force during the past few years than for the other two military departments. As of nine years ago (30 June 1957), the distribution of real property inventory, on a dollar basis, was 33.3 percent for Army, 33.0 percent for Navy and 33.7 percent for the Air Force. Distribution as of 30 June 1966 was 28.6 percent Army, 27.1 percent Navy and 44.3 percent Air Force. Whereas the major portion of the indicated increase during the past several years for the Air Force is from new construction, a small part is due to improved coverage which occurred during the 1955-1958 years.

On a dollar cost basis, Air Force controlled the largest portion (43.0 percent) of the Department of Defense total within the United States, Navy had the largest part (51.2 percent) of properties in the United States possessions, and Air Force controlled 57.9 percent of the Defense total in foreign countries on 30 June 1966.

It should be recognized that from the standpoint of construction, Air Force installations are generally newer than those of either of the Army or Navy, and thus, their costs are generally more fairly representative of current value. Some of the facilities transferred to the Air Force during the late 1940's, however, fall into the category of rather old structures for which original costs are not truly representative of current values. Only as new construction occurs within the specified inventory period are the inventory costs more indicative of current values.

The cost of properties at nonindustrial installations (training centers, depots, hospitals, command headquarters, ports, housing, etc.) was 85.8 percent of the cost of all properties on a world-wide basis; about the same as for one year earlier. As of eight years ago (30 June 1958) the nonindustrial total cost was 79 percent of the total dollar cost. This proportion for nonindustrials has been increasing slightly during the past few years because new construction is generally for nonindustrial types of facilities and because several industrial plants have been sold to private enterprise.

Reference to Table 8 shows that properties located at installations in an inactive or standby status on a world-wide basis cost \$2.5 billion, 6.6 percent of all properties. As of the end of the preceding year the inactive properties were inventoried at \$2.2 billion, or 5.9 percent of all world-wide properties. At the end of fiscal year 1960 the inactive properties comprised 9.1 percent of all properties. The general trend of reduction of properties in an inactive status is partially the result of continuing efforts to effect prompt disposals and return property to the local economy.

Types of Properties - Table 9 shows the military real property costs for the entire Department of Defense by broad geographical locations and by major facility groupings. The largest single facility group is operational and training facilities which accounts for 23.9 percent of the world-wide dollar amount. Next in order is the utilities and ground improvements group which is made up mainly of heat, power, water and sewer systems coupled with roads, bridges, walks and parking areas. This

group accounts for 23.6 percent of the entire world-wide amount. Housing and community facilities make up 21.2 percent of the world-wide total; in foreign countries this group comprises 25.8 percent of the foreign countries total.

Table 10 shows the ten categories of real property, listed in order of cost, in which the Department of Defense has the largest dollar investment. These data are illustrated in Chart 4. The ten categories on a world-wide basis represent a total cost of \$24.5 billion or nearly two-thirds (63.9 percent) of the cost of all Defense-controlled real property.

Family housing is the largest single category followed by airfield pavements and troop housing; each of these three groups has acquisition cost of over \$3 billion. As of 30 June 1966, the cost of family housing inventory was nearly \$3.5 billion, about \$102 million more than the amount one year earlier. World-wide inventory of airfield pavements increased \$25 million to \$3.1 billion. The troop housing world-wide total was \$36 million more than for one year earlier.

Comparable data on the ten largest categories within the United States are presented for each of the military departments in Tables 21 (Army), 25 (Navy), and 29 (Air Force).

The cost of land controlled by the Department of Defense represents only 1.8 percent of the total cost of all real property controlled by the Department of Defense. Cost of buildings, on the other hand, represents 54.9 percent of the total costs of military real property controlled. Other improvements not classified as buildings such as

WORLD-WIDE
AS OF 30 JUNE 1966

airfield pavements, communication towers, utility systems, operational and test structures, and roads and streets account for 43.3 percent.

Table 11 shows the cost of buildings by broad geographical areas and by military department. The over-all inventory cost of buildings, world-wide is \$21.1 billion as compared with \$20.5 billion one year earlier. Of the total world-wide increase in inventory of \$832 million during the year ended 30 June 1966, \$563 million or 68 percent was in properties classified as buildings. From Table 11, it may be noted that about one-half of the Navy and Air Force properties are classified as buildings, on a dollar basis; for Army about two-thirds of the properties are classified as buildings.

Lease Rentals - The total world-wide annual rental bill paid for properties used by the Department of Defense on the basis of leases in effect on 30 June 1966 was \$58.65 million as compared with \$34.99 million a year earlier. A small overall decrease of \$109 thousand in Air Force rentals paid occurred whereas sizeable increases of \$900 thousand for the Navy and \$22.8 million for the Army were recorded. The more than doubled amount of rentals paid by the Army were for properties acquired in foreign countries. Table 12 shows annual rentals paid.

Offsetting in part the \$58.65 million paid out in rentals were receipts of \$8.71 million for properties leased to others on the basis of leases in effect at the end of the year (see Table 13). The bulk (97 percent) of rental receipts was for properties in the United States. About 51 percent of total receipts were from Army, 34 percent from Navy, and 15 percent from Air Force properties leased to others.

Acreage Controlled - The Department of Defense through the three military departments controlled a total of 31.04 million acres of land throughout the world on 30 June 1966 (Table 14). This was an increase of 140 thousand acres, or 0.5 percent over the acreage reported a year earlier. Despite the net increase there were some disposals and returns of public domain lands to the Department of Interior during the year. The world-wide holdings on 30 June 1966 of the Department of Defense were 3.95 million acres less than the 35.0 million of 30 June 1957.

The reduction of 242 thousand acres for the Air Force contrasted with increases of 238 thousand acres reported for the Navy and 145 thousand for the Army during the year ending 30 June 1966. On a Department of Defense basis reductions were reflected in possessions and foreign countries whereas the over-all in the United States increased 360 thousand acres. The United States net change resulted from increases of 72 thousand for the Army and 404 thousand for the Navy and a decrease of 115 thousand for the Air Force.

The largest change within the major types of land tenure was in temporary use and foreign rights. Land used on a temporary basis increased about 270 thousand acres and that used under foreign rights was 117 thousand acres less than that one year earlier. Some lands previously recorded as public land within the United States were reclassified in connection with certain statehood agreements pertaining to the State of Hawaii.

Total land holdings include owned, withdrawn from the public domain, used on a temporary permit, leased and various occupancy rights (easements and foreign rights of different types). The distribution of world-

wide acreage controlled by the Department of Defense is shown in Table 14 and Chart 5. Table 15 shows the type of occupancy of the land on a geographic basis. Reference to Table 15 shows that more than one-half of the total acreage used in the United States is classified as public domain land.

Of Defense-controlled acreage, about 89 percent is within the United States, one percent in the United States possessions, and 10 percent in foreign countries. The Army has 49 percent, the Air Force 37 percent, and the Navy 14 percent of the total world-wide acreage of the Department of Defense.

Acreage controlled by the military departments in the United States represents 1.21 percent of the total land area in the 50 States and the District of Columbia. The 27,606,219 acres owned or leased, or under permit, represent about 43,135 square miles. This total DoD-controlled acreage in the 50 States and the District of Columbia is a little more than the land area of the State of Tennessee. The relationship of the Defense-controlled lands to the total acreage in the United States is shown in Table 16.

In each of six states the Department of Defense controls more than two million acres. The six are, in order of magnitude of acreage controlled: California, New Mexico, Arizona, Nevada, Alaska, and Utah. Total acreage in these six states under Department of Defense control is 20.7 million, representing 75.0 percent of total Defense-controlled acreage in the United States. Table 17 lists the total cost and acreage included in Defense-controlled real property for each state and the District of Columbia.

1/ Land and Improvements.

The seven states in which the Department of Defense has more than one billion dollar investment in real property in order of magnitude of investment are California, Texas, Alaska, Virginia, New York, Florida, and Maryland. Total costs of the military real property controlled in these seven states (\$13.2 billion) represent 40 percent of the total controlled in the 50 States and the District of Columbia. Property in California totals \$4.3 billion or 13 percent of the total controlled by the Department of Defense within the United States.

3. Department of the Army

Real properties owned and controlled on a world-wide basis by the Department of the Army on 30 June 1966 cost \$10.99 billion, an increase of 2.3 percent over the \$10.75 billion one year earlier. Reductions of \$72 million due to disposals of entire installations were more than offset by increases for new construction within the United States and at foreign bases. Of the Army world-wide total on a cost basis, 88.4 percent was located within the United States, 2.6 percent in U. S. possessions, and 9.0 percent in foreign countries.

Annual rentals (\$42.82 million) paid by Army for property it was leasing on 30 June 1966 was more than double the \$19.96 million at the previous year end. This increase was for properties in overseas areas. Of the total Army rental bill 75 percent is now for properties in foreign countries as compared with 46 percent at the previous year end. Rentals paid in foreign countries increased from \$9.20 million to \$32.27 million because of sharply increased requirements for facilities in connection with Southeast Asia operations.

On the basis of leases in effect on 30 June 1966, the Army was receiving \$4.5 million for properties it was outleasing for nondefense use. Part of this is from grazing and agricultural uses.

Total world-wide acreage under Army control as of 30 June 1966 was 15.18 million acres; 92.8 percent within the United States, 0.6 percent in U. S. possessions, and 6.6 percent in foreign countries. Of the net increase of 145 thousand acres during the year, 72 thousand, or about one-half, was in the United States and most of the remainder of 73 thousand was in foreign countries.

Military real property under Army control within the United States as of 30 June 1966 has a total cost of \$9.7 billion, an increase of \$66 million during the year. About \$24 million of the increase in the United States was for troop housing. The proportion of Army installations in an active status, on a dollar cost basis, at the close of the year within the United States was 89.1 percent as compared with 86.7 percent one year earlier. Table 18 presents cost and rental data reported by the Army for the military real property under its control within the United States on 30 June 1966.

On a basis of cost to the Government, Army's nonindustrial installations within the United States constituted about 78 percent of the cost of all Army installations in the United States. Based on cost, 90.4 percent of the Army nonindustrial type installations in the United States were in an active status.

The percent of industrial installation property in an active status increased from 70.2 to 84.4 percent as the result of reactivation of

^{1/} Land and improvements.^{2/} Includes excess and standby.

several industrials during the year. Of the active industrial installations, 42 percent on a dollar basis, was operated by the Government and the remainder (58 percent) was operated by contractors.

Annual rentals paid by Army for property it leases in the United States, amounting to \$10.54 million, were offset considerably by rentals received in the amount of \$4.38 million. Of the rentals received, 56 percent was from industrial properties.

The total acreage controlled by Army within the United States is reported in Table 19 by status and by type of tenure and installation. Of the 14.08 million acres controlled by the Army within the United States, 4.18 million (30 percent) were owned and 7.27 million (52 percent) were public domain lands. The increase of about 80 thousand in acreage classified as owned by the Army within the United States was offset slightly by a reduction of about 6 thousand in public domain lands.

The acreage and cost to the Government of the military real property controlled by Army in each of the States and the District of Columbia within the United States are shown in Table 20. Four states had Army real properties costing more than one-half billion dollars; in order of magnitude these were Virginia, Texas, California, and Alaska. The cost (\$2.4 billion) of the properties in these four States constituted 25 percent of Army's total United States cost.

The total acreage (9.96 million) controlled by Army in the five States each having over one million acres; i.e., New Mexico, Alaska, Utah, California and Arizona, constituted nearly 71 percent of its United States acreage. Virtually all (98 percent) of the public domain

land under Army control was located in the five States of New Mexico, Alaska, Arizona, Utah, and California. Slightly more than one-half (51.6 percent) of all of the total acreage controlled by Army in the United States is public domain land.

The ten categories of real property in which Army had the greatest dollar investment in the United States are presented in Table 21. They are illustrated in Chart 6 along with Navy and Air Force data. The total cost represented by the ten largest Army categories is \$6.37 billion, 65.5 percent or two-thirds of the total Army United States cost. The category of heat utilities replaced ammunition storage as the tenth category by size of investment.

Slightly more than one billion dollars is invested in troop housing, the largest category. Family housing is in the number two position, following troop housing, with investment of \$974 million in dwelling units in the United States. Troop housing and family housing constitute 10.7 and 10.0 percent, respectively, of the total Army property inventory cost in the United States.

Department of the Army real properties in foreign countries represented a cost of \$985 million on 30 June 1966, as compared with about \$800 million four years earlier. An increase during the year of about \$135 million in Army investment in possessions resulted primarily from inclusion in inventory for the first time of an installation previously held by the Navy.

The Army had control through base rights and leases of slightly more than one million acres in foreign countries at the end of fiscal year 1966. In possessions about 97 thousand acres were under Army control.

1/ Dwellings only (excludes trailers and detached facilities).

2/ Excludes liquid fuel, ammunition, and cold storage.

3/ Includes operating plants and distribution lines.

4/ Million gallons per day.

5/ Million BTU per hour.

Troop housing continued to comprise the Army's largest cost category in foreign countries. In U. S. possessions, troop housing is the third largest category, dollarwise, preceded by R&D test facilities and family housing.

4. Department of the Navy

Real property controlled and used by the Navy on a world-wide basis cost \$10.4 billion, an increase of \$200 million dollars (two percent) from that reported one year earlier. Of the \$200 million increase, \$155 million was in the United States, \$9 million in possessions, and \$36 million in foreign countries.

Annual rentals paid by the Navy on a world-wide basis, as of 30 June 1966, amounted to \$4.73 million as compared to \$3.83 million one year earlier. Overall rental payments by the Navy were offset significantly by rental receipts of \$2.98 million for use of Navy properties.

Navy's acreage controlled, on a world-wide basis, was 4.48 million acres as compared with 15.18 million for the Army and 11.38 million for the Air Force. During the year, world-wide acreage controlled by the Navy increased 238 thousand acres, or approximately six percent. A decrease of 165 thousand acres in foreign countries was more than offset by the increase of 404 thousand acres in the United States. A large segment of the United States increase was in connection with a gunnery range in California.

On a cost basis, 84.8 percent of Navy-controlled property is located within the United States, 6.5 percent in the U. S. possessions, and 8.7 percent in foreign countries. Table 22 presents

^{1/} Land and improvements.^{2/} Includes excess and standby.

data showing costs and rentals for Navy-controlled installations in the United States by nonindustrial and industrial types.

Of Navy properties controlled on 30 June 1966 within the United States only 1.7 percent was at inactive installations, measured on a cost basis. Properties classified as industrial type facilities comprised on a cost basis 29.3 percent of the Navy real properties within the United States.

Of the total acreage Navy had under its control within the United States on 30 June 1966, 33 percent, or 1.37 million acres, was owned outright. An additional 2.29 million acres (55 percent of the total) were public domain lands. Lands previously labeled "public land" in Hawaii were reclassified during the year as result of finalizing certain actions in connection with statehood agreements.

The data in Table 23 provide certain detail relative to Navy acreage by type of tenure and installation. The increases in leased and public domain acreage were primarily in connection with a gunnery range in California. Of total acreage controlled by the Navy in the United States, 96.4 percent was located at installations which were in an active status on 30 June 1966.

In Table 24 data are presented showing State detail as to total cost and acreage of the military real property controlled by Navy within the United States. Navy has properties exceeding one-half billion dollars in cost in the four States of California, Virginia, Hawaii, and Maryland. These properties make up \$4.1 billion or 47 percent of the cost of Navy properties in the United States. The

1/ Data represent the cost of land and improvements.

cost to the U. S. Government of Department of the Navy real property in the State of California amounted to \$2.2 billion on 30 June 1966. This was 25 percent of the \$8.8 billion cost of all Navy Department real property in the United States.

In terms of acreage, 67 percent of the Navy United States total on 30 June 1966 was California land. This amounted to 2.77 million of the Navy U. S. total of 4.15 million acres. The next largest amount (233 thousand) is in Nevada, which represents 5.6 percent of the Navy U. S. total.

The ten real property categories representing the greatest cost to Navy are shown in Table 25 and are illustrated in Chart 6. In total, they constitute 60.8 percent (\$5.4 billion) of the over-all Navy real property costs in the United States. The broad diversification of Navy activities in the country is illustrated by the data in Table 25. While shipbuilding is one of the Navy's leading peacetime activities and accounts for a large part of its industrial activity, the Navy has numerous other activities of importance within the industrial field, namely, ordnance plants, various test stations (underwater laboratories, torpedo, radar, electronics, ballistics, etc.), propellant plants, ammunition depots, and other munitions type production facilities. Within the United States the largest Navy amount is invested in the maintenance facility category which is 11 percent of the U. S. total. Family housing and airfield pavements are the next two largest categories in order of investment. Family housing makes up nearly eight percent of the Navy U. S. total.

1/ Dwellings only (excludes trailers and detached facilities).

2/ Excludes liquid fuel, ammunition, and cold storage.

3/ Includes operating plants and distribution lines.

4/ Piers and wharves; excludes seawalls, bulkheads and other waterfront facilities

5/ Feet of berthing.

Of the Navy real property world-wide total, 8.7 percent (\$914 million) was in foreign countries as of 30 June 1966. At the end of the previous year the amount was \$878 million. Investment in U. S. possessions by the Navy totaled \$672 million at end of fiscal year 1966.

Acreage controlled by the Navy in foreign countries as of 30 June 1966 amounted to 248 thousand as compared with 413 thousand one year earlier. The amount of acreage controlled by the Navy in possessions was 85 thousand acres. A sizeable segment of acreage used by the Navy was returned to the Philippine Government during the year.

5. Department of the Air Force

World-wide real property under Air Force control on 30 June 1966 cost the Government \$16.98 billion. This represented 44 percent of the Department of Defense total investment in military real property. The Air Force total increased 2.3 percent during the year. Of the \$389 million increase, \$302 million was in properties in the United States. Investment in real properties of the Air Force outside of the United States on 30 June 1966 comprised 17.5 percent (about one-sixth) of all Air Force properties.

Air Force annual rentals paid for property used throughout the world on the basis of leases in effect on 30 June 1966 amounted to \$11.1 million, or \$109 thousand less than the \$11.21 million one year earlier. Of the \$11.1 million, 59 percent was for properties in foreign countries and 41 percent for properties in the United States.

Returns to the Air Force on the basis of leases in effect on 30 June 1966 for Air Force properties used by others amounted to \$1.27 million.

Land controlled by the Air Force throughout the world totaled 11.38 million acres on 30 June 1966, a decrease of 242 thousand acres from the 11.62 million acres reported a year earlier. This decrease was made up of 115 thousand acres in the United States and 127 thousand acres in foreign countries. The 1966 world-wide amount is the lowest reported during the past thirteen years and is 7.78 million acres less than that reported by the Air Force on 30 June 1957.

The data in Table 26 show that military real property controlled by the Air Force within the United States represented a cost to the Government of \$14.0 billion. Of the total world-wide Air Force investment, 83 percent represented installations within the United States, two percent in U. S. possessions and 15 percent in foreign countries.

Of the Air Force U. S. total investment, 8.5 percent is at inactive and standby installations as compared with 5.2 percent one year earlier. Industrial activities under Air Force control, all of which are contractor operated, constituted only 5.1 percent of the total Air Force property cost in the United States. As of 30 June 1966, on a dollar basis, 4.5 percent of the industrial properties was in a standby status.

The reduction of 115 thousand acres under Air Force control within the United States during the year ending 30 June 1966 was accounted for partly by a reduction of 95 thousand in leased land; other changes

^{1/} Land and improvements.

^{2/} Includes excess and standby.

involved a reduction of 108 thousand in public domain offset largely by an increase in lands used on a temporary basis.

Of the 16.5 million acres held as withdrawals from public domain by the Department of Defense within the United States, the Air Force controls 42 percent. Much of this land is used for missile ranges and advanced fighter bomber training. Of the 9.4 million acres held by Air Force in the United States on 30 June 1966, 1.7 million (18 percent) was owned and 7.0 million (74 percent) was public domain land. Table 27 provides additional detail on categories of lands held by the Air Force.

The state pattern of military real property controlled by the Air Force is shown in Table 28. The Air Force has properties costing more than one-half billion dollars in the states of California, Texas, Alaska, Florida, New York and Kansas. These properties amount to 38 percent of the total cost for the Air Force in the United States. Those in California, on an investment basis, are 11 percent of the Air Force U. S. total. The Air Force has some real properties in each of the 50 States and the District of Columbia.

The acreage of land controlled in Nevada and Arizona, each with over two million acres comprised 61.5 percent of the total Air Force-controlled acreage in this country. Two other states (Florida and Utah) each have well over one-half million acres in use by the Air Force. The major part (90 percent) of the Air Force-controlled acreage in these four states is land from the public domain.

On the basis of cost, Table 29 presents the ten largest categories of Air Force-controlled real property in the United States. The comparisons are shown in Chart 6. The total cost of these ten major categories (\$10.3 billion) represented 74 percent of the Air Force total cost within the United States. Land operational facilities with \$2.2 billion accounted for the largest segment of total Air Force investment within the United States. Three other categories costing more than one billion dollars each were airfield pavements, family housing, and maintenance facilities. Operational facilities represented 16 percent, airfield pavements 12 percent, and family housing 10 percent of the total U. S. Air Force investment in real property.

Air Force-controlled properties in foreign countries, on the basis of cost, amounted to \$2.61 billion on 30 June 1966. This was about \$71 million more than for the previous year end. Of the Department of Defense investment in all real property in foreign countries, nearly 58 percent was under Air Force control on 30 June 1966. Air Force investment in possessions totaled \$356 million at the end of fiscal year 1966.

Foreign base rights of varying types held by the Air Force in foreign countries involved 1.96 million acres of land. This was 127 thousand less than the amount at the previous year end. In possessions the Air Force uses about 40 thousand acres.

Airfield pavements constitute the single largest Air Force investment category in foreign countries followed by troop housing and land operational facilities. In possessions, airfield pavements is the largest single category followed by family housing.

1/ Dwellings only (excludes trailers and detached facilities).

2/ Includes operating plants and distribution lines.

Section B - Military Construction in Progress

The cost of work in place, as reported by the military departments, on construction projects which had been started but not completed and transferred to the inventory, is shown by major geographical area in Table 30. The cost reported represents the cost of labor and materials incorporated on the construction projects. The Federal Government has a property interest in these projects--most of them are being built on Government-owned land.

Upon satisfactory completion of the project and acceptance by the military department, the total cost of the completed project is added to the real property inventory account of the respective department. On inclusion in inventory the amount is no longer shown as construction work in progress; thus, the amounts in Table 30 may vary considerably from year to year.

Table 30 -- Cost of Work in Place on Construction in Progress

3/ Excludes \$3,717 million cost of work in place on civil works projects.

PART II - MILITARY PERSONAL PROPERTY

Section A - Inventory of Military Equipment and Supplies in the Consolidated Supply Systems and in Stock Funds1. General

This section of the report deals with the inventories in the supply systems of the Department of Defense. For each of the four military services, and for the Defense Supply Agency, dollar data are presented in terms of the major purposes for which the supplies and equipment are held.

Secretary of Defense logistics guidance establishes an objective for acquisition of materiel related to the Approved Forces specified in the Five Year Defense Program. This objective is the quantity of an item authorized for peacetime acquisition to equip and sustain these U.S. forces in peacetime and in wartime, from D-Day through the period and at the levels prescribed by such guidance. Assets in excess of this level may also be retained, within prescribed limits, to support these forces and Specified Allied Forces, and for other retention objectives.

The inventories in the following tables are, therefore, stratified into those held for the Approved Force of the component, as well as economic retention stock, contingency retention stock, Allied Force retention stock, and potential DOD excess stock for which disposal action has not yet been initiated. Those stocks that have been earmarked for Military Assistance Programs although not, as of the date of reporting, delivered, are also shown. The inventories are also subclassified into broad commodity categories representing families of similar kinds of items.

Inventories are accounted for in the supply systems of the military

services and the Defense Supply Agency from time of acceptance until they have been issued to a using unit. The supply system inventories are those being held in the storage or warehousing facilities of these services for issue to the user. They constitute that segment of the overall materiel supply system which is defined in the Joint Chiefs of Staff dictionary as the "phase of military supply which extends from receipt of finished supplies by the military services through issue for use or consumption".

The stocks are physically located at depots, posts, camps, stations, and bases in the United States and possessions, and in foreign countries. They are stored in warehouses, open storage spaces, ammunition dumps, fuel tanks, etc.

Supply items which have been issued to the consuming military units, such as divisions, air-wings, and most ships, are not considered as assets of the supply system. These items are in the hands of the ultimate user and as such are carried in unit records until consumed, destroyed, captured, lost, or otherwise disposed of.

In this category, throughout the Department of Defense for the purpose of this report, are ships, complete aircraft, complete ICBM and IRBM missiles, and space vehicles which are generally considered to be operational weapons systems and not supply system items. The Navy and Air Force do not accept aircraft and these types of missiles into the supply system nor are they returned to the supply system for overhaul or modification, control being retained in operational commands. The Army follows a different practice for aircraft and maintains supply system inventories which are issued upon requisition the same as supply

items. To be consistent in this report, however, Army inventories of aircraft have been excluded from the supply system tables and are carried as "in-use"

Part II, Section B, of this report includes data on major items which have been issued from the supply system to the ultimate users and are still in the hands of the user. If such an item in a military unit becomes unserviceable, it is normally replaced by a serviceable item from the supply system. The unserviceable item (if of a repairable type) is returned to the supply system where it may be repaired and put back in supply channels or declared excess and disposed of.

Also not included in the supply inventory totals is the value of excess stocks for which disposal action has been initiated. Table 45 consists of the value of such stocks as well as excess and surplus stocks from other sources such as using units.

Stock Funds

Stock funds do not constitute a separate supply system. They are operational and financial systems employed by the military services and the Defense Supply Agency principally to facilitate financial control over consumption-type supply items for which there is recurring demand. The stock fund mechanism permits the Services to handle inventories of such continuous demand items on a replacement basis much as private business firms do when they replace stocks depleted by sales with new stocks purchased with the proceeds from such sales. Stock fund inventories for each military service and the Defense Supply Agency are shown separately in this section; however, they are also included, as a one-line entry, in the overall totals for the entire supply system of each military

service.

Reporting of Inventory Categories and Strata

Data representing the dollar value of inventories in the aggregate supply system, both the items which are financed by stock funds and those financed by appropriated funds, are shown for each of the military services and the Defense Supply Agency (stock fund only) in the numbered tables in this section.

Each of these tables shows the dollar amount of inventories in each major commodity category (groupings of similar kinds of supplies and equipment as reported by the services) and in each stratum (groupings according to the purpose for which the supplies are retained).

The stratification accounts in use by the services and DSA are uniformly prescribed by DOD Instruction 4140.18, and are (1) Approved Force Acquisition, (2) Approved Force Retention, (3) Economic Retention, (4) Contingency Retention, (5) Allied Force Retention, and (6) Potential Excess Stocks. These inventory accounts are defined as follows:

a. Approved Force Acquisition Stock is the value of assets allocated to the Approved Force Acquisition Objective, which is the quantity of an item authorized for peacetime acquisition to equip and sustain the U. S. Approved Force in peacetime and in wartime for the period and at the level of support prescribed by the latest logistics guidance issued by the Secretary of Defense. Stocks in this stratum held by one service are not required to be transferred to another service without reimbursement, but all other strata are subject to transfer without reimbursement.

b. Approved Force Retention Stock is the value of the assets allocated to the Approved Force Retention Level, which is the quantity, in addition to the Approved Force Acquisition Objective, that is required

to equip and sustain the Approved Forces from D-Day until production equals the rate at which the item is required.

c. Economic Retention Stock is that value of assets excess to the Approved Force Retention Level which it has been determined will be more economical to retain for future issue than to replenish by procurement.

d. Contingency Retention Stock is that value of assets excess to the Approved Force Retention Level which normally would be allocated to Potential DOD Excess but which, it has been determined, will be retained for possible contingencies for U. S. Forces.

e. Allied Force Retention Stock is that value of an item excess to the U. S. Approved Force Retention Level which is required to equip and sustain Specified Allied Forces to the degree and at the rate approved by the Secretary of Defense.

f. Potential DOD Excess Stock is that value of an item above all authorized retention levels of the reporting DOD component which is in process of screening for utilization, but for which final determination as DOD excess has not been made.

In addition to the stratified stocks shown above, the tables that follow show Undelivered MAP, which represents the value of assets for which military assistance grant aid orders have been received, but for which constructive delivery to the Military Assistance Program has not been made. Also shown, are unstratified stocks consisting of in transit stock, stocks in hands of contractors, and other stocks that are, for the time being, unstratified for some reason.

In transit stock is that owned by a DOD component, which is enroute

(1) from manufacturers or suppliers; (2) from United States depots to overseas commands or vice versa; (3) from United States depots to United States commands or vice versa; and (4) between United States depots; and which has not been received by the consignee. Accounting systems of reporting components may not always reveal these in transit or other stocks separately; instead these stocks may be stratified as appropriate by the DOD component.

2. Summary of Department of Defense Supply System Inventories (Tables 31 and 32)

During fiscal year 1966 the reported value of the military supply system inventories was increased by \$675 million dollars from \$36,986 million to \$37,661 million, inclusive of shipboard supplies. As has been stated, increased coverage of groups of items never before reported in these tables account for an increase in value of \$1,091 million so that the real change in the value of the supply inventories reported at 30 June 1965 is a decrease of \$416 million, bringing the value of those same inventories to \$36,570 million. The inventories shown include those of the Army, Navy, Marine Corps, Air Force, and DSA, and do not include the supplies of OSD and other Defense agencies which are carried in Tables 1 and 2 at a value of \$67 million.

In the totals shown here, the increase amounted to less than 2 percent. Stock-funded inventories increased \$523 million (almost 10 percent - this includes no added coverage) and appropriation-financed inventories increased \$152 million (one-half of one percent, including the additional coverage).

The net increase in stock fund inventories of the Department of

1/ Excludes excess stocks for which disposal has been authorized or initiated. These are shown in Table 45.

2/ Includes stocks in transit, stocks in hands of contractors, stocks temporarily in use, and other inventories that are not, as of the date of this report, stratified by each reporting component according to its accounting practice.

Defense is largely a reflection of increases in Army stock fund inventories which amounted to \$433 million. Those of other components all increased slightly as a result of activity in support of SEA operations.

Appropriated fund inventories increased in total, but Army inventories of appropriation-financed items increased about \$280 million, or about 3 percent, while Navy inventories showed a small decrease. Marine Corps appropriation-financed stocks decreased \$113 million, about 9 percent. Air Force stocks remained about the same. Again, we must note that these relationships do not take into account the increased coverage. On the 30 June 1965 basis, Army would have shown a \$400 million decrease, and Air Force a \$407 million decrease. DSA has no appropriation-financed stocks.

Table 32 shows the stratification of all stocks in accordance with the purpose for which held. Following changes in logistics guidance during fiscal year 1966, the stratification shown in this table differs somewhat from that shown for 30 June 1965, and direct comparison is not possible in most strata. In fiscal year 1965, the "Approved Force" stratum contained (sometimes inseparably) both the Approved Force Acquisition and the Approved Force Retention stocks. Comparison will be made on this basis. The concept of General Forces has been eliminated in the official logistics guidance and stocks formerly stratified to support them have been disposed of or retained for other purposes. Economic Retention stocks and Potential DOD Excess remain unchanged in character, but the former Contingency Retention stocks included those retained in support of Specified Allied Forces, now reported, by Army and Navy, separately, and comparison will be made on this basis.

As of 30 June 1966, Approved Force Acquisition stocks totaled \$23.6 billion and represented 70 percent of all stratified stocks. When the Approved Force Retention stocks are added, the Approved Force stocks total \$24.7 billion, 72.6 percent of all stratified stocks, as compared with 69.4 percent as of 30 June 1965. Since the Approved Force Retention stocks are, like other retention stocks and the Potential DOD Excess, transferable/disposable assets they are included with them for the purpose of measuring the size of transferable/disposable strata, now totaling \$10.3 billion, 30 percent of stratified stocks. To the total of stratified stocks (almost \$34 billion) are added over \$0.5 billion of Undelivered MAP stocks and more than \$2.7 billion of Unstratified stocks, bringing the grand total of DOD supply system stocks to \$37.2 billion.

Economic Retention stocks represent 12.3 percent, Contingency and Allied Force, 5.4 percent, and Potential DOD Excess, 9.6 percent of stratified stocks. These compare with 10.7 percent, 3.4 percent, and 10.3 percent as of 30 June 1965.

For DOD as a whole, Undelivered MAP stocks (mostly Army) have increased more than \$250 million to a total of \$533 million as of 30 June 1966.

At the end of fiscal year 1966, the Army owned 32 percent of the \$37.2 billion total military supply system inventories, with Navy (including Marine Corps) owning 33 percent, and Air Force owning 30 percent. DSA accounts for 5 percent (Table 32 and Chart 7). Not included in this table are about \$67 million of stock owned by Defense agencies (other than the DSA) which are retail or in-use stocks and not

Chart 7

¹/ Includes properties of the Office, Secretary of Defense and other Defense Agencies.²/ Includes \$494 million Shipboard Supplies not included in chart of Navy Supply System inventories.

considered part of the Military Supply System, nor the \$494 million of Shipboard Supplies included in Table 31.

Appropriated fund inventories accounted for about 84 percent of the total inventories, and stock fund inventories for the remaining 16 percent, up from 14 percent last year. The value of appropriated fund inventories of \$31.8 billion is divided among the departments as follows: Army accounts for 30 percent, Air Force for 34 percent and Navy (including Marine Corps) for 36 percent. Of the \$5.9 billion in stock fund inventories, however, Army accounted for 42 percent; Navy, together with the Marine Corps, accounted for 19 percent; Air Force accounted for 5 percent; and DSA for 34 percent (37 percent last year).

The numbered tables that follow show the stratified supply system inventories of each of the DOD components by the commodity categories that each component uses in accounting for its stocks. Since there are some 150 of these categories or classes of items covering the appropriation-financed and stock funded inventories of the several components, differing in nomenclature as well as in content, it has not been practical to prepare a consolidated DOD table using each of them. In an effort, however, to reduce the consolidation to manageable proportions, there has been established a set of 23 standard categories of broad application into which the 150 service categories have been aggregated. The assignment of service categories to the standard grouping has been done with the advice of service personnel, but it is not perfect since some of the service categories contain both principal items and some of the secondary items that support them, while others, for service reasons, join items of more than one standard category. Somewhat

126 FEDERAL REAL AND PERSONAL PROPERTY INVENTORY

experimental in nature, the aggregation is intended to provide a brief summary overview of Defense stocks, by broadly comparable groupings, for management purposes.

^{1/} These standard categories have been developed to facilitate the aggregation of the many service commodity categories into approximately comparable groupings at the Department of Defense level.

3. Army Supply System Inventories (Table 33)

The total value of Army supply system inventories on 30 June 1966 was reported to be \$11.9 billion, of which inventories of the Army Stock Fund accounted for 20 percent, and appropriated fund inventories for 80 percent. The \$11.9 billion represents a net increase of \$713 million, or about 6 percent, in the total of Army supply inventories, during the fiscal year, but on the prior basis, i.e., excluding the increased coverage, the total increase, for both appropriation-financed and stock fund inventories was only \$33 million. This Army total represents \$8,311 million of principal items financed from the Procurement of Equipment and Missiles, Army (PEMA) appropriation; \$1,114 million of secondary items, also financed from the PEMA appropriation; \$28 million of secondary item inventories financed by the Operation and Maintenance, Army (O&MA) appropriation; \$18 million of inventories held at overseas posts, camps, and stations not covered by the Army's financial inventory accounting (FIA) system; \$25 million of secondary stocks in the hands of U.S. Property and Fiscal Officers for the National Guard Bureau, making a total of \$9,496 of appropriation-financed stocks; and \$2,444 million of stock-funded inventories.

Table 33 presents a stratification of these inventories, which, for appropriation-financed inventories are also presented by materiel category. The stock-funded inventories are included as a one-line entry, being presented in detail in the table following.

The foregoing inventories, as stated, do not include complete aircraft, although they do include aircraft parts and components. This procedure is adopted, although the Army actually has \$171 million of

1/ Excludes excess stocks for which disposal has been authorized or initiated. These are shown in Table 45.

2/ For secondary items includes stocks in transit, stocks in hands of contractors, and other stocks that are not, as of the date of this report, stratified.

3/ Relatively small amounts of material examined for M&P but undelivered are included in stratified inventories.

4/ Secondary items in the hands of U. S. Property and Fiscal Officers.

Chart 8

SUPPLY SYSTEM INVENTORIES
(Including Stock Funds)

DEPARTMENT OF THE ARMY

AS OF 30 JUNE 1966

BILLIONS OF DOLLARS

* Includes \$506 million of undelivered MAP stocks.

complete aircraft in store, to follow Navy and Air Force practice which is to issue all complete aircraft to units of the operating forces rather than to retain them in the supply system. Accordingly, to permit comparison with Navy and Air Force, Army stocks of these weapons are reported with other weapons and military equipment in use in Section B of Part II of this report and as appropriate in Table 1.

Army supply system stocks are stratified as follows: 81 percent of the stratified stocks are allocated to Approved Forces, both Acquisition and Retention, as opposed to 69 percent a year ago, 13 percent is in the Economic, Contingency, and Allied Force Retention stocks, and 6 percent is Potential DOD Excess, about the same level for excess as that recorded a year earlier. Army Undelivered MAP stocks exceed \$500 million as compared with \$272 million last year.

Army Stock Fund Inventories (Table 34)

Included in the Army supply system inventories shown in Table 33 are more than \$2.4 billion in the Army Stock Fund, over 20 percent of the total. Inventories under stock fund increased \$433 million during the fiscal year. A comparison of the present inventories with those of a year ago, by category, shows that every category except Weapons and Fire Control materiel increased in value of inventory, largest gains being registered in the Air, Electronics, and Ground Forces Support materiel categories. Stocks owned by the Command Channel stock fund divisions, CONARC, USARPAC, USARAL, USAREUR, and USARSO, have been distributed into the 13 materiel categories shown, which are standard for all stock fund divisions.

At the end of the year, 72 percent of the stratified stocks were

1/ Stocks owned by Command Channel stock funds have been distributed by category in the same manner as those of other divisions.

2/ Excludes excess stocks for which disposal has been authorized or initiated. These are shown in Table 45.

3/ Consists of in transit stocks, stocks with contractors, temporarily in use, and other unstratified stocks.

4/ Includes stocks of the Defense Supply Service.

allocated to Approved Forces (Acquisition and Retention), 9 percent to Economic, Contingency, and Allied Force Retention, and 19 percent to Potential DOD Excess.

4. Navy Supply System Inventories (exclusive of Marine Corps)(Table 35)

The Navy supply system inventories totaled \$10.9 billion at the end of fiscal year 1966, an increase of only \$7 million from 30 June 1965. These figures exclude, as noted in Table 35, the \$494 million of Shipboard Supplies that are included in Table 31, since these are not considered part of the "managed" supply system. The inventories, totaling \$10,855 million, are divided into \$915 million, or 8 percent of the total, in stock fund inventories, and \$9,940 million, or 92 percent, in appropriation-financed inventories. The latter actually decreased by about \$32 million during the year, whereas stock fund inventories increased \$39 million. In this report, as in the previous year's, the consumable ordnance materiel which is periodically being re-worked and rotated between shipboard storage and tidewater maintenance facilities is included as in-store. It is under management control though not financial inventory control reporting.

Among the appropriation-financed in-store inventories, the larger decreases were in the weapons, major ship equipment, aircraft engines, construction equipment and electronics cognizance classes.

Increases were registered in the secondary and consumable classes of ammunition, weapons and ships' parts, and aeronautical material. This year, Missiles and Missile Material, and Mines and Related Equipment are reported separately from the Ammunition category. Emphasis on Polaris systems increased the Special Weapons Material classes, both

1/ Excludes excess stocks for which disposal action has been authorized or initiated. These are included in Table 45.

2/ Unstratified stocks shown for each category represent, with the exception of \$21,375 thousand of miscellaneous stocks, inventory in transit between storage locations.

principal and secondary, by about \$75 million. During the year, Approved Force stocks (Acquisition and Retention) were increased \$130 million, but Economic, Contingency, and Allied Force Retention stocks together were about the same, while Potential Excess stocks were increased by \$242 million. General Force stocks, amounting to \$321 million were eliminated, and unstratified stocks were reduced by \$73 million.

Of the total stratified stocks at the end of fiscal year 1966, 71 percent were classified as Approved Force (Acquisition and Retention), 22 percent as Economic, Contingency, and Allied Force Retention, and 7 percent as Potential DOD Excess stocks. Total transferable/disposable stocks are 36 percent of stratified inventories. Stocks earmarked for MAP delivery by Navy still represent a small proportion of total stocks held, as compared with Army which has substantial inventory of this sort, although this year their value is about ten times that held last year. Unstratified stocks, chiefly in transit, decreased about 6 percent during the year.

Navy Stock Fund Inventories (exclusive of Marine Corps)(Table 36)

Included in the total of \$10,855 million of Navy supply system inventories are \$915 million financed through the Navy Stock Fund. This represents an increase of about \$40 million (4 percent) from the previous year, as most categories showed gains in in-store inventories. Exceptions occurred in the Ships', Submarine and Base Repair Parts, Ordnance Repair Parts, and Electronic Repair Parts categories, where relatively small decreases took place.

On 30 June 1966, the stratified stock fund inventories were

2/ In transit; stocks in hands of contractors and other miscellaneous inventories are stratified as Approved Force Acquisition stocks.

Chart 9

SUPPLY SYSTEM INVENTORIES
(Including Stock Funds)
DEPARTMENT OF THE NAVY

AS OF 30 JUNE 1966

BILLIONS OF DOLLARS

* Includes \$27 million of undelivered MAP stocks.

distributed as follows: Approved Force, 85 percent; Economic and Contingency Retention, 6 percent; and Potential DOD Excess stocks, about 9 percent.

5. Marine Corps Supply System Inventories (Table 37)

The value of Marine Corps supply system inventories at the end of fiscal year 1966 totaled \$1.4 billion, a decrease of almost \$100 million during the year.

Principal categories in which reductions took place were the Ammunition, Support Vehicle, Communications-Electronic principal items and Ordnance Equipment principal items. The largest single offsetting factor is the increase in in-transit stocks, while smaller increases occurred in the Guided Missile principal item category and in some secondary item categories.

As of 30 June 1966, 92 percent of the stratified stocks in the Marine Corps supply system were classified as Approved Force stocks (Acquisition and Retention). About 3 percent is stratified as Economic and Contingency Retention stocks, and 5 percent as Potential DOD Excess.

Marine Corps Stock Fund Inventories (Table 38)

Marine Corps Stock Fund inventories amounted to \$219 million on 30 June 1966, about 16 percent of Marine Corps total supply system inventories, and an increase of about \$14 million during the year. This increase, however, is attributable entirely to the increase in unstratified stocks, some of which were included in the stratified stocks last year. For this reason, stratified stocks are less this year.

As in the case of appropriation-financed inventories, Approved Force stocks (Acquisition and Retention) make up the largest part of

Chart 10

SUPPLY SYSTEM INVENTORIES
(Including Stock Funds)

MARINE CORPS

AS OF 30 JUNE 1966

BILLIONS OF DOLLARS

Marine Corps Stock Fund stratified inventories, almost 68 percent.

Economic and Contingency Retention stocks account for 6 percent, while the Potential DOD Excess represents 26 percent of the total of stratified stocks.

6. Air Force Supply System Inventories (Table 39)

Air Force supply system inventories on 30 June 1966 were valued at \$11.0 billion, an increase of only \$24 million from the figure reported a year earlier. About 2.5 percent of this was financed by the Air Force Stock Fund, the remainder of the inventory being appropriation-financed.

The small increase in Air Force stocks, as has been explained, reflects increased reporting coverage, so that the actual reduction in stocks on the 1965 basis would have been some \$387 million. This increased coverage (see page 2) consists of cryptologic equipment, special projects and accounts, and reparable wearout stocks. Largest increases are seen in Aircraft and Missile Engines, Aircraft Replenishment Spares, and Missile, Electronic, and Base Maintenance principal items, while decreases occur in the Ammunition and Missile Spare categories, and in Base Funded and Base Held stocks. Unstratified stocks have been reduced over \$70 million, in total.

Of the total of Air Force stratified stocks, 64 percent are now allocated in support of Approved Forces, while Potential DOD Excess has been reduced from 18 percent to 15 percent. Retention stocks now amount to 21 percent.

Air Force Stock Fund Inventories (Table 40)

The value of Air Force Stock Fund inventories at the end of fiscal year 1966 was \$278 million, increased about \$20 million during the year.

2/ Consists chiefly of stocks in transit.

Chart 11

SUPPLY SYSTEM INVENTORIES
(Including Stock Funds)

DEPARTMENT OF THE AIR FORCE

AS OF 30 JUNE 1966

BILLIONS OF DOLLARS

All categories of materiel under this stock fund increased a little with Aviation Fuels accounting for the largest share. As in most stock fund operations, the value of in-transit stocks increased as pipelines extended.

On 30 June 1966 stratified stocks consisted almost entirely of those allocated to the Approved Forces, the only long supply stocks in the Air Force Stock Fund consisting of a few clothing items.

7. Defense Supply Agency Supply System Inventories (Table 41)

The value of Defense Stock Fund inventories as of 30 June 1966 totaled \$1,994 million, an increase of \$17 million for the year. During the year, sales exceeded receipts at standard price by \$107 million, transfers to property disposal were \$39 million and net issues without reimbursement were \$1 million. These were more than offset by net capitalizations of \$55 million and material returns of \$120 million. On the basis of stratified stocks, comparison with 30 June 1965 shows that the single decrease occurred in the clothing and textiles category (off \$187 million). Subsistence was up \$62 million; construction supplies, \$14 million; medical material, \$16 million; industrial supplies, \$6 million; and general supplies, \$12 million. Electronic supplies inventories were unchanged. In the clothing, industrial, construction, and electronic supplies sales exceeded receipts; for medical, subsistence, and general supplies this was not so.

Table 41 and Chart 12 show the stratification of the inventory of the Defense Supply Agency as of 30 June 1966. This year, in-transit stocks, those with contractors, those temporarily in use, and other stocks are stratified against the Approved Force (PTFMR Acquisition

and Retention) and, to a lesser degree, Economic Retention strata. These stocks, principally in-transit, are valued at \$109 million as of 30 June 1966, more than 50 percent increased over last year, reflecting the long pipeline to SEA. Total stocks are stratified 68 percent in support of Approved Forces (Acquisition and Retention), 18 percent to Economic Retention, and 14 percent to Potential DOD Excess. This stratum held 23 percent a year earlier, reflecting transfers to property disposal.

Section B - Personal Property Other Than Supply System Inventories

This section of the report covers personal property owned by the Department of Defense other than materiel in the supply system inventories. It includes various types of personal property, as follows:

1. Weapons and Other Military Equipment in Use

This category of equipment generally comprises items of materiel assigned to using units and includes all major weapons and supporting equipment. The equipment may have been issued from the supply system inventories, at which time accountability is picked up by the using unit or (as in the case of aircraft, ships, etc.) it may have been purchased from a manufacturer, military or private, for direct shipment to a using unit.

Quantitative property records are maintained on major items in use until the item is destroyed, lost or otherwise disposed of; minor and consumable type items are not maintained on property records since they are assumed to be consumed at time of issue. In addition to quantitative records, the Navy and Air Force maintain monetary accounting records of the principal equipment in use. Army derives statistical values of such property by periodically pricing-out quantities of items.

The total value of this type of equipment which had been issued or assigned to using units at the end of fiscal year 1966 was \$87.6 billion, an increase of \$2.7 billion over the value at the end of fiscal year 1965. Because this category includes the more costly types of military items, it constitutes by far the largest element of the total property of the Department of Defense, and one which has been steadily rising in value, as the more expensive modern weapons are added. Since active fleet

ships are included, about 36 percent of it is located outside the United States.

a. Army

As of 30 June 1966, Army reported the value of weapons and other military equipment in use at a total of \$9.6 billion dollars, as compared with \$9.4 billion as of 30 June 1965, an increase of \$215 million. This equipment consists of aircraft (\$1,346 million, up \$125 million during the year), guided missiles (\$1,922 million, off \$243 million), tanks and other combat vehicles (\$1,653 million, off \$283 million), tactical and support vehicles (\$1,812 million, up \$206 million), artillery weapons, small arms, and chemical weapons (\$420 million, up \$61 million), and other major items, primarily electronics and communications equipment (\$2,476 million, up \$349 million). As has been mentioned, the value of aircraft in use includes complete Army aircraft, to the value of \$171 million. Complete non-strategic missile systems, valued at \$680 million that are in Army depots are now shown in the supply system inventories, more than accounting for the lessened value of missiles in use, above.

b. Navy

The value of weapons and other military equipment in use as of 30 June 1966 is reported by the Navy to total \$42.9 billion, an increase of \$1.7 billion during the fiscal year. Combatant ships, service craft, aircraft, missiles, aircraft ground support equipment, and Marine Corps equipment are included.

The value of Navy ships, both in the active and inactive fleets, accounts for \$29.1 billion of this total, an increase of \$1.4 billion during the year. Of this value, \$27.1 billion represents the valuation

placed upon ships that have been completed and commissioned and \$2.0 billion represents work in place on those still undergoing construction or conversion.

Service craft, such as Utility Landing Craft, Minesweeping Boats, Open Lighters, Floating Derricks, and Harbor Tugs, were valued at \$902 million, up slightly from last year.

Navy aircraft as of 30 June 1966 were reported to be valued at \$10.2 billion, a decrease of \$0.3 billion during the year largely owing to SEA losses. Also reported to be in use was aircraft maintenance support equipment valued at \$780 million, a small increase over last year.

Complete missiles, valued at \$1,095 million as of 30 June 1966, are reported by Navy as being in use, an increase of \$356 million over the previous year. This is exclusive of any of the missile components reported in the supply system.

Equipment assigned to Fleet Marine Force units was reported at \$680 million, an increase of \$189 million, while other Marine Corps military equipment amounted to \$170 million, an increase of \$29 million.

c. Air Force

Weapons and other military equipment in use are reported by Air Force to be valued at \$35.1 billion, an increase of \$791 million over the value reported as of 30 June 1965. Included are aircraft, valued at \$27.1 billion, an increase of \$816 million; missiles, valued at \$1.1 billion, a decrease of \$54 million; ground communications and electronic equipment with an estimated value of \$2.5 billion; vehicles, valued at \$900 million; and other military equipment - most of it located at Air Materiel Areas - \$3,487 million.

2. Plant Equipment (Tables 42 and 43)

This is personal property of a capital nature, including machinery, equipment, furniture, vehicles, machine tools, and accessory and auxiliary items for manufacturing or administrative use. Prior to 1964, this property was owned by the military departments whether it was in use at military-owned installations or at 'private contractors' plants, or was held in an idle status in departmental industrial equipment reserves. During fiscal year 1964, the Defense Industrial Plant Equipment Center (DIPEC), an element of the Defense Supply Agency, located at Defense Depot, Memphis, Tennessee became operative. DIPEC has management responsibility for idle industrial plant equipment within its scope, and it controls the allocation and re-utilization of such equipment. The military departments and DSA itself, for equipment used in its manufacturing processes, retain control over IPE in active use and in mobilization packages. DIPEC, however, maintains the records of much of the equipment and has contributed much of the statistical information appearing in Tables 42 and 43.

Included in these tables are the plant equipment and property owned by the Defense Supply Agency, reported separately, as well as that of the Advanced Research Projects Agency, which is included with the equipment of the military department that is managing and using it.

The total value (acquisition cost) of plant equipment reported by DIPEC and the military departments as of 30 June 1966 was \$10.4 billion, an increase of a little over 8 percent since a year ago.

To facilitate reporting, and to provide more meaningful categories, a change was made this year in the definitions of the types of plant

1/ Metalworking machinery reported to the Defense Industrial Plant Equipment Center. That shown for the military departments is active equipment owned by them; that shown for DSA is active DSA-owned equipment and idle plant equipment assigned to DIPEC.

equipment to be reported. Metalworking machinery (see Table 43) remains unchanged in description, but the value shown is the value of metalworking machinery that has been reported by the Army, Navy, Air Force, and DSA to the Defense Industrial Plant Equipment Center, and the value as of 30 June 1966 is the value as carried on the records of that organization, regardless of location or custody. Similarly, the value of other industrial plant equipment (IFE) shown is that on the DIPEC books at 30 June, rather than the value of a selected, and outmoded, list of "other production equipment", as heretofore. These two categories now represent the worldwide inventory of IFE carried on DIPEC records; other items of equipment are shown in the final column.

The result of these changes in criteria is to reduce slightly the value of metalworking machinery reported, but to greatly increase the scope of the second column which now embraces a wide range of IFE not formerly covered in the arbitrary, selected list.

For these reasons, no comparison is made with the inventory, by type, at the close of the preceeding year. Comparison can, however, be made in total. The Army plant equipment inventory increased about 10 percent during the year, the Navy, less than 5 percent, the Air Force, about 16 percent, while the DSA inventory decreased about 13 percent. The overall DOD increase is owing to acquisition of new equipment, but the movement from DSA to the military departments is owing to activation of idle tools from the DIPEC-controlled idle inventory to active use by the departments to meet current production needs.

The inventory of metalworking machinery, by Production Equipment Code, is shown in Table 43.

3. Inventories Held in Industrial Funds (Table 44)

Reported as personal property of the Department of Defense are inventories, consisting of raw materials, supplies, and work-in-process, held in all industrial funds. Use of industrial funds, authorized by Section 405 of Title IV of the National Security Act, permits the financing of industrial or commercial-type activities and the development of production costs to be used as a basis for charging the appropriations of customers for the products or services furnished to them by the activity financed by the fund. For financial details of the Department of Defense Industrial Funds, see the annual report, "Working Capital Funds of the Department of Defense"

As of 30 June 1966, 62 activities in the Department of Defense were operated under industrial fund charters. The Army operated 20; the Navy, 38, one of which is a printing activity located in 33 separate plants; the Air Force, 3 (one of which is a printing activity located in 10 different plants; another is a laundry and dry cleaning activity operated at 40 installations); and DSA, 1.

The total inventories, consisting of raw materials, supplies and work-in-process, held in all industrial funds of the DOD amounted to \$288 million on 30 June 1966, an increase of \$77 million in the year.

4. Excess, Surplus, and Foreign Excess Personal Property (Table 45)

This is personal property on which disposal action has been initiated by a military department; it is no longer on supply system records but on the property disposal records. It is considered an element of DOD personal property until actually disposed of through sale, donation, or transfer

DEPARTMENT OF DEFENSE

(Thousands of Dollars)

DOD Component	Total Inventories	Domestic <u>1/</u>	Foreign
<u>Department of Defense - Total . . .</u>	<u>\$2,650,350</u>	<u>\$2,525,853</u>	<u>\$124,497</u>
Army	332,865	259,742	73,123
Navy (Including Marine Corps) . .	1,007,767	980,305	27,462
Air Force	1,250,410	1,226,498	23,912
Defense Supply Agency	59,308	59,308	-

1/ Includes the United States, Puerto Rico, and the Virgin Islands.

to some other agency. This excess materiel may have emanated either from supply system inventories or from equipment in use; in either case, accountability is dropped at the time of transfer to disposal channels and picked up in the property disposal account, shown in Table 45.

The amount of property in disposal channels as of 30 June 1966 amounted to \$2,650 million, which is \$891 million less than was in this category a year ago. The decrease in domestic excess and surplus property (covering United States, Puerto Rico, and the Virgin Islands) amounted to \$848 million; foreign excess decreased \$43 million.

Of the DOD total of \$2,650 million on hand, the Navy (including Marine Corps) accounted for \$1,008 million, or about 38 percent of the DOD total; Army, \$333 million, 13 percent; and Air Force, \$1,250 million, 47 percent. About \$59 million of excess and surplus or about 2 percent of the total, was reported by the Defense Supply Agency. Domestic inventories account for 95 percent of the total, while foreign make up 5 percent.

As far as the reporting components are concerned, the value of Army excess, surplus, and foreign excess property on hand at the end of fiscal year 1966 was about \$178 million less than a year earlier, while the value of such Navy property was about \$494 million less, and Air Force property of this kind decreased \$192 million. DSA property was reduced about \$28 million.

As the footnote to Table 45 indicates, the data shown do not include combatant ships which are in process of disposal, because combatant ships are not considered "personal property" under the terms of the statutes governing disposal of Government property. The value of those ships

that have not been disposed of amounted to \$242.3 million as of 30 June 1966. This value is included in Section B.1, above, devoted to Weapons and Other Military Equipment in Use, and in Tables 1 and 2.

5. Government-Provided Material (Other than from Supply System)

This is material which has been purchased by the Government from one contractor and furnished to another, generally for incorporation in an end item being fabricated, or has been acquired by the manufacturer under the terms of his contract for Government account for the same purpose. Examples of such equipment are aircraft engines, electronic systems, and other parts which are furnished to a contractor by procurement offices for incorporation in an airplane, ship, or other weapon. These items do not go through the supply system and therefore are not included in the "Stocks in Hands of Contractors" shown in supply system tables.

When the end item has been delivered, the value of these components is included in the value of the end item. As of any given time, however, substantial dollar values of this Government-owned property are in the contractor's hands awaiting further fabrication. Accountability for such property is vested in the contractor in terms of item and control accounts. The amount of such property in the hands of contractors is reported in Table 1 under the caption of Government-provided property. It has been growing, as the procedures provided under the Armed Services Procurement Regulation for reporting the value of this property which are incorporated into new contracts or extensions of existing contracts, are extended to a greater number of contracts.

Section C - National Industrial Reserve1. General

Public Law 883, 80th Congress, the "National Industrial Reserve Act of 1948," provides for establishing "adequate measures whereby an essential nucleus of Government-owned industrial plants and a national reserve of machine tools and industrial manufacturing equipment may be assured for immediate use to supply the needs of the Armed Forces in time of national emergency or in anticipation thereof."

The properties still owned by the Government are managed by the General Services Administration (as successor to the Federal Works Agency) under general policies established by the Secretary of Defense. Since the Department of Defense has a contingent claim and production priority rights in all the National Industrial Reserve plants, including those which GSA has disposed of or leased with a National Security Clause, data on these are included in this section of this report. However, none of the properties in this Reserve have been included in the totals for real property (Part I) or metalworking equipment (Part II, Section B) of this report because they are held by the General Services Administration.

2. Plant Reserve

The National Industrial Plant Reserve contained 11 facilities as of 30 June 1966, the same number as at the end of the preceding year. Only portions of some of the facilities are being set aside for use by the military services. The sponsoring military department and status of these plants at the end of fiscal year 1966 were:

<u>Sponsor</u>	<u>Total</u>	<u>Sold With Recap- ture Clause</u>	<u>Under Lease or Contract</u>
<u>Total</u>	<u>11</u>	<u>10</u>	<u>1</u>
Army	11	10	1
Navy	--	--	-
Air Force	--	--	-

In keeping with Department of Defense policy to release as many Reserve Plants as possible to private corporations, 10 of the 11 plants have been sold subject to appropriate restrictions and recapture clauses and one is being operated under lease or contract agreement.

The status of the 11 plants by category of product is shown in Table 46. The plant still owned by the Government produces jewel bearings.

3. Equipment Reserve

The National Industrial Equipment Reserve on 30 June 1966 contained 9,172 items of metalworking machinery and 849 nonmetalworking items of industrial production equipment. The original acquisition cost of the 9,172 items of metalworking machinery was \$79.3 million and of the 849 other industrial production items, \$1.6 million.

Under existing legislation these tools are available for redistribution to essential civilian industry, Armed Services, qualified nonprofit educational institutions and training schools, and to other Federal agencies.

Table 46 -- National Industrial Reserve Plants

PART III - PROGRESS IN MANAGEMENT, RECORDING, AND REPORTING INVENTORIES

Section A - Office of the Secretary of Defense

Department of Defense-wide policies, programs, and projects developed or continued in fiscal year 1966, all aimed at improvement in the management, recording, and reporting of inventories, are summarized below.

MAJOR POLICY AND PROCEDURAL IMPROVEMENTS

Financial Management Improvement Program

Project PRIME (Priority Management Efforts), started in October 1965, has to do primarily with resources that are financed under operations and maintenance appropriations, and looks toward the integration of programming, budgeting, and management accounting for materials, as well as men, services, and money used by organization units. The goal is to charge an organization with the expenses, including spare parts of consumable materiel, now carried in organization accounts. It is planned to so purify appropriations that expense items are associated with operating, rather than procurement, appropriations, and to do this it is planned to extend working capital fund use to include all consumable materiel at both wholesale and retail level.

The basic concepts of Project PRIME are being tested at Fort Carson, Colorado; Naval Air Station, Quonset Point; and Laughlin AFB.

Supply Management Review Program

In early 1965, the Assistant Secretary of Defense (Installations and Logistics) announced a decision to establish a Supply Management Review Program to appraise supply management policy problems and to serve as an important input source for more uniform DOD-wide supply policy in the major problem areas. A working group was created to develop and recommend

means for carrying out this new program. In October 1965, a Supply Management Review Program Planning Report was completed by the working group, and was favorably received by the Assistant Secretary.

Subsequently, arrangements have been made for a small number of supply specialists in Installations and Logistics to manage this program. Simultaneously, the military departments have recognized the merits of such an effort and have made internal organizational and staffing arrangements to deal with such common supply problems as are presented in the October 1965 Planning Report. Examples of these problem areas include the computation of peacetime and wartime supply levels, knowledge and control of item assets, and measurement and analysis of supply effectiveness. Currently, action is being taken to select and assign the first topics for detailed DOD-wide review and development of improved policy and procedures.

Progressive Refinement of Integrated Supply Management (PRISM)

This study of retail management on the part of the military departments for items assigned to DSA was designed to review existing relationships between the departments and DSA in the light of current concepts and to develop or revise procedures, as required. The PRISM report, which resulted from this study, was, after full consideration, approved early in the year, and designated as an immediate and short-term plan which would form the base for an improvement program in materiel management.

It was announced that the PRISM report would be implemented as a "growth" document, one to which further contributions and refinements could be made as the implementing means for accomplishing the goals of the PRISM recommendations were developed.

Implementation was approached through two avenues. Certain/recommendations were identified to require coordinated implementation actions that must be undertaken by the Services/DSA in concert; others were identified and authorized for unilateral Service/DSA implementation on time schedules acceptable to the originator.

An example of the first technique is the revision of the Management Data List (MDL). The PRISM report recommended that MDLs, which are those parts of the Federal Catalog system that provide management data rather than identification data, be published by each of the military services, drawing on DSA Supply Centers for data or DSA items. An MDL task group, with representatives from the Services, DSA, and GSA, was formed to determine which MDL data elements must be published and which computer retained, to standardize the MDL format, and to recommend actions for inclusion in the revision of the lists and of the Manual.

During fiscal year 1966, the group developed a system of catalog data transmission and a publication format. In this process, it was found possible to eliminate many publication data field titles, publication codes, and catalog management data notification card codes. The new system will require about 18 months for implementation.

Retention and Transfer

DOD Directive 4100.37, "Retention and Transfer Policy", dated 15 September 1965, provided both new and refined definitions of the major purposes for which materiel may be held. DOD Instruction 4140.18, "Management and Transaction Reports for Materiel Assets", dated 15 December 1965, which revises a previous Instruction, prescribes the reporting of supply inventories in terms of the major purposes of the retention and

transfer policy. The inventories reported in Part II of this report have been stratified in accordance with this Instruction.

Mobilization Reserve Study

A study is in progress to determine the policies and practices which should be applied Defense-wide in establishing and managing mobilization reserve stocks of secondary items. The major objectives of the study involve a review of current logistics guidance and item selection criteria and the development of uniform policies and methods for the computation of secondary item mobilization gross and net requirements. The current target date for completion of the study is 15 October 1966.

Identification, Control, and Utilization of Short Shelf-Life Items

The short shelf-life program, which was started in the preceding year with the preparation of a study by a joint DOD/GSA Task Group, continued satisfactorily toward the implementation of a uniform system for controlling short shelf-life assets. An Addendum Report was prepared by the original study group which had been reconvened (1) for the purpose of expanding to a broader coverage the proposed DOD Instruction that had been submitted with the basic report of the preceding year, and (2) to analyze and respond appropriately (in the proposed Instruction) to the General Accounting Office report of March 1965, "Supply Management of Paint and Other Short Shelf-Life Items".

In their follow-on session, the joint study group developed many additional facts which contributed significantly to the full understanding of the shelf-life problem, and because of this additional insight into the matter, the proposed DOD Directive was redrafted in its entirety, and recirculated for coordination.

Closely associated with the general shelf-life problem is the specific problem of the medical stockpile maintained by the Public Health Service. The use and rotation of this stockpile of Civil Defense medical supplies have been identified as major problems in which the entire Federal Government has an interest.

An interagency committee, chaired by GSA, was organized to acquire a full understanding of the problems which now discourage cross-servicing of the medical items in that stockpile; DSA has been appointed to represent Defense. The DOD can be of assistance in utilizing the current short-life stockpile items and in contributing to the long-term solution to the problem.

Phased Provisioning

Phased provisioning requires that quantity procurement of selected high-cost items be deferred until later stages of production of weapons, systems, and equipment, thereby enhancing the ability to predict actual requirements more reliably. Buffer stock quantities of these selected items are held by the contractor as in-production materiel to serve as back-up support in case a demand occurs while phased provisioning is in effect.

During the past three years DOD provisioning activities have been working with prime contractors to set up definite contract and cost terms, and to perfect government-contractor provisioning relationships and operating techniques.

Procurement programs to which phased provisioning has been applied, or is planned, include the J-79-15 engine (for the F-4 aircraft), the C-141A aircraft and its TF-33 engine, the F-111A aircraft and its TF-30

engine, the C-5A aircraft and its TF-39 engine, and the A-7A aircraft.

The C-141A was the first major program to which phased provisioning was applied. To date, procurement savings of \$4.3 million have been identified. An additional \$4.3 million potential savings remains, pending final decisions to buy or not to buy selected phased provisioning items. The dollars saved have been used to meet other unfunded requirements.

Initially, \$8.3 million worth of phased provisioning items have been identified for the F-111A program, and \$0.6 million for the A-7A. Negotiations are in progress for the C-5A program.

UTILIZATION

DOD Utilization Program

This program of full utilization of available assets continues to be administered by DSA through its Defense Logistics Services Center (DLSC) where the requirements of the military services are matched against potential excess and other releasable assets of all parts of the DOD. By this, and by other means, DOD utilization amounted to \$1,596 million in fiscal year 1966, an increase of 64 percent over 1961 and of 9 percent over 1965. Transfers to Civil Agencies and MAP amounted to \$604 million, an increase of 53 percent over the preceding year.

DOD Donation Program

The Federal Property and Administrative Services Act of 1949, as amended, provides for donation of surplus personal property to state governmental agencies through the Department of Health, Education and Welfare (DHEW), accredited Service educational activities, and public airports, public bodies and other donees authorized by GSA, to be used for health, education and civil defense purposes, including research.

Dollar value of surplus property donated to authorized recipients during the last fiscal year amounted to \$285 million, of which \$264 million was to state governments through DHEW. Donations have been at about this level for the past three years. For fiscal year 1966, donations were expected to run somewhat higher, but increased utilization within DOD and decreased generation of excess kept the level constant.

DOD Surplus Sales Improvements

The Department of Defense has inaugurated a series of improvements or innovations aimed at improving buyer participation and realizing an optimum return from sales of surplus property. The following are a number of the most significant actions.

- a. The development and use of a DOD centralized bidders list. The use of a computerized DOD process not only identifies potential buyers, but also identifies the types and classes of surplus property of interest to such buyers in the geographical areas in which they wish to participate. The list is automatically purged of nonparticipating registrants.
- b. The development and use by all Defense Surplus Sales Offices of standard catalog formats, sales conditions, and methods of sale.
- c. The mechanical centralized selection of bidders in Zip Code sequence, for the purpose of printing and distributing sales catalogs containing surplus personal property being sold in the 48 contiguous states.
- d. The adoption of "guaranteed description" sales in lieu of the formerly used "caveat emptor" type of sale.
- e. The acceptance of personal checks, in addition to cash, money

orders; certified checks or bid bonds, in bidding for surplus personal property.

f. The adoption of improved market development procedures, and merchandising techniques, to sell surplus personal property. These functions are promoted by the use of merchandising specialists and a market research activity which have at their disposal the sales history of specific items, computed and maintained by an automatic data process.

ITEM MANAGEMENT

Item Reduction Program

The Inventory Item Reduction Program is established as an integral part of the DOD Cost Reduction Program. Increased emphasis on the Inventory Item Reduction Program and the efforts expended by the military services under the item entry control and the inactive item review programs have resulted in the elimination of 421,460 items from the DOD supply system during fiscal year 1966.

Item Management Coding Program

The Item Management Coding Program continues to be an important part of the DOD Logistics System. Within Federal Supply Classes assigned to DSA for integrated management, determination of the specific items to be managed by DSA is accomplished by application of uniform item management coding criteria approved by the Defense Materiel Council.

A prerequisite to IMC requires coding activities to review all items for withdrawal of interest. This is resulting in the removal of large numbers of items from the DOD supply system. As of 30 June 1966 various service inventory control points had indicated withdrawal of interest in

109,371 FSNs. Utilizing the approved savings figure of \$100 per FSN, the first 12-months coding effort will result in an ultimate DOD savings of \$10,937,100.

As of 30 June 1966, the IMC program was 35.9 percent complete with 364,707 items coded out of a total item count of 1,017,693 items. Of the total items coded as of 30 June 1966, 39 percent were coded for integrated management, 31 percent coded for Service management, and 30 percent coded for withdrawal of interest.

Item Entry Control Program

The DOD Item Entry Control Office was established within the organizational framework of DSA during fiscal year 1964. The purpose of the office was to provide DOD-wide counsel and leadership in the development of a program and methods to control the entry of new items into the DOD Supply System.

Plans and procedures essential to the expansion of the DOD Item Entry Control Program technical review have been developed and are being implemented. The approved plan provides for the establishment of 14 DOD Technical Review Activities within the military services and DSA to perform a technical review of 67 rapid-growth Federal Supply Classes accounting for approximately 70-80 percent of all new item growth. Full implementation is scheduled for completion by 1 July 1967. This technical review is required for all new items proposed for Federal Stock Number assignment prior to a procurement commitment.

DISTRIBUTION

The Automatic Addressing System (AAS)

The Automatic Addressing System, using the fact that logistics message traffic is addressable by its own content, was placed in service test in May 1965. The AAS was evaluated in August 1965 by a special I&L/Service team whose report endorsed the AAS concept, and recommended that the AAS be adopted and expanded. This recommendation was approved, and responsibility for the administration and extension of the AAS was assigned to DSA.

The AAS has been designed to expedite the flow of supply requisitions and associated supply management traffic within the DOD logistics complex through the use of a computer facility co-located with an AUTODIN Electronic Switching Center. In this system, supply transactions are addressed or routed through the AUTODIN to the AAS where they are processed through a random access file containing source-of-supply data on approximately 4 1/2 million Federal Item Identification Numbers (FIIN). The onward routing of the message is derived from processing through this file.

The August 1965 evaluation mentioned above demonstrated the need for the establishment of a "back-up" facility. McClellan Air Force Base, Sacramento, California, was selected as a second AAS site and plans were made to have it operational early in fiscal year 1967. This action will ensure around-the-clock operation and provide an alternate line of communications.

Concurrently with the establishment of the second site, a revised AAS program will be placed in operation. This new program will exploit the increased capability of a unique tandem RCA 301 system doubling the

capacity of the original AAS equipment, which had proved inadequate to the task. Among the most significant improvements are more efficient "batching" techniques which will reduce the number of messages by about 50 percent, while increasing the through-put capability of the terminal facility. This combination of improvements permits logistic transactions to move from originator to destination with less frequent interruption and with greater speed. In addition, the new system has a built-in message tracer and recovery capability.

The assignment of the AAS to DSA also directed that a study be made of the long range (Phase III) requirements for AAS services, contemplating that, as the AUTODIN system grew to world-wide proportions, the AAS would follow as a complementary service.

WEAPON SYSTEM SUPPORT

Integrated (Wholesale) Support of the F/RF-4 Weapon System

Integrated support of Navy (including Marine) and Air Force F/RF-4 weapon systems began during fiscal year 1964, and management responsibility for this support was assigned to the Air Force. Quarterly reports are prepared on the item coverage, dollar scope of supply and maintenance transactions, and the effectiveness of this support. As of 30 June 1966 the following record of accomplishments was noted:

1. A total of 4,527 items had been selected for integrated support. These are items which are peculiar to the F/RF-4 but common to both the Navy and Air Force versions of the aircraft. Approximately 1,500 items are being added. In total, there are an estimated 60,000 items applicable to the F/RF-4, of which 19,000 are managed by DSA.
2. Air Force sales of Joint Support List (JSL) items to Navy during

fiscal year 1966 totaled \$5.4 million.

3. Interservice depot maintenance (labor and material) for fiscal year 1966 totaled \$0.9 million.

With over two years of operation under the present arrangements for integrated support, it is believed that sufficient experience has been gained so that it is now practical and desirable to take steps to increase both the item coverage and dollar scope of supply and maintenance support for this weapon system. Current plans call for the military services, based on new DOD policy guidance, to develop programs and procedures to accomplish this increase.

The results of the military services' efforts to increase integrated supply and maintenance support for the F/RF-4 weapon system will be utilized in the integrated support of other multi-service aircraft programs, such as the F-111 and the A-7.

SOUTHEAST ASIA LOGISTICS

Red Ball Express

The high priority Red Ball Express was well known in World War II, when the Allied sweep through France was threatening to come to a halt because bomb-damaged railroads could not handle the supplies required at the battlefield. A huge fleet of trucks was assembled, a Red Ball signifying priority over other traffic was painted on the bumper, and the essential supplies were carried directly to the front.

The Red Ball Express is back in business in support of the effort in Vietnam - but with a difference. This time the roads are air lanes 25,000 to 40,000 feet high stretching over 9,000 miles, from Travis Air Force Base, California, to Vietnam, and the trucks are primarily 4-engine

jet aircraft traveling 400 to 600 miles per hour and carrying more cargo than a fleet of trucks.

For the equipment in Vietnam - aircraft, helicopters, tanks, bulldozers, trucks, material handling equipment - spare parts are essential to make them again operational once they have become deadlined. Due to the rough and intensive usage encountered, unusually large quantities of replacement parts are necessary, and getting them promptly to the man who needs them is the big problem. On 6 December 1965, the jet age Red Ball Express was organized and put in operation with a fleet of jet transports carrying priority spare parts, all marked with the Red Ball.

The system is so designed as to have the required part in the hands of the mechanic in Vietnam within 168 hours (7 days) after it has been determined that the part is not available in local stock.

As of 28 June 1966, 8,612,817 pounds, or 4,306.4 tons of Red Ball cargo had been air expressed to Saigon from Travis AFB, California. This represents 83,615 requisitions and has resulted in removing from a deadline status 4,747 Army aircraft and helicopters, 1,882 heavy duty trucks (2 1/2 ton and over), 247 bulldozers, 150 pieces of materials handling equipment, and many other items of equipment such as 175 mm guns, 8" howitzers, communications equipment, generators, water purification units, etc.

Ammunition Reporting

Because of the rapidly changing conditions of the Vietnam war, and to insure improved ammunition planning capability, a consolidated worldwide reporting structure was developed and implemented. The reporting consists of two formats, (1) a report each ten days covering the Pacific Command, and (2) a monthly world-wide report.

CINCPAC 10-Day Report Each base, depot, station, or combat ship reports daily status and transaction information for selected air ammunition items to the controlling Service command headquarters, which each ten days submit a consolidated report to the Commander in Chief, Pacific. The individual component transactions, as well as the consolidated report, are submitted to the CONUS Inventory Control Point for use in the monthly world-wide inventory report. The consolidated ten-day report covers both complete and incomplete rounds (includes data as to incomplete items and date of their expected availability), and provides data as to current stockage objective, usage rate, available assets, receipts and transfers, planned and actual consumption, and in-transit assets. Separately, the planned production data on these items are provided CINCPAC, which prepares planned consumption and stock levels for the next twelve months. The ten-day reports, as well as the planned consumption for the next twelve months, are submitted by CINCPAC to the JCS for review and approval.

World-Wide Monthly Report Each month the air ammunition items as well as selected ground ammunition are reported by the Service Inventory Control Points to the Service Headquarters, who then submit the report to OSD. The monthly report provides planned and actual consumption, planned and actual production, transfers and stock adjustments, planned and actual inventory, and in-transit assets for the past year and projected for the next year. The ten-day CINCPAC report data are incorporated directly into the monthly world-wide report.

This new reporting structure permitted cancellation of several established but duplicatory reports originating at the combat level, provides more accurate and timely data on ammunition than did the prior reports,

and standardizes ammunition reporting among the Services.

CATALOGING

Federal Item Identification Guides (FIIGs) Improvement Program

A significant program initiated to provide improved logistics support is the FIIGs Improvement Program, which represents a major overhaul of the present description pattern and is designed to give more and better data on individual items of supply. The improved guide, or FIIG, has been selected as the medium best suited for the orderly determination, collection, and transfer of item characteristics, interchangeability and substitutability criteria, and supply management data to a mechanized item intelligence bank. The data, in machine-sensible coded form, will be readily available for retention, conversion, and dissemination to users as required. The FIIG will include those data requirements specified by engineers and specialists in procurement, standardization, and supply to satisfy particular technical or managerial needs. In this way the FIIG will insure the preparation of a more comprehensive supply management information package for each item of supply, and, most important, the data will be capable of being processed entirely by machine.

The FIIG will consist of three major sections:

Section I - Item (physical and performance) characteristics required to differentiate one item of supply from another. They are used as a basis for Federal Stock Number assignment and materiel item identification.

Section II - Data range values for elements contained in Section I which will provide a standardized engineering basis for determining interchangeability and substitutability.

Section III - Supply management and supplementary technical data which do not identify the item, but which are necessary to support specific logistics functions.

NATO Codification

On 1 March 1966, the Defense Logistics Services Center (DLSC) established an International Codification Division in its Directorate of Cataloging. This Division will perform, or monitor the performance within DLSC of the cataloging services rendered by the United States Government to NATO nations and other friendly foreign governments. Chief among these functions is the preparation of item identifications for items procured by foreign governments from manufacturers within the United States, but not previously identified or assigned Federal Stock Numbers (FSNs) within the Federal Catalog System. The Division will also act as the central collaborating activity for revisions or cancellations of item identifications on which a foreign government is recorded as a user.

A new chapter to the Federal Manual for Supply Cataloging, entitled "International Cataloging", has been issued. This document specifies the cataloging services rendered centrally at DLSC by the U. S. to foreign governments. The chapter also stipulates the procedures to be followed in the submittal and processing of requests, and the price to be charged for each type of service. The chapter is the working document for a revised letter of agreement, signed out by the Assistant Secretary of Defense (Installations and Logistics) on 15 February 1966, and subsequently to be co-signed by a high level authority of the NATO or other friendly foreign government accepting the terms of the agreement. To date, this revised letter of agreement has been signed by Australia, Canada,

Denmark, France, Japan, Netherlands, Norway, South Africa, Belgium, and Italy.

As of 30 June 1966, the DLSC files recorded a gross total of 842,779 registrations for NATO and other friendly governments as managers of a net total of 511,183 items assigned FSNs. Of this latter total, 77,549 were managed solely by foreign governments and 433,634 were managed by one or more U.S. activities and by one or more foreign governments.

Provisioning Screening

Provisioning screening is an operation within the provisioning process whereby manufacturers' part numbers are screened against data maintained in the master Federal Catalog Files for the purpose of revealing their association with existing Federal Stock Numbers (FSNs), and validating the use of existing FSNs. It also provides for the screening of data files of assets in long supply for materiel utilization purposes.

The contributions of provisioning screening toward our goals of reducing cataloging operations, maintaining item entry control, and utilizing on-hand assets in lieu of new procurement are illustrated by the following accomplishments:

1. During the last six months of fiscal year 1966, 2,408,192 part numbers were screened, revealing 31.5 percent association to existing FSNs.
2. Of the 616,417 FSNs screened for validation during the six-month period, 95.6 percent were matched against existing FSNs.
3. A total of 109,841 matches were made to long supply assets during the six-month period, making it possible for provisioning activities to merge new requirements with existing requirements, and thus prevent or

reduce procurement.

Provisioning screening, together with a current plan to perform a technical review screen during provisioning under the Item Entry Control effort, should provide an assured capability to limit new items entering the supply system through the provisioning process to an absolute minimum, short of steps possible during design, development and engineering.

INFORMATION SYSTEMS

Survey of Information Systems in the Military Services on the Supply Support and Readiness of Weapon Systems

A descriptive inventory of the data elements which the Services have, or are in the process of developing, at various logistics and operational command levels has been compiled for the use of OASD(I&L) and Service headquarters. The survey and inventory of the Air Force, Navy, and Marine Corps has been completed.

Improvement and Standardization of Logistics Data Systems

The usefulness of standard Department of Defense logistics data systems was expanded during fiscal year 1966, as progress was made in the maintenance and improvement of automated procedures. A revision to the Uniform Materiel Movement and Issue Priority System (UMMIPS) was completed, based on four years of experience in the use of a single DOD-wide priority system. Among other changes, new priority system rules have the objective of establishing more effective controls over the usage of high priorities in the requisitioning and issue of supplies. Both the Military Standard Requisitioning and Issue Procedures (MILSTRIP) and the Military Standard Transportation and Movement Procedures (MILSTAMP) will benefit from this revision of UMMIPS.

An evaluation of experience with MILSTAMP resulted in the revision

of the complete MILSTAMP DOD Regulation (DOD 4500.32). The revised MILSTAMP regulation provides a more comprehensive basis for achieving uniformity in the documentation and control of the movement of materiel by DOD-controlled transportation systems.

The development of uniform logistics performance and pipeline time analyses was brought nearer to completion with the drafting of the Military Supply and Transportation Evaluation Procedures (MILSTEP) report formats and operating manual. Certain MILSTEP reporting concepts underwent a test application in the Army supply system. MILSTEP will provide uniform definitions, report formats and data collection techniques for measuring the performance of each supply distribution system in meeting order and shipping time standards established in UMMIPS.

Standard data classification procedures and data conventions were adopted for covering the identification of procurement information elements, e.g., contracts and contract line items. These were published in the Armed Services Procurement Regulation (ASPR) and will be adopted in the Military Standard Transaction Reporting and Accounting Procedures (MILSTRAP) which provides a standard property accounting method for identifying materiel received from contractors. These standard data elements will be used by the Military Standard Contract Administration Procedures (MILSCAP) which will improve the flow of information among buying offices, inventory control points, contract administration activities and Government contractors. A detailed review of the MILSCAP operating manual was conducted by the military departments and the Defense Supply Agency during fiscal year 1966.

Defense Logistics Services Center Long Range System Design

Looking several years into the future, the Assistant Secretary of Defense (I&L) has approved the development of a Long Range System Design for Defense Logistics Services Center (DLSC). The underlying concept is to establish an integrated data system, exploiting the latest technological developments in the fields of automatic data processing and communications, and embracing all those functional missions currently assigned or anticipated for assignment to DLSC in the future. The objective is to provide the maximum in responsive and economical information support for activities of the DOD, civil agencies, and friendly foreign nations in the performance of their logistic management functions.

Although logistic management data has for some time been collected, stored, and disseminated in connection with the operations of the Federal Catalog System, the study group on the Long Range System Design is investigating the more advanced management needs in such areas as item identification, publications, interchangeability and substitutability, supply management, materiel utilization, marketing, procurement, and traffic management to increase the capability and efficiency in these operations.

The primary effort during the reporting period has been directed to developing a system requirement to serve as a basis for the design of the system and a compatible ADP configuration.

Management and Use of Computers

Increasing reliance on ADP equipment in all facets of management and operation, and the substantial investment in this equipment (1,967 computers, and costs of \$742 million in fiscal year 1966, exclusive of computers used in military operations and for classified purposes) have

necessitated increased emphasis on the management and use of this very vital resource.

Acting within the principles of Public Law 89-306 (October 1965), action has been initiated to strengthen the management and use of computers within the DOD by directing the heads of all Defense components to give emphasis to (1) providing top management direction to the computer program and the development of computer systems which will be fully responsive to management's total requirements, (2) expanding application of the computer in the elimination of paper-processing tasks, (3) standardizing data systems in functional areas throughout the DOD, (4) improving the computer selection process, and (5) strengthening the programs for review and audit of computer systems and operations. Further actions have been taken in this area by the initiation of a review of the DOD management information system for ADP equipment. This review will provide for the institution of revisions necessary to make certain the availability of adequate information at each management echelon within the DOD and to insure the ability to comply with the information requirements of the Bureau of the Budget. These actions are in consonance with the President's memorandum of 28 June 1966 on the Management and Use of Computers.

Published Directives and Instructions

Digests of the principal regulations, Directives, and Instructions providing for the recording or reporting of inventory data, issued by the Office of the Secretary of Defense since the enactment of Title IV of the National Security Act and in effect as of 30 June 1966, are presented in this part of the report. These current Directives and Instructions, in some instances, supersede or revise earlier Directives and Instructions on the subject of property accounting and reporting.

1. Method of Financing, Funding, Accounting, and Reporting for Mutual Assistance Sales to Eligible Foreign Governments or International Organizations (DOD Instruction 2110.29), reissued 27 September 1963, with subsequent amendments.

The purpose of this Instruction is to prescribe uniform procedures to be followed in financing, funding, accounting and reporting with respect to all sales of military equipment, materials, and services made under the authority of the Mutual Security Act of 1954, as amended.

2. Aircraft Inventory Record Series (DOD Instruction 3232.3) issued 23 March 1956, reprinted 7 July 1960.

This Instruction establishes a uniform Aircraft Inventory Record Series within the Department of Defense in order to ensure that an accurate accountability and inventory record control of components installed in aircraft may be maintained. This requirement is applicable to all aircraft including those subject to inter-department transfer, maintenance cross-servicing, and utilization by National Guard Units, Reserve Training Units and the Mutual Assistance Program.

3. Basic Regulations for the Military Supply System (DOD Directive 4000.8), reissued 13 June 1963.

This Directive provides for the continuous and comprehensive implementation of Title 10, U.S.C., Section 2202, in achieving the efficient, economical, and practical operation of an integrated supply system to meet the needs of the military departments without duplicate or overlapping operations and functions, and sets forth the policy defining the regulations prescribed by law.

4. Reports on Single Manager Operations (DOD Instruction 4100.31), reissued 2 September 1960, with subsequent amendments.

This Instruction prescribes quarterly statistical reports required by the Office of the Secretary of Defense relative to the operations of the Single Managers in their respective areas of assigned responsibility. These reports provide significant data upon which effective management policies and decisions can be formulated. The following single manager assignments are being reported upon: Airlift Service, Ocean Transportation, Traffic Management within the United States, Subsistence, Clothing-Textiles, Medical Material, Petroleum, Military General Supplies, and Military Industrial Supplies.

5. Commercial or Industrial Activities - Operation of (DOD Instruction 4100.33), issued 8 March 1963.

This Instruction implements basic DOD policy in starting, continuing, curtailing, or discontinuing commercial or industrial activities, and establishes procedures for maintaining inventory records for reporting purposes.

6. Retention and Transfer Policy (DOD Directive 4100.37), issued 15 September 1965, with subsequent amendment.

This Directive provides uniform policy for the retention and transfer of materiel, industrial facilities, and other military installations.

7. Armed Services Procurement Regulation (DOD Directive 4105.30), issued 11 March 1959.

This Directive continues the Armed Services Procurement Regulation as a regulation of the Secretary of Defense. Appendix B thereof prescribes the record-keeping and reporting for Government property furnished to or acquired by contractors pursuant to the terms of their contracts.

8. Requirements for Contractors to Price Deliveries of Military Supply Items (DOD Instruction 4110.1), issued 7 April 1959.

The purpose of this Instruction is to provide for the furnishing of unit prices by contractors on materiel inspection and receiving reports for shipments of materiel procured by the military departments. The unit price data furnished on materiel inspection and receiving reports will be used by the military departments in developing departmental standard prices and for financial and supply accounting.

9. Development, Maintenance, and Use of the Federal Catalog System within the DOD (DOD Directive 4130.2), reissued 4 December 1963, with subsequent amendment.

This Directive states the mission and objectives of the Federal Cataloging Program, the scope and policies of the Federal Catalog System, and assigns the responsibilities within the Department of Defense.

10. Inventory Management Policies (DOD Directive 4140.1), issued 12 October 1956 and subsequent amendments, and a series of DOD Directives

and Instructions: (a) Management of Mobilization Reserve Stocks (Instruction 4140.2), issued 28 July 1954, and subsequent amendment; (b) Management of Materiel Pipeline, Including Levels of Supply (Instruction 4140.4), issued 3 September 1954; (c) Management and Transaction Reports for Materiel Assets (Instruction 4140.18), reissued 15 December 1965; and (d) Management of Mobilization Reserve Stocks of Items Assigned to the Defense Supply Agency (DOD Directive 4140.21), issued 15 November 1963.

Directive 4140.1 established the Department of Defense basic policy for the management of materiel inventories and uniform definitions. It calls for a physical inventory of materiel and reconciliation of records at least once a year, and requires that each item of materiel, both for military or industrial use within a military service, shall be under the cognizance of only one inventory control point. These supply and inventory control points are required to maintain records, make reports, channel the transportation of materiel in the most economical manner, review the inventory status in relation to current and future requirements, determine and declare Service-wide excess stocks, and schedule rebuilding of economically reparable stocks. Instruction 4140.2 establishes the policies regarding the retention, storage, care and preservation of mobilization reserve stocks and their stock record accounting, reporting and control. Instruction 4140.4 prescribes definitions to be used for identifying the levels of supply in the materiel pipeline. Instruction 4140.18 prescribes semi-annual reporting of the status, condition, and purpose of world-wide Department of Defense assets of principal items and of supply system assets of secondary items, reporting

of the transactions for materiel financed by procurement or other appropriations, and reporting of the value of base-funded inventory.

Directive 4140.21 calls for periodic reports by the Defense Supply Agency of stocks on hand.

11. Uniform Property Records (DOD Instruction 4140.15), issued 10 April 1961, and subsequent amendment.

This Instruction establishes a single property record within the military departments for use in the management accounting and reporting of Government-owned plant equipment in the hands of contractors.

12. Military Standard Transaction Reporting and Accounting Procedures (MILSTRAP) (DOD Instruction 4140.22), issued 3 August 1964.

This Instruction establishes a standard procedure for reporting of and accounting for inventory and related financial transactions within the Department of Defense.

13. Requirements Priority and Asset Application for Secondary Items (DOD Instruction 4140.24), issued 10 September 1964, and subsequent amendments.

This Instruction prescribes a uniform sequence of priorities in which secondary items are to be reported. Among the uses covered is the sequence to be used in reporting pursuant to DOD Instruction 7420.11, digested below.

14. Materials Handling Equipment Utilization (DOD Instruction 4145.11), reissued 23 June 1959.

This Instruction (a) establishes uniform criteria for determining quantitative requirements and allowances for the principal items of materials handling equipment, (b) provides a means for determining the quantities of such equipment required by an installation, and (c) prescribes reporting formats pertinent to the effective application of

criteria and analyses of equipment utilization.

15. Policy and Procedures Relating to Non-Excess Personal Property to be Sold or Exchanged for Replacement Purposes (DOD Instruction 4160.1), issued 14 July 1955.

This Instruction establishes Department of Defense policy relating to the exchange or sale of personal property for replacement purposes where the proceeds of the sale are applied to acquire similar items. It also prescribes policy and procedures affecting the utilization screening of such property before sale or exchange.

16. Policy Governing the Utilization Screening of Excess Personal Property Under Control of DOD (DOD Instruction 4160.9), reissued 11 January 1960.

This Instruction establishes Department-wide policy and procedures for reporting personal property under Department of Defense control which is excess to the needs of the organization holding such property. It routes notifications of excess personal property so that all elements of the Department of Defense may be informed of its existence and character. Provision is made for notifying all other elements of the Federal Government of excesses remaining after Department of Defense needs are met. Finally, the Instruction provides for disposal of such excesses which are not absorbed by the Federal Government.

17. Reporting Requirements for DOD Materiel Utilization and Disposal Programs (DOD Instruction 4160.17), reissued 6 May 1963, reprinted 5 November 1963.

This Instruction reissues the basic requirements for a Department of Defense reporting system for excess, foreign excess and surplus materiel and the quarterly submission of specific information relating to the

utilization and disposal of excess and surplus personal property.

18. DOD Facility Classes and Construction Categories (DOD Instruction 4165.3), issued 11 March 1955, and subsequent amendments.

This Instruction provides a standard numerical code for the identification and classification of facility classes and construction categories to permit uniform identification and classification of real property in planning, programming, budgeting, accounting, and reporting, exclusive of the Civil Works activities of the Army Chief of Engineers, or emergency construction in direct support of combat operations for any of the military departments.

19. Real Property: Acquisition, Management and Disposal (DOD Directive 4165.6), issued 15 September 1955 and subsequent amendment; Program for Management of Real Property Maintenance Activities (DOD Instruction 4165.9), issued 23 June 1955, and subsequent amendment.

Directive 4165.6 states the Department of Defense policy relative to the acquisition, management and disposal of real property and delegates the authority to accomplish these actions within each of the military departments to the respective Secretary. Instruction 4165.9 outlines a program for uniformly effective management of real property maintenance activities.

20. Inventory of Military Real Property (DOD Instruction 4165.14), reissued 20 February 1958.

This Instruction provides a uniform procedure to be followed by the military departments for the establishment and maintenance of a world-wide inventory of real property (land and improvements) and for the preparation of an abridged inventory in summary form. Specific instructions are contained in this Instruction as to the categories, physical units of

measure, the data, maps, and descriptive information which are to be kept on the records in the military departments and those that are to be summarized and reported to the Office of the Secretary of Defense. The military departments are required to keep their records current at all times and to submit summary reports annually.

21. Form for Transfer and Acceptance of Military Real Property (DD Form 1354) (DOD Instruction 4165.40), issued 14 November 1961.

This Instruction prescribes a single form (DD Form 1354) to be used by all military departments for the recording of primary documentation upon transfer and acceptance of real property.

22. Non-utilization of Military Real Property (DOD Instruction 4165.41), issued 18 December 1961.

This Instruction establishes criteria and requirements for reporting on significant areas of unused land and space at certain domestic and overseas military installations. It is designed in part to assure maximum utilization of existing installations and in part to assist in screening real property construction requests.

23. Preparation of Materiel Planning Study (DD Form 764) (DOD Directive 4200.1), reissued 11 February 1959.

This Directive provides for a uniform presentation of demand and supply data from which the Office of the Secretary of Defense and the military departments can discharge their responsibilities in the field of requirements and supply management. World-wide assets on hand and their general location are shown. The Directive is record-keeping in nature and studies of major items currently being procured are requested by separate memoranda as required - usually semi-annually. A list of

items was developed for which a materiel planning study was requested from the military departments. This original list of items has been revised periodically for the purpose of adding or deleting items as they increase or decrease in importance.

24. Production/Delivery Status and Progress Reporting Between Military Departments (DOD Instruction 4200.4), issued 11 October 1955, and subsequent amendment; and Materiel Program Control - Principal Items (DOD Instruction 4200.6), issued 14 December 1955, and subsequent amendments.

Instruction 4200.4 establishes a requirement for, and a method to accomplish, the exchange of information between two or more of the military departments relative to Production/Delivery Status and Progress Reporting in connection with basic items procured or produced by one military department for another as the result of a single procurement assignment agreement. Instruction 4200.6 establishes the criteria for determining end items of major importance.

25. Reporting of Certain Fiscal Data with Regard to Metalworking Machinery (DOD Instruction 4215.16), reissued 23 June 1965.

This Instruction establishes an annual report designed to reflect the number and dollar value of machine tools having an acquisition cost of \$1,000 or more approved for procurement during the past fiscal year. It also includes the number and dollar value expected to be procured during the current fiscal year.

26. Management of Defense-Owned Industrial Plant Equipment (IFE) (DOD Instruction 4215.18), issued 10 December 1964.

This Instruction prescribes the procedures for reporting inventories of industrial plant equipment owned by the Department of Defense.

27. Military Public Works Basic Record-Keeping Requirements (DOD Instruction 4270.3), reissued 13 October 1955.

This Instruction provides for the maintaining of basic records, relative to military public works construction activities, at the headquarters of each of the military departments, from which summary data may be extracted as required.

28. Industrial Facility Expansion and Replacement (DOD Directive 4275.5), issued 13 March 1964.

This Directive establishes policy on ownership and management of industrial facilities by the Government, or to be acquired for its account, and operated or used by it or its contractors. Provision is made for appropriate reporting of new equipment acquired, of the status of equipment in use, and other pertinent data.

29. DOD Motor Vehicle Uniform Reporting System (DOD Instruction 4500.7), reissued 13 August 1963, with subsequent amendments.

This Instruction establishes standard terminology, definitions and reporting of motor vehicle inventories. The system provides data on utilization, operating and maintenance costs.

30. DOD Programming System (DOD Directive 7045.1), reissued 30 October 1964, with subsequent amendments. DOD Programming System; Procedures for Program Changes (DOD Instruction 7045.2), reissued 29 January 1965, with subsequent amendment; and DOD Programming System; Program Element Summary and Descriptive Data Sheets (DOD Instruction 7045.3), issued 29 January 1965, with subsequent amendment.

This Directive establishes the framework for an integrated system for review and approval of proposed new programs and changes in existing programs. It also provides for maintaining and updating of the

official program for the DOD, the "Five-Year Defense Program" (name changed by Sec/Def memo 12 March 1966. Instruction 7045.2 provides specific procedural guidance for the preparation, evaluation and resolution of Program Change Proposals. Instruction 7045.3 provides specific procedural guidance for the preparation and submission of summary data to reflect approved programs or approval of program changes.

31. Accounting and Pricing for Materiel Financed by Procurement Appropriations for Military Functions (DOD Directive 7200.7), issued 16 December 1964.

This Directive establishes policies, procedures, and criteria to be followed by Defense components in the pricing of and financial accounting for inventories, receipts, and issues of materials, supplies, and equipment.

32. Regulations Governing the Use of Project Orders (DOD Directive 7220.1), reissued 27 September 1958, and subsequent amendment.

This Directive prescribes the regulations governing the use of project orders and the basis upon which the performing establishment will be reimbursed. A project order is a specific, definite and certain order issued for the manufacture of materials, supplies and equipment, or for other work or services, which, when placed with and accepted by a Government-owned and operated establishment, serves to obligate appropriations in the same manner as orders or contracts placed with commercial enterprises.

33. Billing and Collection for Sales of Department of Defense Materiel (DOD Instruction 7220.13), reissued 28 January 1965, with subsequent amendment.

This Instruction implements DOD Directive 7420.1 and DOD Instruction 7200.7, both digested herein, with respect to requirements for billing

and effecting reimbursement for sales of all materials, supplies, and equipment except aircraft, ships, and plant equipment not in the supply system.

34. Accounting and Reporting on Disposition of Proceeds from Sale of Scrap, Salvage, Surplus, Foreign Excess Personal Property, and Timber and Lumber Products (DOD Instruction 7310.1), reissued 10 October 1962, with subsequent amendment.

This Instruction sets forth the policies with respect to accounting and reporting on disposition of proceeds from sale of scrap salvage, surplus materials, foreign excess personal property, and timber and lumber products of the Department of Defense, except (a) proceeds from sale of such material held by working capital funds of the military departments (these are handled in accordance with Regulations Governing Stock Fund and Industrial Fund Operations) and (b) proceeds from sale of such material held for the Military Assistance Program.

35. Accounting for Excess, Surplus, and Foreign Excess Personal Property, Including Scrap and Salvage (DOD Instruction 7310.2), reissued 20 September 1963.

This Instruction establishes uniform, simplified procedures for accounting for excess, surplus, and foreign excess personal property (including scrap and salvage) transferred from supply system inventories or turned in from use and placed in the process of disposal. The procedures provided for the establishment of separate property-disposal accounts; quantitative accounting for scrap; a method of allocation of net sales proceeds to working-capital funds; simplified accounting for individual sales; and pre-determined rates for reimbursable expenses.

36. Regulations Governing Industrial Fund Operations (DOD Directive 7410.4), reissued 3 April 1963, and subsequent amendments.

This Directive provides for the establishment of Industrial Funds within the Department of Defense. It also establishes the policy for the initial transfer of funds, inventories, and properties to the Industrial Funds; the handling of project and other work orders and reimbursements for such work; provision for accounting and cost accounting systems; authorization to incur obligations and expend funds; budgetary control; reporting on operations, and auditing.

37. Financial Reports for Department of Defense Industrial Funds (DOD Instruction 7410.5), reissued 14 August 1963, with subsequent amendment.

This Instruction sets forth the requirements for financial reports of Industrial Funds by the Department of Defense to cover its responsibilities under the National Security Act Amendments, and to meet other reporting requirements under a single uniform system of reporting for activities operating under Industrial Funds.

38. Regulations Governing Stock Fund Operations (DOD Directive 7420.1), reissued 20 August 1965, with subsequent amendment.

Directive 7240.1 provides for establishment of a Stock Fund in each of the four services and the Defense Supply Agency; sets up procedures for the issuance of charters, initial transfer of funds, inventories, and other assets; covers pricing policy, management policy, sales of stocks and accounting; and provides authority to obligate and expend funds, and for budgetary control, reporting and auditing.

39. Billing and Collection for Sales of Stock Fund Materiel (DOD Instruction 7420.9), reissued 28 January 1965.

This Instruction supplements DOD Instruction 7220.13, digested above, by establishing procedures for billing and effecting collection for sales of stock fund materiel, with special instructions for accounting, reporting and controlling transactions.

40. Quarterly Stock Fund Reports on Financial Status and Program Projections (DOD Instruction 7420.10), issued 6 November 1962.

This Instruction prescribes planning objectives and progress reports against which accomplishments may be measured for key budget program elements.

41. Chart of Accounts and Financial Reports for Department of Defense Stock Funds (DOD Instruction 7420.11), issued 10 June 1964, with subsequent amendments.

This Instruction provides for the financial statements required for the preparation of reports to the Congress and other Government agencies and for use in financial control actions under the budget process.

42. Report on Real and Personal Property and Selected Financial Assets (DOD Instruction 7500.1), reissued 26 September 1961, with subsequent amendment.

This Instruction prescribes uniform reporting formats and criteria to the military departments for the recurring annual submission of narrative, accounting, and statistical material required by the Office of the Assistant Secretary of Defense (Comptroller) for the preparation of a consolidated Department of Defense report to the Congress and the President on property records maintained under Section 410 of the National Security Act. It also prescribes the instruction and reporting format for the

financial assets of each military department exclusive of real and personal property, required by the Chairman of the Committee on Government Operations, House of Representatives.

43. Use of Source Documents and Source Records in Quantitative and Financial Inventory Accounting (DOD Instruction 7510.2), issued 2 July 1957.

This Instruction defines the type of basic source documents and source records to be used in the military departments to ensure that the inventory accounting and reporting system provide for the accumulation of both quantitative and financial data from original transaction documents and stock records.

44. Pricing of Government-owned Plant Equipment in the DOD (DOD Instruction 7510.3), issued 24 May 1960.

This Instruction establishes, for inventory and other purposes, uniform pricing policies for Government-owned plant equipment.

45. Uniform Policy for Charging Accessorial Costs Incident to Issues, Sales, and Transfers of Materials, Supplies, and Equipment (DOD Instruction 7510.4), reissued 31 August 1965, with subsequent amendment.

This Instruction establishes policies and procedures for charging expenses arising from issues, sales, and transfers of materials, supplies, and equipment, except bulk POL, plant equipment not in the supply system, aircraft, and ships.

46. Simplified Inventory Accounting for Low-Value Materiel (DOD Instruction 7510.5), issued 1 July 1963.

This Instruction authorizes procedures for simplified inventory

accounting for low-value items of materials, supplies and equipment (materiel).

47. DOD Automatic Data Processing Equipment Program Reporting System (DOD Instruction 7700.6), issued 10 August 1965.

This Instruction provides for the reporting of automatic data processing equipment used by the Department of Defense, whether owned, leased, or leased with option to purchase.

48. Progress Report on Military Family Housing Projects (DOD Instruction 7720.5), issued 1 October 1962.

This Instruction provides for submission of progress reports as various stages of development are reached in the planning and construction of military family housing projects.

49. Inventory and Utilization Reporting on Military Family Housing (DOD Instruction 7730.20), reissued 31 December 1963, with subsequent amendment.

This Instruction prescribes quarterly reports on inventory of military family housing units and occupancy and assignment of personnel to these units. The Instruction is applicable to all DOD components.

50. Petroleum Reporting Requirements (DOD Instruction 7730.21), issued 20 June 1963.

This Instruction prescribes the various required reports concerning petroleum programs, status, inventories, requirements, production, deliveries, and other logistics areas.

51. Equipment Distribution and Condition (EDAC) - Statistical Reporting System (DOD Instruction 7730.25), issued 1 June 1964.

This Instruction establishes a uniform reporting system for selected items of military equipment. It does not include equipment associated with real property, installations and facilities.

Section B - Army

As in previous years, Department of the Army progress in improving management, recording, and reporting inventories of Government property resulted not only from Army participation in inter-Departmental Task Forces headed by staff elements of the Office of the Secretary of Defense, with attendant Army implementation of DOD Instructions, but also stemmed from projects initiated within the Army for more effective supply management and discipline at Army installations, activities and intermediate commands.

Supply System Inventories

In the new Army Regulation (AR 37-37), dated 28 January 1966, "U.S. Army Financial Inventory Accounting and Reporting System", Department of Defense current policies were set forth, with verbatim reproduction of DOD Instructions 4140.18 and 7200.7, providing the basis for Army implementing procedures. Detailed reporting instructions are included in AR 735-50.

Training Installation Inventories

Prototype pilot installation of a project for Centralization of Supply Management Operations (COSMOS) is being completed at the Presidio of San Francisco to establish central computerized accountability and stock control over inventories at Class I (training) installations within the Sixth Army Area. In effect, the project serves to apply the MILSTRAP concept to stocks held at training installations in continental United States for support of troops. Present plans call for extension of COSMOS to all CONUS Army areas upon full implementation and evaluation of the Presidio pilot operation.

Depot Shipping Operations

Revisions to AR 725-50 on MILSTRIP and MILSTRAP, AR 711-16 on Installation Supply Procedures, and AR 735-11 covering Accounting for Lost, Damaged and Destroyed Property are being cleared for publication early in fiscal year 1967 to give effect to DOD guidance in establishing uniform procedures for reporting and adjusting discrepancies in incoming shipments. The new systems are designed not only for better filing and collection of loss and damages claims against common carriers, but also for more effective reporting to shipping depots and like activities as the basis for quality control of shipments.

Reporting of Real Property Inventories

Complete revision of AR 405-45 on "Inventory of Military Real Property" was released for publication to up-date and improve Army procedures covering accounting and reporting for real property in response to both DOD Instruction 4165.14 and DOD Instruction 7500.1. The AR prescribes the use of automatic digital network (AUTODIN) and automatic voice network (AUTOVON), as appropriate.

Accounting for and Reporting of Capital Equipment

Staffing was begun on Change 3 to AR 735-20 covering "Financial Accounting and Reporting for Fixed Assets". This regulation will give effect to revised terminology used in the proposed revision of the DOD Instruction on real and personal property. Requirements for values of Army real property, capital equipment, and materials with contractors, including that on contracts assigned to Defense Contract Administration Service (DCAS) for administration, are being adjusted to correspond with current definition of Industrial Plant Equipment and to correlate

specifications with those of Defense Industrial Plant Equipment Center (DIPEC) and DCAS.

Management Systems Affecting Army Property

a. PEMA Appropriation. Introduction of major items into Army inventories is one of the features covered in Phase II presently being developed in project for "Procurement of Equipment and Missiles, Army (PEMA) Management Accounting and Reporting System". Phase I doctrine was published in AR 37-120 under the acronym "PEMARS". In promulgating this system to integrate programming, budgeting, accounting and reporting for items financed under the PEMA appropriation under the policy announcements of the Defense Resource Management System more realistic and rapid interface with accountable records of PEMA items is contemplated to improve the utility of delivery and population data and, reciprocally, the acceptability of Army requirements submitted as basis for the Five Year Defense Program.

b. Corps of Engineers. Inventory acquisition and utilization data constitute a significant factor in a project being executed by the Chief of Engineers with contract assistance (all under Departmental monitoring) to establish integrated programming, budgeting, accounting and management (I-PBAMS) of Engineer functions in the areas of Military Construction, Civil Works and Civil Defense construction projects.

The Automatic Addressing System (AAS)

Army implementation of the Automatic Addressing System (AAS) began early in fiscal year 1966, providing automatic dispatch of MILSTRIP requisitions to the correct source of supply, thus eliminating delay and losses previously caused by misrouting. The initial pilot implementation

covered eight Army installations in continental United States (CONUS) and uniformly showed greatly increased accuracy of transmissions and reduction of delays enroute.

In the second half of fiscal year 1966 began the phasing-in of 50 additional requisitioning installations in CONUS with plans settled for expansion into Europe in November 1966 and into the Pacific area early in calendar year 1967.

Section C - NavyNavy Logistics Support Improvement Plan (NAVLOGSIP)

This plan was produced by a task group established under the mentorship of the Assistant Secretary of the Navy (I&L) and supervised jointly by the Deputy Chief of Naval Operations (Logistics) and the Chief of Naval Material.

The improvement plan stressed the need for integrating the development, production, and support of weapon systems, and recognized the need for an integrated weapon system management information system.

While the plan encompasses many functions that are beyond the scope of this report, objectives of the projects contained in the plan include the development of techniques to evaluate the effectiveness and capacity of organization to support operating forces, and the coordination of data systems throughout the Navy support establishment to achieve these goals.

Extended Application of the Uniform Automatic Data Processing System (UADPS) for Supply Management

UADPS has the following basic objectives: (1) to be responsive to the specific needs of the Navy, especially in areas of Fleet support, (2) to achieve inventory management cohesiveness within the Navy, and (3) to attain compatibility with goals of the Department of Defense in this area.

UADPS is a complete and comprehensive automated supply management system and encompasses three distinct programs. The Stock Point Program is designed to provide rapid and highly effective service to Fleet units through automated supply procedures at all Fleet support stock points.

The UICP Program (see following) consists of the installation of uniform automated procedures at three ICPs (ASO, ESO, SPCC) so that Navy worldwide assets can be immediately tapped to fill Fleet requirements. The ships program has been developed under the Maintenance and Material Management (3M) concept which provides for installation of uniform automated supply and accounting procedures in Navy ships to assist the Fleet in integrating the highly automated military supply systems. In the latter part of fiscal year 1966, a tender was successfully prototyped and to date, the system has been successfully implemented in two additional tenders. An aircraft carrier is in the process of being prototyped. Integral parts of the three programs embody Military Standard techniques (MILSTRIP/MILSTRAP, etc.) which make possible standard means of data interchange between Navy and the supply systems of the Department of Defense, General Services Administration, and the other services. The Automatic Data Information Network (AUTODIN) provides a communications capability for rapid transmission of the data.

The Inventory Control Point Program (UICP)

This segment of the Uniform Automated Data Processing System for Supply Management is designed for operation at three inventory control points, to improve Fleet support through centralization of control and automation of processes.

The program itself has two parts. The first, the Inventory Control phase, has been completed and is in full operation. The inventory control system provides a fully automated system for maintaining stock balances for all activities in the reporting system. This includes updating these balances daily from field transaction reports, processing requisitions

against these balances, maintaining back orders for items temporarily out of stock and releasing these back orders when material is received into the system.

The second part is the Weapons Systems File. This is a random access stored series of data, constituting a cross reference from equipment to component to part, and including configuration listings for ships and aircraft. Because of the random access features, the file can be queried using an individual ship type, with output consisting of a complete list of all stock numbers appearing in every equipment on the ship. Likewise, the file can be entered with an equipment type and output can be a listing of every ship which has the equipment installed.

Random access files will also simplify preparation of frequent and diverse reports required in Weapons Support area. The coding of individual parts in relation to their importance to a component and the component's essentiality to its equipment and so on is also a part of the file structure.

Further Accomplishments in the High Value Asset Control System (HIVAC)

The purpose of the HIVAC program is to achieve inventory economies, without impairing combat readiness, through specialized management attention to the small percentage of items which represent the major segment of annual procurement expenditures. Embodied in the concept of the HIVAC system is the requirement for maintaining worldwide material accounting records consisting of asset location records, by activity, and transaction reports of movement of the controlled items by designated reporting activities. During fiscal year 1966, refined procedures were instituted for reporting worldwide movement of selected HIVAC items using the

Military Standard Requisitioning and Issue Procedures (MILSTRIP) and Military Standard Transaction Reporting and Accounting Procedures (MILSTRAP). Under these procedures, changes reported in an item's custodial status, condition or movement have improved support responsiveness. Management has also been provided with a more expeditious and economical tool to audit material consumption, to monitor asset control, and to procure HIVAC items in a scientific and timely manner.

Project ACCESS

Developed through fiscal year 1966 and planned for Fleet-wide implementation is the Afloat Consumption, Cost and Effectiveness Surveillance System (ACCESS) which was designed to fulfill three major objectives. The first is the measurement of the supply readiness of individual ships by improving inventory control. The second promotes effective management of supply and equipage funds to meet deficiencies in readiness, and the third provides standardized management reports to type commanders through modern information reporting systems. The 10 basic reports provide essential supply and management information to permit improved supply management, funding, and inventory control.

The 3-M System

The Navy Maintenance and Material Management System (3-M), begun in 1963, is designed to integrate maintenance and supporting supply actions at the organizational level (ships and aviation squadrons), and at the intermediate level (tenders, and Naval and Marine Corps Air Stations), and ultimately at the level of shipyards, aircraft overhaul facilities, and so on. It is now being implemented at the first two levels.

The basic objectives of the system are threefold: to achieve the

highest readiness state of the weapon system, to perform maintenance at the lowest possible organizational level, and to minimize expenditure of men, money and material.

The system became effective for aviation material reporting in August 1965. The reporting procedures are intended to permit management to relate material issues and returns to weapon systems and components, to apprise management of material expenditures, and to extend weapon system costing to intermediate and organizational levels. The Aviation Supply Office receives 3-M data from the Navy's Maintenance Support Office, charged with responsibility for processing all 3-M data, and summarizes them to obtain for each weapon system such management information as average time awaiting parts, number of removals, authorized attrition rates, and authorized exchange pool quantities.

The system has the potentiality, from the standpoint of supply management, to produce data reflecting procurement/distribution of material, allowance revisions, supply effectiveness measurement, and costing.

Improvements in Navy Stock Fund Accounting Procedures

Several actions were initiated in fiscal year 1966 to improve the accuracy and utility of accounting records of the Navy Stock Fund. One of the improvements initiated includes strengthening of the internal review function at field commands. This involves realignment of the personnel assets, if required. An additional improvement consisted of simplified reconciliation of certain stores accounting vouchers, thus freeing personnel to provide added concentration in other areas. Further steps were also taken to simplify Navy Stock Fund accrual accounting procedures. The Navy directed attention to the backlog of documents

related to Stock Fund and Inventory Accounting and the need for reducing it. As a result, unreconciled documents in NSA stores returns over six months old were reduced by 48.1 percent and those under six months old were reduced by 37.5 percent.

Section D - Air ForceRedistribution and Marketing Control and Accounting System

The Air Force approved for implementation an ADP system for maintaining the accountable records covering redistribution and marketing (disposal) activity at all Air Materiel Areas (AMAs). Advantages of this new system include availability of a wide range of management products to assure an orderly flow of excess and surplus property through these processes, tighter control of redistributable/disposable assets, more timely response to customer queries, and increased overall capability.

The pilot AMA (San Antonio) has installed all incidental equipment and is testing the system concepts. It is anticipated that the systems will be in operation at all AMAs in the near future.

Revision of the Stock Balance and Consumption Report (SB&CR) Format

The format of the SB&CR, a perpetual inventory report, was revised for the 30 September 1965 and subsequent reports. The principal changes were the addition of a Due-In-From-Maintenance (DIFM) column to show the quantity of recoverable items flowing through base maintenance facilities from time the item is removed as unserviceable until turned in to supply, the addition of columns to show base requirements data, i.e., demand level, requisitioning objective, and war reserve level, and provision for a breakout of "usage" data (not reparable this station, reparable this station, and condemnations) that will permit more accurate development of requirements factors.

Implementation of Daily Critical Item Reporting System

The system, instituted during fiscal year 1966, provides asset and

stock level information daily to inventory control point managers with respect to all items determined to be critical. The report is used to redistribute items, determine asset position worldwide of "potential" critical items, and evaluate validity of base back orders for critical items. Identification of critical items is made by the Inventory Manager.

Mechanized Inventory System for Parts in Directorate of Maintenance Shops

A mechanized inventory system was established to record and control parts issued to the Directorate of Maintenance Shops. It records issues and costs of inventory within the various work centers.

The system was implemented at Oklahoma City Air Materiel Area in conjunction with the management of items subject to repair to provide a better support of parts for the repair shops. In this first implementation, approximately \$4.0 million of excess parts were recovered. When all Air Materiel Areas implement this system, it is estimated that maintenance inventories will be reduced by \$15.0 million.

Financial Inventory Accounting on Ground Communications-Electronics-Meteorological (CEM) Equipment In-Use

A new financial reporting system was installed under which the value of all Air Force-owned CEM equipment in-use is reported. The initial report was as of 30 June 1966 and will be updated semi-annually to coincide with the as of dates of the DOD Management and Transaction Reports for Materiel Assets.

Input to the system will be provided from the following sources: the value of installed Air Force-owned base wire and telephone systems reported will be reported to AFLC by the Ground Electronics Equipment

Installation Agency at Rome, N.Y.; the value of the standard communications security equipment is reported by the USAF Cryptologic Depot; unit costs for most CEM items are contained in the Program Communications-Electronics Support Program (PCSP) Command workbooks. Commands will indicate estimated unit cost for CEM equipment in records which do not reflect a unit cost.

Ammunition and Chemical, Biological, Radiological (CBR) Items Held
By Army

A new financial accounting system was installed under which Air Force-owned ammunition and CBR items, held by Army, are recorded in the Command FIA system at Ogden AMA. The Army Ammunition and Procurement Supply Agency provides the initial dollar balance for each stock number by Army storage locations, and complete transaction data each month. The system provides a computer program to convert Army card formats into the Air Force format necessary for input to the FIA system.

Redesign of Requirements Inventory Analysis Reports (RIARs)

The RIAR Systems covering "Economic Order Quantity" and "Recoverable" items were redesigned to implement DOD Instruction 4140.24, Requirements Priority and Asset Application for Secondary Items. In addition to being used as management tools to check the effectiveness of requirements computation policies, the RIARs are used as source documents for the DOD inventory reports for both supply management and budget purposes. The standard stratification for the Air Force was implemented 31 December 1965.

Implementation of Materiel Utilization Control Offices

Materiel Utilization Control Offices (MUCO) were established at the Oklahoma City, Ogden, San Antonio, Sacramento, and Warner Robins Air

Materiel Areas. These offices function as AMA single contact points for management and utilization of long supply assets. The MUCO is responsible for the interservice supply support, reclamation, contractor utilization screening, and disposal programs. Contributions to the cost reduction program through increased use of excess equipment and supplies in lieu of procurement by the Warner Robins MUCO have been validated at \$16.7 million. It is anticipated that the AMAs will achieve substantial MUCO savings which will be reported through the cost reduction reporting system.

Policy Change on Retention Levels

The retention level policy for items under an economic order and stockage concept was changed to preclude disposal of active items having an extended dollar value of less than \$5,000. This change from the previous minimum of \$500 was implemented to reduce the number of disposal actions for items having a small dollar impact upon the overall disposal program. Items excluded from disposal are restratified as economic retention stock. The system was implemented by Oklahoma City AMA on a service-test basis using data from the 28 February buy computations. The test showed that raising the minimum dollar value for consideration eliminated 67 percent of the number of items being considered for disposal, but only 10 percent of the dollar value.

NORS Control Centers

Control centers have been established in Air Materiel Areas to serve as the single contact point through which all requisitioning activities may obtain status information on all requisitions that deal with equipment that has been found not operationally ready because of supply

deficiencies (NORS). These centers were given adequate guidance to commence immediate operation. The establishment and operation of these centers alleviates problems experienced in the past by follow-up activities in obtaining rapid valid information respecting the status of high priority requests.

Rapid Area Supply Support

To assist the Commanders of Air Force combat units in overcoming logistics problems, Rapid Area Supply Support (RASS) teams have been assembled and dispatched to several newly built or expanded Southeast Asia bases to support our increased air strength in that section of the world.

The RASS team is assembled at AFLC AMAs to provide the exact skills and experience needed to assist assigned bases in the reduction of backlogs in their logistics workloads. The assignments are for periods of 60 to 180 days as required to accomplish the backlogged workload. Teams are composed of all military, all civilian, or a military/civilian combination as skill requirements demand.

The utilization of RASS teams is at present confined to Southeast Asia. The principle may be utilized any place in the world where Air Force has a need due to hostile actions, natural disasters or other emergencies. As of 31 May 1966, a total of 16 RASS assistance visits had been completed. These 16 teams, consisting of over 400 AFLC military and civilian personnel, provided approximately 32,000 man-days of assistance.

Technical Order Status Reporting System

A new directive establishes at base level a mechanized system of

reporting the status of technical orders, i.e., orders for correcting a technical deficiency in an aircraft or other piece of equipment, that carry a specified time for compliance. The new system provides accounting and status information for individual orders and also permits consolidating these data at higher command levels. Reports derived from this system are designed to provide management information for planning, staffing, and controlling TCTO compliance within each command. Records and reports derived from this system will replace selected monthly reports previously furnished to the commands by AFLC, and will permit commands to track a technical order through a series of events from time of receipt until it is complied with. Extensive manual record keeping tasks previously accomplished by the commands will be eliminated.

Excess Modification Kit Status Report

The AFLC data automation proposal to provide an Excess Modification Kit Status Report has been approved by USAF. This system will match all modification kits in supply at each AMA against the active technical order listing. Kits for which the technical order has been rescinded will be reviewed by the technicians, and obsolete and unneeded kits will be coded for disposal or disassembly. This report permits a semi-annual review of AMA disposal actions relating to excess modification kits and serves as a policing medium for AFLC in evaluating AMA policy implementation.

Implementation of Standard Base Support System

During January 1966, standard ADPE systems were installed at Warner Robins and Sacramento AMAs. Logistics Command base support activities for the first time are being supported with the same ADPE, which will

enable the Command to measure effectiveness and assure a standard operation at all AMAs.

The principal features of these systems are random processing capabilities, pre-post capability, timely reporting of serviceable, repairable, and technical order excesses to appropriate inventory managers without physical movement, uniform control over items due in from maintenance, capability of mechanically maintaining full interchangeable data, daily update of stock level demand data, and standardization.

O&M Materiel Financial Management

Significant improvements have been made in the base-funded O&M supply and equipment area in the last year. Actions taken include (a) revision of the "Annual Requirements and Inventory Position Statement"; (b) publication of fiscal year end validation procedures; (c) publication of guidelines for requisition review prior to obligation; (d) development of a program for identification of those items having large annual requirements or those in a long supply position; (e) completion of a study on items in long supply to determine causes for generation and the economics of the redistribution program for long supply materiel; (f) publication of guidelines for establishment of materiel working groups to manage funds at base level; and (g) adoption of simplified procedures for preparation of financial plans at base and command level.

These actions have assisted the Air Force in making maximum utilization of available resources in a program which has grown from \$420 million in fiscal year 1963 to over \$840 million in fiscal year 1966.

Automatic Data Processing Management Evaluation and Assistance
Office (EAO)

Increasing dependence upon automatic data processing equipment for combat operations support, logistics control, and management information has resulted in proportionate increases in ADP inventories requiring intensified management of facilities. Consequently, two offices located at Wright-Patterson AFB, Ohio, and McClellan AFB, California, were established to aid in the overall management of ADP installations to analyze utilization and to evaluate data systems performance. In the past, the Air Force Data Automation Directorate was able to cover only 5 percent of field installations; over 50 percent coverage was attained in fiscal year 1966 by the EAO teams.

The EAO teams have, in addition to their function as a management tool of the headquarters, assisted the ADP installations in the following: made recommendations for the discontinuance of low use items or consolidation of equipment; exchanged the most efficient methods and procedures between installations; and reduced rental and maintenance payments by assisting ADP installations in selecting the most advantageous contract options.

Section E - Defense Supply AgencyGeneral

As of 30 June 1966, the Defense Supply Agency, with headquarters at Cameron Station, Alexandria, Virginia employed 52,425 full time civilians and utilized 1,129 military personnel in its operations.

The following is a list of the major DSA Field Activities and their headquarters:

Defense Personnel Support Center, Philadelphia, Pa.
Defense Fuel Supply Center, Cameron Station, Alexandria, Va.
Defense General Supply Center, Richmond, Va.
Defense Industrial Supply Center, Philadelphia, Pa.
Defense Construction Supply Center, Columbus, Ohio
Defense Electronics Supply Center, Dayton, Ohio
Defense Industrial Plant Equipment Center, Memphis, Tenn.
Defense Logistics Services Center, Battle Creek, Michigan
Defense Depot, Memphis, Tenn.
Defense Depot, Ogden, Utah
Defense Depot, Mechanicsburg, Pa.
Defense Depot, Tracy, Calif.
Defense Documentation Center, Cameron Station, Alexandria, Va.

Defense Contract Administration Services Regions have been established at New York, San Francisco, Boston, Cleveland, Chicago, Los Angeles, St. Louis, and Atlanta, in addition to those activated in fiscal year 1965 at Philadelphia, Detroit, and Dallas.

Transfer of Logistics Responsibility

There has been no significant change in the size of the DSA management package in fiscal year 1966. Total items in FSCs assigned to DSA decreased about one-half of one percent to 2,398,700. DSA centrally-managed items decreased about 2.6 percent to 1,333,800 and local purchase items decreased 6.3 percent to 209,700, but items managed by the military services increased 4.5 percent to 855,200.

In accordance with direction from the Assistant Secretary of Defense

(I&L), all DOD items of supply in Federal Supply Classes and Groups assigned DSA for integrated management previously coded for management retention by military services prior to 1 July 1965 are being reviewed and recoded in accordance with criteria outlined in DSAM 4140.5. This retroactive coding program commenced 1 July 1965 and will continue through second quarter fiscal year 1968. During fiscal year 1966 the military services reviewed 149,202 retroactive items, 96,177 of which were coded to DSA for integrated management. Only 6,900 of these were subject to capitalization during fiscal year 1966. It is estimated that overall this program will result in approximately 500,000 codings to DSA for management.

DSA Distribution System

Mechanization of Warehousing and Shipment Procedures. DSA distribution activities, during fiscal year 1966 participated in and contributed to the development of standard internal depot operating procedures. These procedures will be implemented under Project MOWASP (Mechanization of Warehousing and Shipment Procedures). The purpose of MOWASP is to provide uniform data processing capability at each depot so as to maintain detailed transportation data files; preparation and processing of receiving and shipping documents; actions controlling surveillance inspections; and the production of operational and management reports. Additionally, it will provide the optimum mechanization of processes associated with preshipment planning and depot workload forecasting.

The initial environmental testing of MOWASP began at the Defense General Supply Center in May 1966, followed by testing at Defense Depot, Mechanicsburg in July. Other such tests are scheduled to begin at

monthly intervals at other DSA activities.

DSA has also scheduled for operation, a mechanized system for the physical handling of receipt and shipment of small lots in bin and pallet rack storage areas. This system is designed to complement MOWASP. Similar systems, tailored to specific mission requirements, are being developed for operation at each of the other DSA storage activities by July 1969. These machanized systems feature tilt tray carts and sortation units which will for the most part eliminate the continuing need for tote trays, towing system for moving carts to preselected stations, high lift stock selector trucks, and cargo transporters for intra depot use.

Attrition Sites. During fiscal year 1966, DSA continued to reduce its inventories located at attrition sites as well as the number of sites. At 30 June 1964, there were 134,800 short tons located at 42 attrition sites. By 30 June 1965, this had been reduced to 70,000 tons at 21 sites and by 30 June 1966 to 24,130 tons at 19 sites.

DSA Provisioning Supply Support

Provisioning Supply Support Requests (SSRs) from the military services experienced a significant increase during fiscal year 1966 as compared to fiscal year 1965. Additional SSRs for items already being supported increased by 45 percent to a total of 334,316; requests for new items, with Federal Stock Numbers, increased 643 percent to 62,775; while requests for new items, without Federal Stock Numbers increased 231 percent to 125,755.

Utilization Program

The Utilization Program, administered by DSA, has been touched upon

in Part III.A of this report, but some details of the program warrant mention. The brochure-type technique for screening weapon system phase-out property accounted for approximately \$127.1 million of utilization. The technique was further refined to provide a sequential screening, first within the owning service and subsequently, after updating of inventory, to other military services and Defense agencies thereby reducing to a minimum the excessive withdrawal action experienced in the earlier operational phases of this process.

During the year, 589 one-page flyers picturing, describing and advertising the availability of some \$38.9 million worth of items were distributed. Utilization of property amounting to \$36.4 million in acquisition cost was realized from these flyers.

A "front end screening" process was developed and made operational at DLSC to make a preliminary screening of military service Inventory Control Points requirements and assets against fully integrated items managed by the DSA Centers. This front end screening procedure is for the purpose of identifying assets and requirements which conflict with established DSA/military service supply management coding and to thus resolve apparent erroneous asset retention or requirements determination by service ICPs on those items where management responsibility is totally with DSA.

Projects also were developed to assure maximum utilization of property by MAP. A test to determine the feasibility of using DOD excess property for MAP support was developed in coordination with the military services and completed during the year. As a result of the test, \$2.9 million of free-issue materiel was physically received by the U. S. Army

Logistical Center Japan - A MAP ICP.

Project SCRAPE (Screening Country Requirements Against Plus Excesses), initiated to match the net deficiencies in the five-year requirements of selected MAP (Grant Aid) countries against available DOD assets, is now in an operational phase.

Action was taken, specifically with the Federal Aviation Agency and the National Aeronautics and Space Administration, to develop procedures whereby these agencies and subsequently other civilian-type agencies could become participants in the DOD Mechanized Utilization Program.

Two primary responsibilities have been assigned to the Defense Industrial Plant Equipment Center (DIPEC): (1) to maintain master property records of DOD-owned Industrial Plant Equipment (IPE), and (2) to redistribute idle IPE. During this year the Center was responsible for redistributing more than 16,000 pieces of industrial plant equipment which had an acquisition cost of more than \$184 million.

The military departments reused \$160 million worth of this equipment which was credited to the DOD Cost Reduction Program. The remaining \$24 million worth went to other government agencies such as NASA, AEC, FAA, Offices of Economic Opportunity, and the Bureau of the Mint where it was used to overcome production bottlenecks or in lieu of new procurement. In addition, a substantial quantity of general purpose equipment, including machine tools, was loaned to vocational training schools and educational institutions throughout the country under the provisions of Public Law 883.

During the past year, a major accomplishment was the publication of

standards for describing IPE which Defense activities use in preparing property records for their own management uses and for reporting idle IPE to DIPEC. These standards improve communications among Defense activities and between Defense activities and their contractors. Of equal importance is their adaptation to mechanized processing of information thus reducing administrative workloads and costs. Many large private companies have adapted, or are in the process of adapting, these standards to their own management improvement programs. DIPEC standards are published in handbooks which contain the commodity, title, and Federal Supply Classification (FSC). Distribution has been made through normal channels to Defense contractors and military activities.

Disposal Program

DSA is responsible for administering the DOD Excess Surplus and Foreign Excess Personal Property Program in CONUS and overseas. This encompasses redistribution and utilization of excess, surplus and foreign excess property; the disposal by donation, sale, abandonment or destruction of that property determined to be surplus or foreign excess; and the sale of exchange/sale personal property.

Considerable reduction in disposal program costs have been effected by the DSA through consolidation of disposal activities and other improvements. By the end of fiscal year 1966, consolidation of 69 disposal holding activities had been directed. Fifty-two activities had completed consolidation and estimated annual savings reported by 44 of these activities totaled \$1,813,808. Fourteen consolidations remain to be completed and three have been cancelled. Through consolidation the number of Defense Surplus Sales Offices have been reduced to 12 resulting in a

savings of \$1 million for fiscal year 1966. Reduction in costs to print surplus sales catalogs and reduced costs resulting from more selective distribution amounted to \$2.1 million this year.

DSA Engineering and Standardization Programs

The initial fiscal year 1966 DSA Value Engineering goal of \$12 million was exceeded and was increased to \$25.7 million. Audited savings at the end of the third quarter amounted to \$15.7 million, with an additional unaudited \$13.2 million reported during the fourth quarter.

Under the Item Entry Control Program, in fiscal year 1966, DSA Supply Centers completed reviews of 174,148 items proposed for entry into the DOD supply system, and 82,367 items (47 percent) were rejected. DSA Supply Centers, in coordination with the military services, reviewed 283,538 items for essentiality, and identified 116,160 as non-standard and not authorized for future procurement. DSA withdrew from the DOD supply system 164,632 items with stockage history. Under the DOD Cost Reduction Program (Inventory Item Withdrawals), DSA will receive credit for savings totaling \$13 million. A procedure for requesting, evaluating and reporting the adequacy of engineering support provided to DSA by the military departments was tested and placed into operation during fiscal year 1966.

Item Technical Analysis (Project Shakedown)

Project Shakedown, an item technical analysis technique designed to achieve maximum commonality, interchangeability and substitutability of items, is operational in 10 Federal Supply Classes (FSCs). Project Shakedown is to be phased into the DOD Item Entry Control Program during the next six months. As of 30 June 1966, the review of 398,846 FSNs in

the existing 10 FSCs resulted in the elimination of 30,707, and the correction of 141,394 FSNs, as well as much standardization coding.

GENERAL SERVICES ADMINISTRATION,
Washington, D.C., December 28, 1966.

HON. WILLIAM L. DAWSON,
*Chairman, Committee on Government Operations,
House of Representatives, Washington, D.C.*

DEAR MR. CHAIRMAN: Enclosed are four summary tables on real property owned by the United States throughout the world as of June 30, 1966, and a statement on coverage, as requested in your letter of January 25, 1966.

Data on public domain properties under the control of the General Services Administration were forwarded to you on November 29, 1966.

On June 30, 1966, the Federal Government owned real property (worldwide) which cost \$69.3 billion (land and improvements), an increase of \$2.9 billion over last year's report. The Department of Defense accounts for \$46.1 billion, or 66.5 percent; while all other agencies account for \$23.2 billion, or 33.5 percent of the total.

Sincerely yours,

LAWSON B. KNOTT, Jr.,
Administrator.

COVERAGE OF INVENTORY OF REAL PROPERTY OWNED BY THE UNITED
STATES THROUGHOUT THE WORLD, AS OF JUNE 30, 1966

The inventory of real property owned by the United States throughout the world as of June 30, 1966, includes all land, buildings, and other structures and facilities owned by the United States (including wholly owned Government corporations). It is based on detailed inventory reports submitted by the participating agencies as prescribed by Federal Property Management Regulations, part 101-3.

Land reported in the inventory includes unreserved public domain; public domain lands reserved for national forests, national parks, military installations, and other purposes; and land acquired by purchase, donations, and other methods. It also includes land in which the Government has long-term interest which is considered by the reporting agency as being equivalent to ownership.

Buildings or other structures and facilities owned by the Government, whether or not located on Government-owned land, are included in the inventory. Buildings and other structures and facilities in process of construction are included only if they were available for use as of June 30, 1966.

Real property excess to the needs of the reporting agency or surplus to the needs of the United States is included in the inventory.

The Federal Government accounts for real property at cost in accordance with principles prescribed by the General Accounting Office. The inventory consequently shows acquisition cost data for all federally owned real property. Estimated costs (as of date of

acquisition) are used when actual costs are not reasonably ascertainable.

Costs include all capital improvements and such items as plumbing, elevators, heating and lighting fixtures, and air-conditioning systems, which are normally required for the functional use of a building. In addition, costs include such items as safes and vaults, which are built into the structure or are permanently affixed thereto. No costs have been included in this inventory for (1) unreserved public domain; (2) public domain reserved for national parks, national forests, military installations, and other purposes; and (3) historical sites, when such sites have been acquired by methods other than by purchase. However, the acreage for such lands is included in the inventory.

Inventory data are presented in three major geographical groupings: (1) United States; (2) outlying areas of the United States (e.g., Commonwealth of Puerto Rico, Virgin Islands); and (3) foreign countries. The Department of Defense reported only summary data, separately for each State, covering number of installations, acreage, number and floor area of buildings, and costs for its military functions in Alaska and Hawaii. The Department of Defense also reported only overall summary data on total acres and total costs for its military functions located in outlying areas of the United States and in foreign countries.

Excluded from the inventory are lands administered by the United States under trusteeship by authority of the United Nations and lands owned by the sovereign governments of the various outlying areas of the United States. The inventory excludes properties acquired through foreclosure, confiscation, or seizure to be disposed of in settlement of a claim or debt to the Federal Government. It also excludes property owned by the District of Columbia government.

Machinery, processing equipment, demountable and movable structures, as well as furniture and special use items which are not considered part of the realty reported, are also excluded from the inventory.

Easements, rights-of-way, as well as improvements to land, buildings, or structures and facilities occupied by the Government as lessee, are excluded. However, federally owned buildings and/or structures and facilities located on leased land are included.

ARCHITECT OF THE CAPITOL,
Washington, D.C., December 1, 1966.

HON. WILLIAM L. DAWSON,
Chairman, Committee on Government Operations,
House of Representatives, Washington, D.C.

MY DEAR MR. CHAIRMAN: In response to your request of January 25, 1966, I hereby submit a valuation of the personal and real property under my control or care, owned by the U.S. Government on June 30, 1966, as established by an inventory taken as of this date.

REAL PROPERTY

1. Land.....	\$96, 896, 447
2. Buildings and improvements.....	399, 042, 872
Total real property.....	495, 939, 319

Property under this heading is stated at estimated present-day evaluation and includes land acquisitions and property improvements which occurred during fiscal year 1966. The following properties are included: U.S. Capitol Building, Senate Office Buildings, House Office Buildings and Grounds, site of an additional Senate Office Building, site of an additional House Office Building and appurtenant facilities for the House of Representatives, Senate Garage, Capitol Power Plant, Main and Annex Library of Congress Building and Grounds, U.S. Botanic Garden and Nursery.

We are also enclosing for your information a copy of the report on real property held as of June 30, 1966, prepared for and submitted to the U.S. Senate Appropriations Committee. Property listed in this report is valued at acquisition cost.

Yours very truly,

J. GEORGE STEWART,
Architect of the Capitol.

REPORT OF FEDERAL REAL PROPERTY AS OF JUNE 30, 1966

U.S. CAPITOL BUILDINGS AND GROUNDS

Properties under legislative branch of the Government, occupied by the Congress.

Land

Acquired by purchase.

Acquired: 1791 to 1965.

Area: 171 acres.

Cost: \$28,642,445.

(Includes site acquired in 1949-60 for additional office building for U.S. Senate and in 1956-65 for additional office building and appurtenant facilities for U.S. House of Representatives).

Buildings

U.S. Capitol, Senate and House Office Buildings and Senate Garage.

Constructed: 1793 to 1966.

Floor area: 5,807,579 square feet.

Cost: \$205,013,042 (to June 30, 1966).

1. Occupancy and use of these buildings and grounds controlled by the Congress.

2. Assignment and reassignment of space in Capitol under Speaker of House of Representatives and Senate Committee on Rules and Administration; in Senate Office Buildings under Senate Committee on Rules and Administration; in Cannon, Longworth, and Rayburn House Office Buildings under House Office Building Commission; in Senate Garage under Senate Committee on Rules and Administration.

3. Architect of the Capitol has the physical care of these properties.

CAPITOL POWER PLANT

Property under the legislative branch of the Government. Supplies heat and air-conditioning refrigeration for the Capitol, Senate and House Office Buildings, for the Library of Congress Buildings and U.S. Supreme Court Building; heat for U.S. Botanic Garden, Legislative Garage, Government Printing Office, Washington City Post Office, and Folger Shakespeare Library.

Land

Acquired by transfer.

Acquired: 1904.

Area: 6 acres.

Cost: Transferred without cost by act of Congress.

Buildings

Main powerplant building: 244 feet by 117 feet, with maximum height of 85 feet.

Annex powerplant building: 90 feet by 50 feet, 2 stories high.

Refrigeration plant building: 123 feet by 80 feet, height approximately 38 feet.

Walk-through tunnels, containing steam and chilled water distribution lines.

Constructed: 1904 to 1954.

Cost: \$21,546,090 (to June 30, 1966).

1. Architect of the Capitol has the physical care and operation of plant.

2. Plant under control of the House Office Building Commission.

LIBRARY OF CONGRESS BUILDINGS

Properties under legislative branch of the Government, occupied by the Library of Congress.

Land

Acquired by purchase:

Acquired: 1886 to 1932.

Area: 15 acres.

Cost: \$1,496,779.

Buildings

Main and Annex Buildings, Library of Congress:

Constructed: 1889 to 1938.

Floor area: 1,600,000 square feet.

Cost: \$26,767,401 (to June 30, 1966).

1. Occupancy and use of buildings and grounds controlled by the Congress.

2. Architect of the Capitol has structural and mechanical care of these properties.

3. All other care, including assignment and reassignment of space, under the Librarian of Congress.

U.S. BOTANIC GARDEN

Properties under legislative branch of the Government, occupied by the U.S. Botanic Garden, including Poplar Point Nursery.

Land

Acquired by purchase, transfer, and public domain:

Acquired: 1851 to 1946.

Area: 33 acres.

Cost: \$981,140.

Buildings

Conservatories, greenhouses, office, storage and potting sheds:

Constructed: 1873 to 1933.

Floor area: 89,000 square feet.

Cost: \$1,775,673 (to June 30, 1966).

1. Architect of the Capitol serves as Acting Director of U.S. Botanic Garden.

2. Botanic Garden under control of Joint Committee on the Library.

U.S. SUPREME COURT BUILDING

Property under the Chief Justice of the United States, occupied by the U.S. Supreme Court and the Administrative Office of the U.S. Courts.

Land

Acquired by purchase:

Acquired: 1929-30.

Area: 8 acres.

Cost: \$1,768,741.

Building

U.S. Supreme Court Building:

Constructed: 1931-35.

Floor area: 392,737 square feet.

Cost: \$10,617,800 (to June 30, 1966).

1. Occupancy and use of building and grounds controlled by the Congress.

2. Architect of the Capitol has structural and mechanical care of building.

3. All other care under Marshal of the Court, except assignment and reassignment of space which is under the Court.

PART VI

INVESTMENTS IN RELATED AREAS (REALTY)

NOTE.—PHS Indian Health Station, Wellpinit, Wash., buildings under "Improvements" are no longer carried at zero value.

PHS comprehensive project, Metuchen, N.J., reported for the 1st time (acquired by transfer from Corps of Engineers).

U.S. DEPARTMENT OF THE INTERIOR,
OFFICE OF THE SECRETARY,
Washington, D.C., October 27, 1966.

HON. WILLIAM L. DAWSON,
*Chairman, Committee on Government Operations,
House of Representatives, Washington, D.C.*

DEAR MR. DAWSON: In accordance with your request of January 25, 1966, and our acknowledgment of February 8, 1966, enclosed are the following tabulations covering public domain properties as of June 30, 1966:

Table I: Estimated market value of public domain lands administered by the U.S. Department of the Interior, together with the amount of land involved, average value per acre by State, and actual cost of the improvements on such land.

Table II: Cost of buildings on public domain land by predominant use.

Table III: Cost of structures on public domain land by predominant use.

Table IV: Changes in public domain withdrawals and restorations by Federal agencies during fiscal year 1966.

Table V: Mineral resources value of the public domain.

Also enclosed are reports by States, on GSA form 1166, covering lands carried at "zero value" in the GSA real property inventory, as of June 30, 1966. All lands reported in this category are historical sites under the jurisdiction of the National Park Service.

Sincerely yours,

N. O. WOOD, JR.,
Director of Management Operations.

U.S. DEPARTMENT OF JUSTICE,
Washington, D.C., September 14, 1966.

HON. WILLIAM L. DAWSON,
Chairman, Committee on Government Operations,
House of Representatives, Washington, D.C.

DEAR MR. CHAIRMAN: Your letter of February 4, 1966, requested certain data on the present-day evaluation of real property presently reported at \$1 or less for accounting purposes.

Our report is as follows:

Location	Number of acres	Use	Estimated evaluation
Carrizo Springs, Tex.....	0.30	Border patrol station.....	\$3,000
Eagle Pass, Tex.....	.69	do.....	5,500
Laredo, Tex.....	21.10	Border patrol sector headquarters.....	10,000
Sierra Blanca, Tex.....	.42	Border patrol station.....	3,000
Zapata, Tex.....	1.88	do.....	15,000
El Centro, Calif.....	4.60	Pistol range.....	4,600
Do.....	3.00	Border patrol sector headquarters.....	75,000
Total.....	31.99	116,100

Sincerely,

ERNEST C. FRIESEN, JR.,
Assistant Attorney General for Administration.

TREASURY DEPARTMENT,
Washington, D.C., November 1, 1966.

HON. WILLIAM L. DAWSON,
*Chairman, Committee on Government Operations,
House of Representatives, Washington, D.C.*

DEAR MR. CHAIRMAN: Referring to your letter of January 26, 1966, addressed to the Secretary, and the reply of January 28, 1966, there are enclosed reports showing the estimated present-day value of acreage (exclusive of public domain) listed in the Treasury Department's Report of Owned Real Property as having no acquisition, or negligible, costs, for the following:

U.S. Treasury Building and Annex: Washington, D.C.

Bureau of the Mint: U.S. Bullion Depository, West Point, N.Y.

Bureau of Customs: Installations at various locations.

U.S. Coast Guard: Installations at various locations.

The acquisition costs of buildings, structures, and facilities located on the sites referred to in these reports are shown in the report of owned real property submitted to the General Services Administration as of June 30, 1966.

Sincerely,

A. E. WEATHERBEE,
Assistant Secretary for Administration.

1 Buildings, structures, and facilities computed at acquisition (known or estimated) cost, and these figures are included in the Federal realty section of this report.

DEPARTMENT OF AGRICULTURE,
Washington, September 30, 1966.

HON. WILLIAM L. DAWSON,
Chairman, Committee on Government Operations,
House of Representatives.

DEAR MR. CHAIRMAN: As you requested on February 4, 1966, here is a tabulation showing by States the acreages and estimated value of the public domain realty administered by the Department as of June 30, 1966.

The various land transactions and statistical adjustments made by the Department during fiscal years 1965 and 1966 resulted in an increase of 106,987 acres and \$8,579,000 of value over the 1964 report.

The Department adjusted previously reported valuations to reflect the land ownership changes and other adjustments made during the past 2 fiscal years. Those shown in the table are our best estimates of the fair market value of public domain land and timber in the Department's custody. These lands, of course, contain or contribute to other public values that are not readily appraisable and that are not included in this report, such as minerals, water, recreation, etc.

I hope these data will be helpful to your committee. If I can be of further assistance, please let me know.

Sincerely yours,

JOSEPH M. ROBERTSON,
Assistant Secretary for Administration.

Enclosure.

U.S. DEPARTMENT OF COMMERCE,
ENVIRONMENTAL SCIENCE SERVICES ADMINISTRATION,
WASHINGTON SCIENCE CENTER,
Rockville, Md., November 15, 1966.

HON. WILLIAM L. DAWSON,
House of Representatives,
Washington, D.C.

DEAR MR. DAWSON: The data covering public domain properties currently used by the Environmental Science Services Administration is forwarded in accordance with your request.

Sitka Magnetic Observatory

1. Number of acres and location :
 - a. Acres : 117.37.
 - b. Location : Sitka, Baranoff Island, Alaska.
2. Description of property :
 - a. Land, wooded land on northern outskirts of Sitka.
 - b. Buildings, all permanent :

<i>Type</i>	<i>Number</i>	<i>Floor space (square feet)</i>
Houses -----	2	4, 551
Storage -----	1	323
Service -----	1	252
Observatory -----	3	2, 167
Total -----	7	7, 293

- c. Facilities, all permanent :
 - Electrical distribution system.
 - Roads and bridges.
 - Sewage system.
 - Water system.
3. Use of land and buildings : A primary magnetic observatory and seismological station.
4. Evaluation of lands and buildings :
 - a. Land ----- \$35, 191
 - b. Buildings ----- 51, 000
 - c. Facilities ----- 4, 000
 - Total ----- 90, 191

Tucson Magnetic Observatory

1. Number of acres and location :
 - a. Acres : 173.
 - b. Location : Tucson, Pima County, Ariz.
2. Description of property :
 - a. Land, desert land located 10 miles east of Tucson.
 - b. Buildings, all permanent.

<i>Type</i>	<i>Number</i>	<i>Floor space (square feet)</i>
Office -----	1	1, 200
Houses -----	2	2, 766
Storage -----	2(3)	778
Observatory -----	10(9)	2, 864
Total -----	15	7, 608

2. Description of property—Continued

c. Facilities, all permanent:

Fencing: 4,400 feet.

Gasoline storage tank: 280 gallons.

Well: 200 foot, with 5,000-gallon storage tank.

Electrical distribution system.

Sewage system.

3. Use of land and buildings: Primary magnetic observatory and seismological station.

4. Evaluation of land and buildings:

a. Land -----	\$310,000
b. Buildings -----	54,000 (51,000)
c. Facilities -----	18,000 (7,000)
Total -----	382,000

There were no changes in the Sitka site and only slight changes in the Tucson site since the last report submitted to you on July 27, 1964. This prior submission reported these as Coast and Geodetic Survey holdings, an agency which is now part of the Environmental Science Services Administration. For your reference, we are indicating the previous data reported in parenthesis beside the item reflecting a change.

If additional information is required, please let us know.

Sincerely yours,

T. P. GLEITER

(For Robert M. White, Administrator).

Recapitulation

Location	Number of acres	Estimated evaluation		
		Land	Buildings	Facilities
Alaska -----	117.37	\$35,191	\$51,000	\$4,000

THE UNDER SECRETARY OF
HEALTH, EDUCATION, AND WELFARE,
Washington, D.C., October 11, 1966.

HON. WILLIAM L. DAWSON,
*Chairman, Committee on Government Operations,
House of Representatives,
Washington, D.C.*

DEAR MR. CHAIRMAN: This is in further response to your letter of January 26, 1966, to Secretary Gardner requesting data by November 1, 1966, on public domain property under the control of the Department of Health, Education, and Welfare as of June 30, 1966, for inclusion in the Federal property inventory report to be published by your committee.

The requested data are enclosed.

Sincerely yours,

WILBUR J. COHEN,
Under Secretary.

NOTE.—The June 30, 1964, report is revised to reflect the following changes:

- (1) Transfer of 0.7 acres of land at Mount Edgecumbe to the U.S. Coast Guard.
- (2) Correctly report public domain lands (previously shown in error as acquired in fee) at San Francisco, Calif.
- (3) Changes in values of land and improvements.

U.S. DEPARTMENT OF THE INTERIOR,
OFFICE OF THE SECRETARY,
Washington, D.C., October 27, 1966.

Hon. WILLIAM L. DAWSON,
*Chairman, Committee on Government Operations,
House of Representatives,
Washington, D.C.*

DEAR MR. DAWSON: In accordance with your request of January 25, 1966, and our acknowledgment of February 8, 1966, enclosed are the following tabulations covering public domain properties as of June 30, 1966:

Table I: Estimated market value of public domain lands administered by the U.S. Department of the Interior, together with the amount of land involved, average value per acre by State, and actual cost of the improvements on such land.

Table II: Cost of buildings on public domain land by predominant use.

Table III: Cost of structures on public domain land by predominant use.

Table IV: Changes in public domain withdrawals and restorations by Federal agencies during fiscal year 1966.

Table V: Mineral resources value of the public domain.

Also enclosed are reports by States, on GSA form 1166, covering lands carried at "zero value" in the GSA real property inventory, as of June 30, 1966. All lands reported in this category are historical sites under the jurisdiction of the National Park Service.

Sincerely yours,

N. O. Wood, Jr.,
Director of Management Operations.

TABLE V.—Mineral resource value¹ of the public domain,² estimate of October 1966

[In thousands of dollars]

State	Estimated value ³ (rounded off)	Principal sources
Alabama	180	Oil and gas; coal.
Alaska	184,860	Do.
Arizona	4,970	Oil and gas; phosphate; potash; sodium; other.
Arkansas	1,800	Oil and gas.
California	178,370	Oil and gas; coal; phosphate; potash; sodium; other.
Colorado	186,650	Oil and gas; coal; potash; sodium; other.
Florida	10	Oil and gas.
Idaho	9,990	Oil and gas; phosphate.
Kansas	7,730	Oil and gas.
Louisiana	10,000	Oil and gas; other.
Michigan	100	Oil and gas.
Minnesota ⁴	2,900	Copper and nickel.
Mississippi	520	Oil and gas.
Montana	122,360	Oil and gas; coal; phosphate; sodium.
Nebraska	60	Oil and gas.
Nevada	26,430	Oil and gas; phosphate; potash; sodium; other.
New Mexico	657,330	Oil and gas; coal; potash; sodium; other.
North Dakota	10,280	Oil and gas; coal; phosphate; sodium.
Oklahoma	7,920	Oil and gas; coal; other.
Oregon	120	Do.
South Dakota	4,200	Oil and gas.
Utah	207,030	Oil and gas; coal; phosphate; potash; other.
Washington	6	Oil and gas; coal; other.
Wyoming	847,290	Oil and gas; coal; phosphate; potash; sodium; other.
Subtotal	2,471,106	
Outer Continental Shelf ⁵	4,400,000	Oil and gas; sulfur; salt.
Total	6,871,106	

¹ For the purpose of establishing a "real estate" value of the public domain, mineral resource values are the capitalized value of income accruing to the Federal Treasury. This income is almost entirely derived from minerals subject to mineral leasing acts. Only negligible income is derived from minerals subject to location under the mining laws because they pass from Federal ownership upon discovery before discovery, they have only speculative assignable value best reflected in the surface values. Building stone, sand and gravel, and similar materials subject to disposal under the materials act are also reflected in surface values.

² Includes lands transferred from the public domain; excludes acquired lands.

³ Predicated on present receipts from mineral leases, licenses, and permits taking into account probable future production and demand factors; capitalized (except where noted) as an annuity for 50 years at 4 percent compound interest and discounted to present value. Estimate of October 1966.

⁴ Minnesota copper and nickel royalty estimates are capitalized as the present value, at 4 percent compound interest, of a 25-year annuity deferred 25 years.

⁵ The "Outer Continental Shelf" estimate is preliminary, subject to change with production experience, with litigation, and with technologic developments.

U.S. DEPARTMENT OF JUSTICE,
BUREAU OF PRISONS,
Washington, D.C., October 3, 1966.

HON. WILLIAM L. DAWSON,
House of Representatives,
Washington, D.C.

MY DEAR CONGRESSMAN DAWSON: In response to your letter dated January 26, 1966, we are furnishing below a list of public domain land under control of the Federal Prison Service as of June 30, 1966:

U.S. Penitentiary, Alcatraz, Calif.—The 22.5 acres of land valued at \$178,000, buildings valued at \$1,606,000, and other structures and facilities valued at \$406,000, making a total of \$2,190,000 was transferred to the custody of General Services Administration in 1964.

Federal Reformatory, El Reno, Okla.—At present there are 3,505 acres of public domain land at this institution valued at \$224,000. The difference in acreage since the 1964 report was caused by an adjustment in acreage to agree with deed records (added 26.2 acres) and returned 100.7 acres to public domain, which was added to the city of El Reno by the Department of the Interior. The buildings are presently valued at \$2,379,000 and other structures and facilities valued at \$727,000, making a total book value of \$3,330,000. Since last report, alterations to existing facilities are valued at \$223,000 and additions to utilities and other facilities amounted to \$417,000.

Federal prison camp, Florence, Ariz.—The 456.5 acres of public domain land are valued at \$10,000. The buildings are valued at \$426,000 and other structures and facilities at \$219,000, making a total book value of \$655,000.

U.S. Penitentiary, Leavenworth, Kans.—The 1,296.4 acres of public domain land are valued at \$188,000. Buildings are presently valued at \$4,847,000 and other structures and facilities at \$1,748,000, making a total book value of \$6,783,000. Differences in value of buildings over the last report in 1964 represents improvements to present buildings, and the difference in value of other structures and facilities represents new electric cable and improvements to roads, curbs, and gutters.

Federal prison camp, Safford, Ariz.—The 240 acres of public domain land are valued at \$2,400. The buildings are presently valued at \$345,000 showing \$14,000 increase since our 1964 report, which represents construction of a service building (garage). Other structures and facilities are valued at \$133,000 showing an increase of \$20,000 as a result of addition to water system. The total valuation is \$480,400 as of June 30, 1966.

The above values listed for public domain land, as heretofore, were excluded from the 1966 fiscal year report on SF 1166 to GSA.

Please advise if any addition information is desired.

Sincerely,

J. C. TAYLOR,
Acting Director.

330 FEDERAL REAL AND PERSONAL PROPERTY INVENTORY

Recapitulation, public domain properties, as of June 30, 1966

Installation	Number of acres	Value of acreage	Value of buildings and facilities	Total value
U.S. Penitentiary, Alcatraz, Calif. (declared excess to GSA)-----	22.5	\$178,000	\$2,012,000	\$2,190,000
Federal reformatory, El Reno, Okla.-----	3,595.0	224,000	3,106,000	3,330,000
Federal prison camp, Florence, Ariz.-----	456.5	10,000	645,000	655,000
U.S. Penitentiary, Leavenworth, Kans.-----	1,296.4	188,000	6,595,000	6,783,000
Federal prison camp, Safford, Ariz.-----	240.0	2,400	478,000	480,400
Total-----	5,610.4	602,400	12,836,000	13,438,400

POST OFFICE DEPARTMENT,
 ASSISTANT POSTMASTER GENERAL,
 BUREAU OF FACILITIES,
 Washington, D.C., July 21, 1966.

Hon. WILLIAM L. DAWSON,
Chairman, Committee on Government Operations, House of Representatives, Washington, D.C.

DEAR MR. CHAIRMAN: Further reference is made to your letter of January 26, 1966, and the Postmaster General's reply dated January 28, in which you requested information concerning public domain properties under the control of the Post Office Department, as of June 30, 1966.

With reference to the post office building at Yellowstone Park, Wyo., the following figures are submitted:

Acres: 0.75.

Land (present day evaluation): \$2,000.

Building (present day evaluation): \$132,000.

Total: \$134,000.

The building is used to house the post office, while the second floor is devoted to living quarters for the postmaster and dormitories for male and female postal employees.

With reference to the post office building at Dutch John, Utah (Flaming Gorge Recreation Area), the building was acquired by the Government in 1962 and transferred to the Post Office Department in December 1965. It is used to house the post office. The valuation of the building, according to the transfer document submitted by the National Park Service, is listed at \$16,593.

The land underlying is listed as 0.45 acres with a value of \$2,000. However, the land was not transferred to this Department, but is being used under a special use permit issued by the Department of the Interior. Therefore, while the building will be included in our inventory as of June 30, 1966, it is understood the land will be reported by the Department of the Interior in its inventory.

Sincerely,

AMOS J. COFFMAN,
Deputy Assistant Postmaster General.

Recapitulation

Location	Acres	Present-day evaluation of land	Present-day evaluation of buildings	Total
Yellowstone Park, Wyo.....	.75	\$2,000	\$132,000	\$134,000
Dutch John, Utah.....	(1)	(1)	16,593	16,593
Total.....	.75	2,000	148,593	150,593

¹ Land (0.45 acres, valued at \$2,000) being reported by Department of the Interior.

TREASURY DEPARTMENT,
U.S. COAST GUARD,
Washington, D.C., November 4, 1966.

HON. WILLIAM L. DAWSON,
*Chairman, Committee on Government Operations,
House of Representatives,
Washington, D.C.*

DEAR MR. CHAIRMAN: The data concerning present-day values of public domain properties under Coast Guard jurisdiction are submitted herewith as requested in your letter of January 26, 1966.

I hope that these data will be of use to your committee in the preparation of another "Federal property inventory report."

Sincerely yours,

P. E. TRIMBLE,
*Vice Admiral, U.S. Coast Guard,
Acting Commandant.*

U.S. ATOMIC ENERGY COMMISSION,
Washington, D.C., October 25, 1966.

HON. WILLIAM L. DAWSON,
Chairman, Committee on Government Operations, House of Representatives, Washington, D.C.

DEAR MR. DAWSON: Reference is made to your letter of January 26, 1966, requesting information as to the value of the public domain land used by the Atomic Energy Commission and the value of AEC-owned improvements thereon as of June 30, 1966.

Enclosed is a staff report with attachments furnishing the requested information.

Sincerely yours,

DONALD C. KULL,
(For General Manager).

Subject: Present value of public domain land used by AEC and the present value of AEC improvements on such land.

Reference: Letter to the Chairman, AEC, from the chairman, House of Representatives Committee on Government Operations dated January 26, 1966, relating to the above subject.

Attached is a tabulation by States, showing (1) the area, the value as of June 30, 1966, and the use of the public domain land controlled by the Atomic Energy Commission in connection with its operations, (2) the number, classification, and value as of June 30, 1966, of "buildings," and the classification and value as of June 30, 1966, of "other structures and facilities" constructed on such land by the AEC. The statistical tabulation has been prepared on the basis of information furnished by field offices using public domain land in accordance with the following instructions:

1. Public domain. For the purpose of the report the term "public domain" was defined as that land within the continental United States, title to which was acquired by the United States of America by treaty, conquest, or cession from the original 13 Colonies and such title is still vested in the United States; and, that land which has acquired the status of public domain by virtue of an act of Congress.

2. Present value of public domain land. The values shown cover the surface land only. Our field offices were advised it was not desired that a formal appraisal be made of such surface land. The value of land reported for this year was based on valuations furnished informally by the Department of the Interior as to the estimated value of public domain lands in 1966. These current valuations, in general, represent the average of all classifications of land in a particular State.

3. Present value of buildings. The estimated present-day value for buildings and other structures and facilities was determined by taking the total net book cost as of June 30, 1966, for each classification reported and applying a ratio from the Engineering News Record for

June 1966 to a corresponding Engineering News Record cost index applicable at the time of construction. In general, this is a cost of production less depreciation method of valuation.

General: When "buildings" and "other structures and facilities" were located on public domain land and nonpublic domain land, effort has been made to prorate that portion of the public domain land. The value for "buildings" excludes the cost of equipment which is not capitalized as a part of the cost of the buildings.

California

PUBLIC DOMAIN LAND

County	Acreage	Value	Usage
Imperial.....	10	0	Weapons testing.

¹ 20,567 acres of public domain land are reported by the Bureau of Reclamation. This acreage is presently being occupied by the Department of the Navy under permit from AEC pending transfer to the Department of the Navy by a public land order.

Colorado

PUBLIC DOMAIN LAND

County	Acreage	Value ²	Usage
Mesa.....	¹ 5,760	\$108,000	Leasing program.

FEDERAL AVIATION AGENCY,
Washington, D.C., October 18, 1966.

HON. WILLIAM L. DAWSON,
*Chairman, Committee on Government Operations,
House of Representatives, Washington, D.C.*

DEAR MR. CHAIRMAN: In accordance with your letter of January 26, 1966, acknowledged by Mr. Stimpson's letter of February 1, 1966, transmitted herewith is a report of the public domain properties under the control of this Agency as of June 30, 1966.

Sincerely,

WILLIAM F. MCKEE,
Administrator.

¹ Facility under construction.

² All improvements transferred to State of Alaska.

³ Buckeye, Granite Peak, and La Cholla beacons have been decommissioned. The Bureau of Land Management has been informed that land is no longer required by FAA. Improvements will be abandoned in place.

⁴ Kingman (Oatman) RCAG facility was not constructed. The land is to be returned to public domain. Salome ILF—650 acres of land returned to public domain by land orders 3369 and 3548. \$33,000 in improvements shown on June 30, 1964, report have been disposed of.

Phoenix VORTAC dropped from report of June 30, 1964. Land is Government owned by FAA.

Deep Lake beacon, decommissioned July 26, 1962, being dropped from June 30, 1964, report.

"None," public domain easements.

⁵ Cave Mountain, Eagle Pass, Francis Springs, Ludlow, and Vincent beacons have been decommissioned. Land will be returned to Bureau of Land Management.

"None," public domain easements.

⁶ Whitewater RCAG is decommissioned. Right-of-way is still required for beacon facility. Value of fixed improvements have been adjusted to cover beacon only.

Fellows VORTAC—Not previously reported pending identification of facility. An additional 30 acres are being withdrawn.

Trona radio range dropped from June 30, 1964, report. Land returned to public domain by public land order 3185.

⁷ Desert Center ILF, GSA, San Francisco, has disposed of all of the land except 117 acres. Pilot Knob beacon, Bureau of Land Management has been requested to return 35 acres to public domain. No order or restoration has been received. Balance of 5 acres will be returned to public domain as beacon has been decommissioned.

⁸ Eagle West beacon increased to include right-of-way.

⁹ Glade Park beacon to be decommissioned Aug. 18, 1966. Will be relinquished fiscal year 1967.

"None"—public domain easements.

¹⁰ Dairy Creek beacon has been decommissioned. The property transferred to Idaho State. Freere Out Mountain beacon has been decommissioned. The property transferred to Idaho State. Huntington beacon has been decommissioned.

Ashton ARSR, equipment garage, and right-of-way, and ARSR Road right-of-way has been dropped from June 30, 1964, report. The land is owned by the Forest Service. (Two entries.)

Pocatello ILS/middle marker has been dropped from June 30, 1964, report. Land is owned by FAA.

"None"—public domain easements.

¹¹ The following airway beacon locations reported in 1964 are no longer required and the land has been returned to public domain:

	Acres

¹² Carlin beacon—dropped from June 30, 1964, report. Land being returned to Bureau of Land Management. Property transferred to Elko County. Elko beacon to GSA for disposition. Glendale beacon—land to be returned to Bureau of Land Management. Property transferred to Clark County. Good-springs beacon—land to be returned to Bureau of Land Management. Property transferred to Clark County. Goodsprings "H"—land to be returned to Bureau of Land Management in lieu of restoration. Humboldt beacon (Las Vegas) to GSA for disposal. Logandale FM—discontinued and disposed of. Dropped from June 30, 1964, report. Needle Peak beacon (Lovelock) to GSA for disposal. Pleasant Valley beacon to GSA for disposal. Apex beacon is decommissioned. Property to Clark County.

¹³ Reno beacon (Vista) is located on same withdrawal as Reno VORTAC.

"None"—public domain easements.

¹⁴ Slight increase in acreage since 1964 report due to additional facilities commissioned at 7 locations.

¹⁵ Requests for revocations of withdrawals have been submitted to Bureau of Land Management, Portland, Ore. Grants Pass beacon—equipment transferred to Forest Service.

¹⁶ Equipment has been transferred in place to U.S. Weather Bureau. Request to revoke the withdrawal and issue permits to U.S. Weather Bureau and Oregon State agencies using the property has been submitted to Bureau of Land Management, Portland, Ore.

"None"—public domain easements.

¹⁷ Hanksville ILF includes living quarters, VORTAC, flight service station.

Footnote continued on following page.

376 FEDERAL REAL AND PERSONAL PROPERTY INVENTORY

Clear Lake beacon—land returned to Bureau of Land Management on Apr. 22, 1965. Property to Utah State. Antelope Island beacon was decommissioned before 1960. Dropped from June 30, 1964, report. Nade Butte beacon—land returned to Bureau of Land Management. Property to Utah State.

"None"—public domain easements.

¹⁸ Timpie beacon is pending return of land to Bureau of Land Management. Property to Utah State. Wendover beacon was decommissioned and disposed of prior to 1965.

¹⁹ Casper VORTAC—in process of increasing size of withdrawn plot.

Dana beacon—relinquished by letter to Bureau of Land Management, Feb. 23, 1966. (Land.)

Granger beacon—relinquished by letter to Bureau of Land Management, Mar. 14, 1966. (Land.)

Green River beacon—relinquished by letter to Bureau of Land Management, Nov. 12, 1965. (Land.)

Laramie radio range—relinquished by letter to Bureau of Land Management, Feb. 23, 1966. (Land.)

Tipton beacon—relinquished by letter to Bureau of Land Management, Feb. 23, 1966. (Land.)

Twenty Mile Hill—relinquished by letter to Bureau of Land Management, Jan. 13, 1965. (Land.)

Point of Rocks fan marker planned for relinquishment in near future.

"None"—public domain easements.

NOTE.—The transfer of 21 Agency owned and operated airports to the State of Alaska under the Omnibus Act resulted in a reduction of 33,201 acres held by F.A.A. The balance of the reduction of 1,343.15 acres from the 1964 report was due to Agency's continuing program to reduce landholdings wherever possible.

GENERAL SERVICES ADMINISTRATION,
Washington, D.C., November 29, 1966.

HON. WILLIAM L. DAWSON,
Chairman, Committee on Government Operations,
House of Representatives, Washington, D.C.

DEAR MR. CHAIRMAN: Enclosed is the tabulation of estimates of present-day values of public domain properties under the control of the General Services Administration, as of June 30, 1966, requested in your letter of January 25, 1966.

A review of General Services Administration's accounting records shows no land (other than public domain) recorded at zero or \$1 for accounting purposes.

The Government-wide real property data, requested in your letter, will be prepared in the same manner as last year and furnished to your committee no later than December 20, 1966.

Sincerely yours,

LAWSON B. KNOTT, JR.,
Administrator.

Estimates of present-day values of public domain properties under the control of GSA as of June 30, 1966

INTERNATIONAL BOUNDARY AND WATER COMMISSION,
UNITED STATES AND MEXICO,
El Paso, Tex., July 12, 1966.

HON. WILLIAM L. DAWSON,
*Chairman, Committee on Government Operations,
House of Representatives, Washington, D.C.*

DEAR CONGRESSMAN DAWSON: Enclosed in duplicate is a detailed listing of the public domain properties under the jurisdiction of this section, as of June 30, 1966, as requested in your letter of January 26, 1966.

This listing indicates the location, number of acres, usage of the properties, estimated value of facilities (no buildings are involved), and estimated value of the land.

We appreciate the opportunity to assist your committee in the preparation of its "Federal Property Inventory Report."

Sincerely,

J. F. FRIEDKIN, *Commissioner.*

INTERNATIONAL BOUNDARY AND WATER COMMISSION, UNITED STATES AND MEXICO, U.S. SECTION

*Estimate of present-day market value of public domain property under
jurisdiction of this section as of June 30, 1966*

(1) 2,395.28 acres of public domain property are under the jurisdiction of this section:

NOTES

All the above land is in the Rio Grande canalization project or is used as source of materials used on the project.

(EOF numbers) shown in location description are I. B. & W. C. file numbers.

The facilities shown were constructed by the project and are described as follows:

¹ River channel and river bank protected by rock.

² River channel.

³ River channel, river bank protected by rock, and levee.

⁴ Canyon diversion, channel and dike.

Estimated values of lands were increased by 20 percent this year based on information received from the office of U.S. Bureau of Land Management in Las Cruces, N. Mex.

Note.—Above 19.33 acres are at Morelos Dam on the Colorado River and were withdrawn for use of the Department of State in connection with Mexican Water Treaty of Feb. 3, 1944.

Values of lands were increased by 100 percent this year based on information received from the office of U.S. Bureau of Reclamation in Yuma, Ariz.

VETERANS' ADMINISTRATION,
OFFICE OF THE ADMINISTRATOR OF VETERANS AFFAIRS,
Washington, D.C., October 28, 1966.

HON. WILLIAM L. DAWSON,
Chairman, Committee on Government Operations,
House of Representatives,
Washington, D.C.

DEAR MR. CHAIRMAN: AS requested in your letter of January 26, 1966, there is enclosed a list showing the desired information concerning public domain properties under the jurisdiction of the Veterans' Administration.

Sincerely,

W. J. DRIVER, *Administrator.*

APPENDIX A
TREASURY DEPARTMENT
REGULATIONS
RE FINANCIAL STATEMENTS

TREASURY DEPARTMENT

FISCAL SERVICE

Washington

REGULATION RELATING TO THE SUBMISSION OF CERTAIN FINANCIAL
STATEMENTS BY GOVERNMENT AGENCIES

Department Circular No. 966
Supplement No. 1 (Revised)

Fiscal Service
Bureau of Accounts

TREASURY DEPARTMENT,
OFFICE OF THE SECRETARY,
Washington, D.C., June 16, 1965.

To Heads of Departments and Agencies and Others Concerned:

PURPOSE OF THIS SUPPLEMENT

1. This revision has as its basic purpose the clarification and updating of requirements for descriptive narrative (a) on the source of data for the reports submitted; (b) explanation of the accounting bases, principles, and standards; (c) the nature of underlying assets and liabilities; and (d) such other information as may be of assistance in the proper evaluation of such reports. The basic purpose is set forth in paragraph 5.

In addition, this revision consolidates, without substantive change, all amendments and instructions issued subsequent to January 30, 1956, the date of the basic regulation and instruction.

With the effective date of this revised supplement, the following releases are hereby rescinded: Supplement No. 1 to Department Circular No. 966, dated June 1, 1956, and instructions relating thereto, and the Amendment of Instructions under Department Circular No. 966, dated June 23, 1960.

AMENDMENTS TO DEPARTMENT CIRCULAR NO. 966 REGULATIONS DATED
JANUARY 30, 1956

2. Paragraph 3 of the regulations is amended by adding the following subparagraph:

"d. Each executive agency and activity not included in the preceding subparagraphs."

3. The first sentence in paragraph 6 of the regulations is amended to read as follows:

"Agencies responsible for the administration of corporate or noncorporate activities of the type specified in subparagraphs a, b, and c of paragraph 3 shall furnish all of the following periodic

financial statements for each such activity, whereas agencies referred to in subparagraph 'd' of paragraph 3 are requested to furnish only the Statement of Financial Condition referred to in subparagraph 'a' of this paragraph."

AMENDMENTS TO INSTRUCTIONS UNDER DEPARTMENT CIRCULAR NO. 966

4. Paragraph 5 of the Instructions is amended to read:

"The reports required shall cover all programs and activities under the control of the agency reporting, including those operations conducted in the territories or overseas. Trust programs or activities will be reported separately and so identified. Agencies maintaining accounts at the bureau level will submit individual bureau reports without consolidation. Assets and liabilities accounted for at the departmental level and not included in the individual bureau reports should be reported separately so that all assets of the department will be included. Where there are several regional corporations or institutions in a financial system performing identical functions, such as the 12 banks of the Federal intermediate credit bank system, consolidated statements shall be prepared and submitted for the system. Separate statements for each regional corporation or institution are not required. Where a single fund operated by an unincorporated agency covers activities made up of unlike functions, agencies may be requested to submit separate statements on a program or functional basis."

5. Paragraph 6 of the Instructions is amended to read:

"As stated in the regulations, one of the principles upon which the Treasury Department is proceeding in connection with its responsibility for preparing central financial reports is that such reports should present fairly the financial condition and results of operations of the agencies as shown by their books and supporting records. Therefore, all statements submitted shall be supported by a descriptive narrative summary as follows:

"(a) A general description of the accounting system including (1) the extent to which the accounting system is on the accrual basis; (2) the extent to which the financial statements are based on an integrated set of accounts; (3) where data are derived from non-integrated records, the nature of such records and the accounting or statistical controls thereover, and the basis for any estimates used; and (4) whether the accounting system underlying all or specified segments of the financial statements has been approved by the General Accounting Office under section 113 of the Budget and Accounting Procedures Act of 1950 (31 U.S.C. 66(a)), or has been submitted to the General Accounting Office for approval. In either case the date of approval or submission for approval should be indicated.

"(b) A statement of accounting principles and standards applied to major accounts, covering such matters as (1) basis of valuation—whether at cost, market, appraisal, or other basis; (2) inventory method—whether on first-in-first-out, weighted average or other method; (3) method of determining allowances for losses; and (4) method of computing depreciation and amortization.

“(c) A description of each major account group as to the nature of the underlying assets or liabilities, terms and conditions of financial agreements, and other factors having a material bearing on the interpretation of the statements. The descriptive narrative shall be presented in the same order in which the account groups appear in the statements, and may be combined with the material required by subparagraph (b) above.”

The submission of this descriptive material shall be effective for all statements submitted for the fiscal year ending June 30, 1965, but need not be repeated thereafter unless there has been a change from the preceding report (in which case an explanation of the change should be made, including the effect, if any, on comparability with the financial statements of the preceding June 30). Each set of financial statements thereafter submitted to the Treasury should carry a reference to the most recently submitted descriptive material and indicate that it is still applicable. From time to time the Treasury Department may ask for revised descriptive statements. This descriptive material does not eliminate the need for current notes to the financial statements dealing with specific matters of significance in interpreting the data.

6. Paragraph 7 of the instructions is amended as follows:

(a) Insert schedule 4a in proper numerical sequence:

Statement or schedule	Frequency	Original to Treasury	Two copies to Budget Bureau
4a Direct and Guaranteed Loans.....	Annually.....	X	X

(b) Delete “Description of Items” and references thereto, inserting in lieu thereof:

“Description of Accounting Support (see par. 5 above)”

(c) Change the address to whom the original of each statement and schedule should be submitted to read:

“Division of Central Accounts and Reports,
Bureau of Accounts,
Treasury Department.”

7. Delete paragraph 8 of the Instructions.

8. Paragraph 9 of the Instructions is amended to read:

“Reporting agencies shall exercise care to insure consistency of data submitted under these regulations with any similar information reported to committees of the Congress, the Bureau of the Budget, the General Accounting Office, and other Government agencies, or with the regularly published reports of the agency. Where periodic financial reports dealing with financial condition and results of operations stated on the accrual basis are prepared by the agency and are published for general distribution, one copy thereof shall be furnished to the Division of Central Accounts and Reports, Bureau of Accounts, Treasury Department, and two copies to the Bureau of the Budget at the time the report becomes available.”

9. Paragraph 19 of the Instructions is amended as follows:

(a) Revise the first sentence to read:

"Report in this group the balance of outstanding loans receivable made, purchased, or acquired by rediscount, also purchase money mortgages and similar long-term paper accepted in the sale of acquired security or collateral."

(b) Insert a new subparagraph (d) in connection with schedule 4a (see par. 6 above) relating to "Direct and Guaranteed Loans" which reads:

"(d) Report on schedule 4a both the direct and insured or guaranteed loans, by agency and program, as illustrated in the suggested form attached. This schedule should be submitted as of June 30 of each year. If an agency prepares reports for internal use, containing substantially the data called for in schedule 4(a), such reports will be accepted in lieu of the suggested form."

10. The third sentence of paragraph 21 of the instructions, relating to the reporting of buildings, structures and facilities in process of construction, is amended by deleting the period and inserting a comma, followed by:

"and will be reported and so identified on line 36 of form 220 rather than on lines 30 and 31."

11. The first two sentences of paragraph 22 of the instructions are amended to read:

"22. *Other assets.*—Report under this group all other assets which cannot be properly classified under any of the previous asset groups. Real estate or installment sales contracts and other owned property will be reported under this group."

12. In the case of agencies reporting under paragraph 3d of the regulations to Department Circular No. 966 (see par. 2 above), line 68 may be used for reporting the amount of "Unexpended Appropriations" and line 69 may be used for reporting "Invested and Donated Capital" or its equivalent. Such titles shall be typed in.

EFFECTIVE DATE

13. The provisions of this revised supplement to Department Circular No. 966 are effective immediately.

JOHN K. CARLOCK,
Fiscal Assistant Secretary.

¹ On guaranteed or insured loans report as outstanding the U.S. portion of guarantee only, with footnote as to the amount held by private lenders, if any.

² Show the total including the Government guaranteed and amount of private participation with footnote as to extent of private participation. Where authorization is indefinite as to amount, the amount of loans outstanding may be repeated in this column,

with appropriate note. Also indicate if the authorization is for a limit on the amount outstanding at any one time or on the cumulative amount of loans that can be made. If the authorization covers loans and grants, show the amount available for loans only.

³ Report in these columns the minimum and maximum range based on administrative determination of the agency and/or statutory provisions.

TREASURY DEPARTMENT

Washington

REGULATION RELATING TO THE SUBMISSION OF BUSINESS-TYPE
FINANCIAL STATEMENTS BY GOVERNMENT CORPORATIONS AND
CERTAIN UNINCORPORATED AGENCIES

1956
Department Circular No. 966

Fiscal Service
Bureau of Accounts

TREASURY DEPARTMENT,
OFFICE OF THE SECRETARY,
Washington, D.C., January 30, 1956.

To Heads of Departments and Agencies and Others Concerned:

PURPOSE OF REGULATION

1. The financial statements and related information to be submitted under these regulations are required to furnish financial information for use by the Treasury Department in discharging its responsibility under the Budget and Accounting Procedures Act of 1950 for compilation of overall financial reports of the Government, and for use by the Bureau of the Budget in following through with the budgetary programs of the reporting agencies.

AUTHORITY FOR REGULATION

2. This regulation is issued pursuant to Section 114 of the Budget and Accounting Procedures Act of 1950 (31 U.S.C. 66b) which authorizes the Secretary of the Treasury to require from agencies reports and information for the effective performance of his responsibility for preparing such reports for the information of the President, the Congress, and the public as will present the results of the financial operations of the Government. As authorized by said section, the regulation provides for the furnishing of such financial data as are required by the Director of the Bureau of the Budget.

SCOPE OF REGULATION

3. This regulation requires the submission of financial statements by corporate and noncorporate Government agencies of the following character:

a. All wholly owned and mixed ownership Government corporations specifically included in the Government Corporation Control Act and amendments thereto, or subsequently brought under the provisions of that Act.

b. All other activities of the Government operating as revolving funds (accounts symbolized 4000-4999 and 8400-8499 by the Treasury Department), for which business-type public enterprise or intragovernmental fund budgets are required by the Bureau of the Budget.

c. Other activities or agencies (1) which are of a business-type nature; or (2) whose operations, services, or functions are largely self-liquidating or primarily of a revenue producing nature; or (3) whose operations result in the accumulation of substantial inventories, investments or other recoverable assets. Agencies and other activities to report under this category will be designated by the Fiscal Assistant Secretary of the Treasury.

ISSUANCE OF INSTRUCTIONS

4. Financial statements and related information under this regulation shall be prepared and submitted by the agencies concerned, in the form and the manner prescribed in the procedural instructions issued by the Fiscal Assistant Secretary of the Treasury.

WAIVERS

5. The Fiscal Assistant Secretary of the Treasury is authorized to waive the provisions of this regulation in whole or in part as to any agency or activity when it is determined that full compliance by such agency or activity is not necessary to accomplish the overall objective to obtain information required for the preparation of financial reports or for the purposes of the Bureau of the Budget.

PERIODIC REPORTS REQUIRED

6. Agencies responsible for the administration of corporate or non-corporate activities of the type specified in paragraph 3 shall furnish for each such activity periodic financial statements, as follows:

a. A *Statement of Financial Condition* showing the assets, liabilities, and investments of the United States Government in the enterprise.

b. A *Statement of Income and Expense and Changes in Accumulated Net Income (or Deficit)* showing in condensed form the earnings or losses arising from operations and changes in accumulated net income (or deficit) for the fiscal year to the end of the reporting period.

c. A *Statement of Sources and Application of Funds* showing the manner in which funds have been applied to the acquisition of assets, to expenses, and to retirement of borrowings and capital; the manner in which funds have been provided by the realization of assets, by income, by borrowings and capital contributions; and from which the net effect of such operations on the budget for the Government as a whole can be determined.

d. A *Statement of Long-range Commitments and Contingencies* containing a short description of the program and a statement showing the gross amount outstanding of loans guaranteed or insured by the reporting agency, insurance programs, obligations issued on credit of or guaranteed by the United States, long-range commitments and other contingent liabilities, and assets held as offsets to such liabilities.

ACCOUNTING SUPPORT FOR REPORTS

7. One of the principles upon which the Treasury Department is proceeding in connection with the responsibility for preparing central financial reports is that such reports should present fairly the financial conditions and results of operations of the agencies as shown by their books and records. Hence, agencies shall furnish the Treasury Department with such information regarding the accounting basis for their reports submitted under this regulation, as may be required for proper evaluation of such reports.

EFFECTIVE DATE

8. This regulation, with the concurrence of the Director of the Bureau of the Budget, supersedes Budget-Treasury Regulation No. 3, dated September 1, 1944, and revised March 15, 1947, issued pursuant to Executive Order No. 8512 of August 13, 1940, as amended by Executive Order No. 9084 of March 3, 1942, and shall be effective with the period ending March 31, 1956.

W. RANDOLPH BURGESS,
Acting Secretary of the Treasury.

TREASURY DEPARTMENT

FISCAL SERVICE

Washington

INSTRUCTIONS UNDER TREASURY DEPARTMENT CIRCULAR NO. 966

Relating to the submission of business-type financial statements by
Government corporations and certain unincorporated agencies

I. GENERAL

AUTHORITY FOR INSTRUCTIONS

1. These instructions are issued pursuant to Treasury Department Circular No. 966, issued under the authority contained in Section 114 of the Budget and Accounting Procedures Act of 1950 (31 U.S.C. 66b).

SCOPE OF INSTRUCTIONS

2. These instructions explain the kinds of reports and other information to be furnished to the Treasury Department under the regulation; the periods of time to which the reports shall relate; and other reporting specifications, including information concerning accounting support of the data reported.

3. All questions pertaining to the regulations or these instructions should be submitted to the Bureau of Accounts, Treasury Department.

KINDS OF REPORTS AND INFORMATION REQUIRED

4. The financial statements shall be submitted on the following standard forms:

Standard Form 220. Statement of Financial Condition

Standard Form 221. Statement of Income and Expense

Standard Form 222. Statement of Sources and Application of Funds

Standard Form 223. Statement of Long-range Commitments and Contingencies

The printed forms may be purchased through the General Services Administration. Supporting schedules to be submitted as hereinafter required should be prepared or reproduced on letter size (8 by 10½ inches) paper with appropriate title and references. Minus or "red" figures should be indicated by an asterisk (*). A duly authorized officer of the reporting agency will sign the original Standard Form 221. The copies need not be signed but should bear the name of the signing officer.

5. Where there are several regional corporations or institutions in a financial system performing identical functions, such as the twelve banks of the Federal intermediate credit bank system, consolidated statements shall be prepared and submitted for the system. Separate statements for each regional corporation or institution are not required. Where a single fund operated by an unincorporated agency covers activities made up of unlike functions, agencies may be requested to submit separate statements on a program or functional basis.

6. Each item group reported on the Statement of Financial Condition and the Statement of Long-range Commitments and Contingencies submitted for the last quarter in each fiscal year, should be described, in reasonable detail, outlining the accounting principles followed in reporting each item group on these statements unless such descriptive material is included in annual reports of the agencies submitted under paragraph 8 below. The description of the item groups should cover such subjects as (1) nature of accounts, e.g., whether on a cash, accrual, or modified accrual basis; (2) basis of reporting, e.g., whether at cost or some other value; (3) methods used in determining and reporting allowances for losses; (4) extent of departure from the account classifications provided in the regulation; and (5) extent, if any, of departure in reporting from the preceding year. The descriptive matter should be presented in the same order in which the respective item groups appear in the statements.

Reporting periods and distribution of statements

Description of Items.....	Annually.....	X	X

The statements due quarterly as of the quarters ending September 30, December 31, March 31, and June 30 of each year shall be submitted on or before the 15th of the second month following those dates, except that all statements required at the fiscal year end should be submitted as soon as possible following the close of the fiscal year, but not later than the following September 30. Schedule 2—Investments in Public Debt Securities, provided for in paragraph 14f, shall be submitted each month within twenty days after the month for which it is rendered. The original of each statement and schedule shall be submitted to:

Report Preparation Branch
Division of Central Reports
Bureau of Accounts
Treasury Department

Two copies of each statement indicated above for the Bureau of the Budget shall be submitted directly to that agency at the same time the originals are sent to the Treasury.

8. Any corporation or agency required to report under this regulation, which prepares an annual financial report for publication or general distribution outside the agency, shall furnish one copy thereof to the Division of Central Reports, Bureau of Accounts, Treasury Department and two copies to the Bureau of the Budget at the time the report becomes available for distribution.

ACCOUNTING SUPPORT FOR REPORTS

9. As stated in the regulation, one of the principles upon which the Treasury Department is proceeding in connection with its responsibility for preparing central financial reports is that such reports present fairly the financial condition and results of operations of agencies, as shown by their books and records. The statements for the period ending June 30 should be in agreement with the corresponding statements submitted annually to the Bureau of the Budget for the last completed fiscal year, recognizing that the arrangement and grouping of items in accordance with the prescribed forms of this regulation may not provide a breakdown that is identical in all respects with that required for the corresponding Budget statements.

EFFECTIVE DATE

10. These procedural instructions shall be effective with the reports to be submitted for the quarter ending March 31, 1956.

II. STATEMENT OF FINANCIAL CONDITION

GENERAL

11. The *Statement of Financial Condition (Standard Form 220)* will show in condensed form the assets, liabilities, investment of the United States Government, and other capital of each of the reporting corporations and enterprises. The items to be reported under each classification are described below with appropriate reference to the line number on Standard Form 220. For purposes of uniformity, reporting agencies will adhere to the group classifications provided. Certain group classifications contain blank lines for reporting items

to be determined and titled by the reporting agency. Supporting detail for certain items shall be furnished in supplemental schedules as indicated. Other supplemental schedules in addition to those specified herein may on occasion be requested from selected reporting agencies.

12. *Interagency Items*.—Interagency receivables and payables representing amounts due to and from other Federal Government agencies on open accounts, notes, or similar indebtedness will be reported on the separate lines provided therefor under the appropriate asset and liability groups on the Statement of Financial Condition. Any reporting agency holding securities or a proprietary interest in the capital of another Government agency will report such holding under investments and include the same as a separate item in Schedule 3 (see paragraph 14f). Bonds, debentures, and notes payable of the reporting agency which are payable to other Government agencies shall be reflected on Schedule 5.

REPORTING OF ASSETS

13. *Cash and Fund Balances*.—Report under this group cash belonging to the reporting agency or held for the account of others, including unexpended balances of funds made available by appropriation. Balances on deposit in banks and in the Treasury should be reflected on a basis of confirmed deposits and checks issued and consistent with the basis for determining unexpended balances of appropriations and funds in the Treasury central accounts. The itemization hereunder will show:

a. *Cash in banks (line 1)*.—Report on this line cash in commercial banks which is subject to withdrawal by the reporting agency for regular operations.

b. *Cash on hand and in transit (line 2)*.—Report on this line cash on hand. Imprest funds and advances with agent cashiers will be included only in cases where the amount of the initial advance was made from a commercial bank account or was treated as a reduction in the fund balance available with the United States Treasury. Imprest funds, advances to agent cashiers, and all other cash on hand not related to specific appropriations or funds but treated as part of the accountability of disbursing officers shall not be included. This item will also include collections undeposited and deposits for which certificates of deposit have not been confirmed by depositaries as of the close of the period except where such amounts have been included in the accountability of disbursing officers.

c. *Fund balances with United States Treasury*.

(1) *Operating funds (line 3)*.—Report on this line (a) amounts available in general, special, and revolving fund accounts including all amounts on deposit in corporation checking accounts with the Treasurer of the United States and on deposit with the Treasurer as special agent for the payment of matured principal and interest of bonds and debentures; and (b) unexpended balances of allocated working fund advances made to other agencies.

(2) *Trust and deposit funds (line 4).*—Report on this line balances of trust and deposit fund accounts which have been segregated as such under separate symbols in the Treasury and for which the liabilities are included on lines 46 and 47.

(3) *Allocations from other agencies (line 5).*—Report on this line unexpended balances of allocation and allocated working fund advances received from other agencies, regardless of the type of fund account from which advanced (consolidated reports prepared by the Treasury will eliminate this line together with the corresponding liability).

d. *Supplemental Schedule 1.*—A schedule showing the distribution by appropriation and fund account symbol of the amounts reported under "Cash and Fund Balances," by line item, will be presented in accordance with the format illustrated. In those instances where the statement covers only a single fund, the symbol of the fund may be shown in the stub for the appropriate line in lieu of submitting a separate schedule. Once each year, as of June 30, the amount of "Cash in banks" (line 1) will be itemized by bank, location, and amount in accordance with the format illustrated as Schedule 1a.

14. *Investments.*—Report under this group securities acquired and held for investment purposes. The itemization hereunder will show:

a. *Public debt securities (par value) (line 6).*—Report on this line the par value of investments in bonds, notes, bills or other public debt obligations issued by the United States.

b. *Securities of wholly owned Government enterprises (line 7).*—Report on this line investments in securities of wholly owned Government enterprises, including evidences of obligations, capital stock and paid-in surplus. Such securities shall be reported at par.

c. *Unamortized premium or discount (line 8).*—Report on this line the amount of unamortized premium (+) or discount (—) applicable to the securities reported on lines 6 and 7.

d. *Other securities (line 9).*—Report on this line all securities acquired and held for investment purposes other than those reported on lines 6 and 7 above. Such securities shall be reported at par, plus or minus unamortized premium or discount, if any.

e. *Allowance for losses (line 10).*—Report on this line the estimated losses on "Other securities" line 9.

f. *Supplemental Schedules 2 and 3.*—The supporting data for "Public debt securities (par value)" (line 6) will be prepared *monthly* as illustrated by Schedule 2 and submitted each month within 20 days after the month for which it is rendered. Data supporting "Securities of wholly owned Government enterprises" (line 7) and "Other securities" (line 9) will be prepared *quarterly* to accompany the Statement of Financial Condition. The amounts of investments shown on line 7 shall be supported in detail in Schedule 3 showing for each issue, the name of the issuing agency, the date of the issue, the interest rate, the call and maturity dates, the par and book values, and whether guaranteed or not guaranteed by the United States. Investments reported on line 9 shall be shown on Schedule 3 itemized to show securities of mixed-ownership and Government-sponsored corporations separately from securities in other general classifications.

15. *Advances to Contractors and Agents.*—Report under this group the amount of unapplied advances outstanding with contractors or agents. The itemization hereunder will show:

a. *Government agencies (line 11).*—Report on this line advances made to other Government agencies net of the unexpended balances remaining in allocated working funds advanced to such agencies. (Since an advancing agency normally debits an advance account for the full amount of advances made, a reporting adjustment will be necessary at the end of each period transferring from this account to "Operating funds" line 3, an amount equal to the unexpended balance remaining in any allocated working fund held by the receiving agency. No such adjustment is necessary where the advance is made to a revolving fund or consolidated working fund.)

b. *Other (line 12).*—Report on this line the balance of advances made to private contractors and other individuals, except where such advances are included in the accountability of a disbursing officer.

16. *Accounts and Notes Receivable.*—Report under this group accounts and notes receivable. Notes receivable under this item normally should include only those short-term notes that have been accepted in liquidation of open accounts as distinguished from loans made in connection with authorized lending programs which should be reported under "Loans Receivable." The itemization hereunder will show:

a. *Government agencies (line 13).*—Report on this line receivables due from other Government agencies, exclusive of advances which are to be reported on line 11 above.

b. *Other (line 14).*—Report on this line the amount of accounts and notes receivable due from other than Government agencies, exclusive of advances which are to be reported on line 12 above.

c. *Allowance for losses (line 15).*—Report on this line the estimated losses on "Accounts and Notes Receivable—Other."

17. *Inventories.*—Report under this group inventories purchased, produced or acquired by forfeiture of loan collateral or donation. The itemization hereunder will show:

a. *Commodities for sale, finished goods, etc. (line 16).*—Report on this line commodities, completed work not yet delivered or finished goods available for sale or delivery though sometimes used by the reporting agency.

b. *Work-in-process (line 17).*—Report on this line the value of work-in-process.

c. *Materials and supplies (line 18).*—Report on this line supplies or materials to be used in the manufacture of a finished product or charged to expense when used. (Supplies normally charged to expense at time of purchase shall not be included.)

d. *Allowance for losses (line 19).*—Report on this line the estimated losses which may be realized on the disposition of the above inventories.

18. *Accrued Interest Receivable.*—Report under this group accrued interest receivable. The itemization hereunder will show:

a. *On public debt securities (line 20).*—Report on this line the amount of accrued interest receivable on direct obligations of the United States issued by the Treasury. The accrual should be

computed on the same basis that the Treasury Department computes the accrued interest liability, as set forth in Treasury Department Circular No. 300, Revised, dated April 30, 1955.

b. *On securities of other agencies (line 21).*—Report on this line accrued interest on securities of other Government agencies. This item would include interest on obligations issued by other Government agencies whether guaranteed or not guaranteed by the United States.

c. *Other (line 22).*—Report on this line all accrued interest receivable not reported on lines 20 and 21.

19. *Loans Receivable.*—Report in this group the balance of outstanding loans receivable made, purchased or acquired by rediscount. The amounts reported hereunder will include matured and unmatured principal; extensions, and advances to borrowers. Deposits of borrowers held subject to refund or disbursement on behalf of the borrowers will be reported under the group "Trust and Deposit Liabilities." The itemization hereunder will show:

a. *Government agencies (line 23).*—Report on this line loans to Government agencies, which will usually be evidenced by notes receivable or other similar obligations.

b. *Other (line 24).*—Report on this line loans to other than Government agencies made pursuant to authorized lending programs of the agency. The amount of other loans will be supported by supplemental Schedule 4, showing the following information:

(1) *Loans to aid agriculture.*—Report under this item loans to farmers and to institutions whose primary purpose is to aid agriculture. In this classification will be included loans to agricultural credit corporations; cooperative associations; crop, livestock, and commodity loans; farm mortgage loans; and similar loans.

(2) *Loans to aid homeowners.*—Report under this item loans to homeowners and to institutions whose primary purpose is to aid homeowners. In this classification will be included mortgage loans; reconditioning loans; loans to savings and loan associations; and similar loans.

(3) *Loans to aid industry.*—Report under this item loans to industrial and commercial enterprises. In this classification will be included loans to railroads, manufacturing concerns, and public utilities; ship construction and reconditioning loans; and similar loans.

(4) *Loans to aid States, Territories, etc.*—Report under this item loans to public bodies, such as States, Territories, possessions, municipalities, and similar governmental subdivisions.

(5) *Loans to aid financial institutions.*—Report under this item loans to general financial institutions such as banks, insurance companies, loan companies, and other similar financial institutions.

(6) *Foreign loans.*—Report under this item loans to foreign governments and private entities in foreign countries.

(7) *Other loans.*—Report under this item loans which cannot be appropriately classified under any of the previous loan classifications.

c. *Allowance for losses (line 25).*—Report on this line the estimated losses on "Loans Receivable—Other" (line 24).

20. *Acquired Security and Collateral.*—Report under this item real estate and other mortgage property and pledged collateral acquired and held for sale, including real estate acquired subject to redemption. This acquired security or collateral should be reported net of prior mortgages or liens not assumed. Where the reporting agency has assumed any mortgages or liens in connection with the acquisition of security or collateral, the value of such assets will be reported gross and the mortgage or lien assumed will be reported under "Other Liabilities" (line 52 or 53).

a. *Real estate (line 26).*—Report on this line real estate, including improvements, acquired in the liquidation of loans.

b. *Other (line 27).*—Report on this line other types of security and collateral acquired in the liquidation of loans where the collateral acquired is not commingled in the accounts of the agency with similar items purchased.

c. *Allowance for losses (line 28).*—Report on this line the estimated losses on "Acquired Security and Collateral."

21. *Land, Structures, and Equipment.*—Report under this group the cost of real and personal property acquired by purchase, donation or other methods of acquisition. Residential and farm properties, and other real estate and improvements acquired through foreclosure incident to a lending operation or other Federal-aid projects will not be reported in this section but will be included on line 26. Real property shall be determined for lines 29, 30, and 31 in accordance with General Services Administration Circular No. 80, as supplemented, except that buildings, structures and facilities in process of construction shall be included whether or not "available for service" as of the reporting date.

Line 32 "Leasehold improvements" shall include the cost of easements, rights-of-way, and leasehold improvements to land, buildings, or structures, and facilities occupied by the Government as lessee. However, cost of Government-owned buildings, structures, and facilities located on leased land shall be included on lines 30 and 31 as appropriate.

Line 33 "Machinery and equipment" shall include the cost of machinery and processing equipment, motor vehicles, office machinery, furniture, etc.

Accumulated depreciation (line 34) should represent the amount of depreciation (including amortization of leasehold improvements) applicable to the properties listed which has been charged to costs or depreciation expense.

22. *Other Assets.*—Report under this group all other assets which cannot be properly classified under any of the previous asset groups. Real estate or installment sales contracts, purchase money mortgages, and similar long-term paper acquired in the sale of acquired security or collateral or other owned property will be reported under this group.

a. *Deferred and undistributed charges (line 35).*—Report on this line prepaid expenses, unamortized discount on bonds or debentures issued and outstanding and other deferred charges applicable to the operations of future periods as well as debits arising from disbursements or other charges, the distribution or final disposition of which has not been made.

b. *Blank lines (lines 36 and 37).*—Report on these lines, with appropriate descriptive titles, any other assets which cannot be properly classified under any of the previous asset groups.

c. *Allowance for losses (line 38).*—Report on this line the estimated losses on "Other Assets."

REPORTING OF LIABILITIES

23. *Accounts Payable.*—Report under this group accounts payable consisting of amounts owed to creditors on open account (including voucher schedules not yet accomplished by disbursing officers). The itemization under this group will show:

a. *Government agencies (line 40).*

b. *Other (line 41).*

24. *Accrued Liabilities.*—Report under this group accrued interest and other accrued liabilities. Insofar as practicable, similar liabilities which have matured should be reported under "Accounts Payable." The itemization hereunder will show:

a. *Government agencies (line 42).*—Report on this line accrued liabilities due Government agencies including accrued interest due the Treasury.

b. *Other (line 43).*—Report on this line all other accrued liabilities, including interest on obligations issued to the public.

25. *Advances from.*—Report under this group the amount of unapplied advance payments received for goods or services to be furnished by the reporting agency. The itemization hereunder will show:

a. *Government agencies (line 44).*—Report on this line the amount due Government agencies for advance payments received, including any unliquidated liability for goods and services in connection with an advance of funds under section 601 of the Economy Act or similar legislation (regardless of the type of fund from which advanced).

b. *Other (line 45).*—Report on this line all other liabilities arising from advance payments for goods and services.

26. *Trust and Deposit Liabilities.*—Report under this group the liabilities for amounts held in trust or on deposit (including the unexpended balances of trust fund appropriations) covering such items as cash collateral, proceeds of loans held for the borrowers, time and demand deposits, withholding tax and United States savings bond deductions, undeposited general fund receipts, and other deposits held subject to refund or application. The itemization hereunder will show:

a. *Government agencies (line 46).*—Report on this line the trust and deposit liabilities due Government agencies, including such items as withheld Federal taxes and undeposited general fund receipts.

b. *Other (line 47).*—Report on this line all other trust and deposit liabilities not recorded under line 46.

27. *Bonds, Debentures, and Notes Payable.*—Report under this group the par value of all outstanding bonds, debentures, notes, and other obligations of a similar character held by the public or other Government agencies (other than the Treasury). The itemization hereunder will show:

a. *Government agencies (line 48).*—Report on this line bonds, debentures, notes, etc., issued to other wholly owned Government corporations and agencies (other than the Treasury). Borrowings from the Treasury are to be reported under "United States Interest."

b. *Other (line 49).*—Report on this line bonds, debentures, notes, etc., issued to other than wholly owned Government corporations and agencies. All marketable obligations shall be reported here even though a portion may have been acquired by another Government agency.

c. *Supplemental Schedule 5.*—Information on the balances reported on these lines will be submitted as illustrated on supplemental Schedule 5 "Bonds, Debentures, and Notes Payable" showing the character, date of issue, the interest rate, the call and maturity dates, the par value of each issue outstanding and whether guaranteed by the United States. The fact that another Government agency may own marketable obligations issued to the public by the reporting agency need not be reported.

28. *Other Liabilities.*—Report under this group deferred and undistributed credits and on the blank lines provided, with appropriate descriptive titles, all liabilities which cannot be properly classified under any of the other liability groups.

a. *Deferred and undistributed credits (line 50).*—Report on this line deferred income, unamortized premium on bonds or debentures issued and outstanding and other credits applicable to operations of future periods as well as items arising from receipts or other credits, the distribution or final disposition of which has not been made.

b. *Accrued annual leave (line 51).*—Report on this line the amount of unpaid annual leave which has been charged to cost.

c. *Blank lines (lines 52 and 53).*—Items relating to loans receivable discounted with recourse, and guaranteed loans or other agreements of a guaranteed nature which are subject to redemption by the reporting agency at the option of the holder should be reported here. Any other liabilities which cannot be classified under any other liability group shall be reported here with appropriate descriptive title.

29. *Reserves.*—Report on blank lines 54 and 55 operating reserves established for deferred maintenance, liability reserves, reserves established for the benefit of equity holders and other similar special reservations of earnings not classified as part of the "Accumulated net income or deficit" of the enterprise.

REPORTING OF NET INVESTMENT—PRIVATE INTEREST

30. *Private Interest.*—Report under this group the amount of capital provided from non-governmental sources and the accumulated income or deficit applicable thereto. The par value of the capital stock held by the public will be reported on line 57, and the accumulated net income or deficit, segregated as between reserved and unreserved, on lines 58 and 59.

REPORTING OF NET INVESTMENT—UNITED STATES INTEREST

31. *Interest-Bearing Investment.*—Report under this group capital stock, paid-in capital, paid-in surplus, advances from revolving funds, bonds, notes, or other capital items provided directly by the United States Treasury or through other Government agencies where interest is payable, without regard to earnings, to the Treasury or other Government agencies on such capital investment items. The itemization hereunder will show:

a. *Capital stock (line 60).*

b. *Borrowings from Treasury (line 61).*—Report on this line borrowings from Treasury represented by notes, bonds, or any other means of borrowing. The amount of unused borrowing authority remaining available shall be reported as a footnote.

c. *Blank line (line 62).*—Report on this blank line, with appropriate title, any additional items necessary to reflect the proper total interest-bearing investment of the United States Government, including advances from revolving funds, paid-in capital, paid-in surplus, etc. The title "Paid-in capital" or "Paid-in surplus" shall be used only for those items of Government investment specifically identified as such in the legislation authorizing the capitalization. Where a portion of the capital made available by Congress for an item reported on this line is retained by the Treasury in a separate revolving fund or other holding account, the gross amount remaining available shall be reported as a footnote.

32. *Non-interest-bearing investment.*—Report under this group capital stock, paid-in capital, paid-in surplus, advances from revolving funds, bonds, notes, appropriations, or other capital items, which are non-interest bearing, provided directly by the United States Treasury or through other Government agencies, including the capitalization of assets. The itemization hereunder will show:

a. *Capital stock (line 63).*

b. *Borrowings from Treasury (line 64).*—Report on this line borrowings from Treasury represented by notes, bonds, or any other means of borrowing. The amount of unused borrowing authority enacted by the Congress shall be reported as a footnote.

c. *Appropriations.*—Report under this group the cumulative amounts made available through congressional appropriations to finance the activity being reported upon, net of appropriation balances rescinded, transferred to "Payment of Certified Claims" or otherwise returned to the Treasury. Agencies operating from other than revolving funds will show on blank lines 65 and 66 a segregation of appropriations as between the amounts expended and unexpended. Revolving fund enterprises may use blank line 66 for reporting the amount of appropriated funds repaid to the Treasury as a capital transfer in those instances where such presentation is required.

d. *Capitalization of assets (line 67).*—Report on this line the net amount derived through recognition of the capitalized value of property, inventory, and other assets on hand at the inception of the fund, donated to the reporting agency or charged to appropriations other than those included in amounts reported on line 65 or 66 above.

e. *Blank lines (lines 68 through 70).*—Report on these lines with appropriate titles any other segregation of the investment of the Government which by statute or otherwise is required for full disclosure, including advances from revolving funds, paid-in capital, paid-in surplus, etc. The titles "Paid-in capital" or "Paid-in surplus" shall be used only for those items of Government investment specifically identified as such in the legislation authorizing the capitalization. Where a portion of the capital made available by Congress for an item reported on this line is retained by the Treasury in a separate revolving fund or other holding account, the amount so retained shall be reported as a footnote.

33. *Accumulated Net Income or Deficit.*—Report under this group the accumulated earnings or losses applicable to the "United States Interest," segregated as between reserved earnings as required by statute or otherwise and unreserved earnings or deficit. The itemization hereunder will show:

a. *Non-revenue producing operations (line 71).*—Report on this line as a deficit (*) item the cumulative net expenses incurred for any programs set up by law to be non-revenue producing and not associated or identified with the regular revenue producing services provided by the agency.

b. *Reserved (line 72).*—Report on this line the reserves which are established by statute or otherwise from annual earnings. Normally direct charges should not be made to such reserves for losses incurred; such losses should be reflected in the income and expense statement.

c. *Unreserved (line 73).*—Report on this line the cumulative deficit or unreserved surplus resulting from operations.

34. *Deposit of General and Special Fund Revenues (line 74).*—Those enterprises which are not permitted to reuse or hold their receipts but are required to deposit their collections into the Treasury as miscellaneous receipts shall report the cumulative amount of such deposits on this line as a deduction from the investment of United States Interest. This will apply only to enterprises that are financed by other than revolving funds.

Standard Form 280

APPENDIX B
GSA REGULATIONS
RE REAL PROPERTY
MANAGEMENT

GENERAL SERVICES ADMINISTRATION
Washington, D.C. 20405

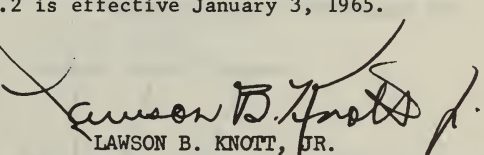

December 22, 1964

FEDERAL PROPERTY MANAGEMENT REGULATIONS
AMENDMENT NO. A-1

TO: Heads of Federal Agencies

SUBJECT: Revision of Subchapter A - General

1. Purpose. This amendment transmits revisions of FPMR Subchapter A-General.
2. Background. The attached material represents the first revision of Subchapter A promulgated to the Heads of Federal Agencies by memorandum of September 14, 1964, from the Administrator of General Services.
3. Explanation of changes.
 - a. Part 101-3, Annual Real Property Inventories, continues previous reporting requirements on this subject.
 - b. Subpart 101-6.1, Commuted Rate Schedule for Transportation of Household Goods, continues in effect the prior regulatory requirements.
 - c. Subpart 101-6.2, Nondiscrimination in Federally Assisted Programs of the General Services Administration - Effectuation of Title VI of the Civil Rights Act of 1964, contains the Presidentially approved regulations of GSA under Title VI to promote nondiscrimination in designated programs or activities.
4. Effect on other issuances.
 - a. Title 1, Personal Property Management, Title 2, Real Property Management, and Title 3, Federal Records, Regulations of the General Services Administration, are superseded.
 - b. General Regulation No. 25, Nondiscrimination in Employment, March 29, 1961, is superseded.
5. Effective dates. Part 101-3 and Subpart 101-6.1 are effective on December 15, 1964. Subpart 101-6.2 is effective January 3, 1965.

LAWSON B. KNOTT, JR.
Acting Administrator of General Services

FILING INSTRUCTIONS AND NOTES

<u>Remove Pages</u>	<u>Insert Pages</u>
iii - Contents of Subchapter A 201	iii-iv - Contents of Subchapter A 201 301-307 349-397 401 601-614

(a) On each page appears the number and date (month and year) of the FPMR Amendment which transmitted it.

(b) Retention of FPMR Amendments and removed pages will provide a history of FPMR issuances and facilitate determining which regulations were in effect at particular times.

(c) Arrows printed in the margin of a page indicate material changed, deleted, or added by the FPMR Amendment cited at the bottom of that page. Where insertion of new material results in shifting of unchanged material on following pages, no arrows will appear on such pages but the FPMR Amendment transmitting such new pages will be cited at the bottom of each page.

→ or ← — Line on which change begins.

→ or ← — Line on which change ends.

→ or ← — Line on which change both begins and ends.

→ or ← — Opposite a blank space, indicates deletion of a division of material (section, subsection, or paragraph).

(d) In the numbering system, all FPMR material is preceded by digit 101-. This simply means that it is Chapter 101 in Title 41 of the Code of Federal Regulations. It has no other significance. The digit(s) before the decimal point indicates the part; the digits after the decimal point indicate, without separation, the subpart and section, respectively, the latter always in two digits; and the digit(s) after the dash indicates the subsection. For example:

CONTENTS OF SUBCHAPTER A — GENERAL

PART 101-1—INTRODUCTION**Subpart 101-1.1—Regulation System**

Sec.

- 101-1.100 Scope of subpart.
- 101-1.101 Federal Property Management Regulations System.
- 101-1.102 Federal Property Management Regulations.
- 101-1.103 Temporary-type FPMR.
- 101-1.104 Publication of FPMR.

SUBCHAPTER A — GENERAL

PART 101-2 [RESERVED]

(NEXT PAGE IS 301)

PART 101-3 ANNUAL REAL PROPERTY INVENTORIES

101-3, 105

§ 101-3.000 Scope of part.

This part prescribes the procedure and forms for use by executive agencies in connection with the preparation of annual reports necessary for the maintenance and publication of inventories of real property owned by and leased to the United States as of June 30 each year.

Subpart 101-3.1—General Provisions**§ 101-3.100 Scope of subpart.**

This subpart deals with the background, objectives, and coverage of reports in connection with the real property owned by and leased to the United States.

§ 101-3.101 Background.

(a) The inventory of Federal real property was initiated and is being continued at the request of the Senate Committee on Appropriations.

(b) The House Committee on Government Operations annually requests data on all Federally-owned real property for inclusion in its real and personal property inventory reports.

§ 101-3.102 Program objectives.

The principal objectives of the Government-wide real property inventory program are:

(a) To provide a centralized source of information on Federal real property holdings,

(b) To achieve the most effective control and economical Government-wide utilization of available property,

(c) To facilitate disposal of surplus property,

(d) To provide a basis for the intelligent evaluation and appraisal of budgetary requirements, and

(e) To establish a ready reference for answering inquiries from the Congress, the press, trade associations, educational institutions, Federal, State, and local government agencies, and the general public.

§ 101-3.103 Coverage.

The inventory reports prescribed in this Part 101-3 shall cover land, buildings, and other structures and facilities throughout the world, which are owned by or leased to the United States, including wholly-owned Federal Government corporations.

§ 101-3.104 Source of data.

Data reported shall be based on agency real property and accounting records.

§ 101-3.105 Agency liaison.

Each reporting agency shall designate an official to serve as agency representative for each of the real property inventories. The same representative may be designated for the federally owned and leased real property inventories. The General Services Administration, Office of Finance and Administration, Washington, D.C. 20405, shall be advised in writing of the names of all such representatives and subsequent changes.

(NEXT PAGE IS 303)

SUBPART 101-3.2 ANNUAL REPORT—REAL PROPERTY OWNED BY THE UNITED STATES

101-3.204(a)(4)

Subpart 101-3.2—Annual Report—Real Property Owned by the United States

§ 101-3.200 Scope of subpart.

This subpart prescribes the procedure and forms to be used by executive agencies in connection with annual reports on real property owned by the United States.

§ 101-3.201 Reporting agency.

Reports on real property owned by the United States shall be submitted by the agency responsible for the maintenance of real property records and accounts as prescribed by General Accounting Office principles and standards and illustrated in 2 GAO 1270 and 2 GAO 7030; i.e., the agency which has control of and the authority to assign and reassign the use of the property or any portion thereof. For purposes of this inventory, the above rule shall apply regardless of the manner of acquisition or which agency is currently using the property. For example:

(a) For general purpose buildings, such as office buildings or warehouses, which are occupied by a Federal agency or agencies upon determination by GSA, and for which GSA is responsible for elevator and guard service, and for cleaning and maintenance, GSA is the reporting agency.

(b) For special purpose buildings, such as Coast Guard stations, military reservations, hospitals, and prisons, those agencies having control of building management and operation including authority to assign or reassign space in such buildings, will be considered as the reporting agencies.

§ 101-3.202 Coverage.

The annual reports of real property owned by the United States shall cover land, buildings, and other structures and facilities owned by the United States throughout the world. These reports shall include the following:

- (a) Unreserved public domain lands.
- (b) Public domain lands reserved for national forests, national parks, military installations, or other purposes.
- (c) Real property acquired by purchase, construction, donation, and other methods.
- (d) Real property in which the Government has a long-term interest con-

sidered by the reporting agency as being equivalent to ownership.

(e) Buildings or other structures and facilities owned by the Government whether or not located on Government-owned land.

(f) Excess and surplus real property. (The reporting agency, as defined in § 101-3.201, shall continue to retain accountability and report excess and surplus real property pending its transfer to a Federal agency or disposal.)

(g) Buildings being acquired under the terms of the Public Buildings Purchase Contract Program or Lease Purchase Agreements (39 U.S.C. 2103, 40 U.S.C. 356). Buildings shall be reported upon completion of construction. Separate annual reports shall also be submitted for real properties held in trust by the Federal Government.

§ 101-3.203 Exclusions.

Annual inventory reports on real property owned by the United States shall not include the following:

(a) Properties acquired through foreclosure, confiscation, or seizure to be liquidated in settlement of a claim or debt to the Federal Government.

(b) Rights-of-way or easements granted to the Government.

(c) Lands administered by the United States under trusteeship by authority of the United Nations.

(d) Machinery and processing equipment which are not part of the realty.

(e) Land held under permit from another Government agency.

§ 101-3.204 Reports to be submitted.

(a) Each agency shall prepare in accordance with instructions in § 101-3.4901-1166(I) and submit to GSA a separate report on GSA Form 1166, Annual Report of Real Property Owned by the United States (see § 101-3.4901-1166) for:

- (1) Each newly acquired or previously omitted installation.
- (2) Each installation received by transfer from another Federal agency which is not merged with an existing installation.
- (3) Each installation with increases or decreases in cost of \$1,000 or more affecting any line item or the total for the installation.
- (4) Each installation declared excess or surplus, in whole or in part.

PART 101-3 ANNUAL REAL PROPERTY INVENTORIES

101-3.204(a)(5)

(5) Each disposal of a complete installation.

(6) Each installation for which a revision of an entry on a previous report is necessary to reflect a change in the name of an installation, date or method of acquisition of property, acreage, number and/or floor area of buildings, or predominant usage category of land, buildings, or other structures and facilities.

(b) Each agency shall prepare, in accordance with instructions in § 101-3.4901-1209(I) and submit to GSA a separate report on GSA Form 1209, Summary of Number of Installations Owned by the United States (see § 101-3.4901-1209) for each bureau or other major organizational unit, for (1) properties in the United States; and (2) properties outside the United States. Reports on GSA Form 1209 shall be submitted

whether or not changes have occurred since the previous report.

§ 101-3.205 Optional reporting method.

Agencies with electrical accounting machine equipment may make arrangements with the GSA, Office of Finance and Administration, to furnish detailed machine listings together with the supporting punch cards, in lieu of GSA Forms 1166. However, GSA Forms 1209 shall be submitted as prescribed in § 101-3.204(b).

§ 101-3.206 Preparation and due dates.

The annual inventory reports prescribed in § 101-3.204 shall be prepared as of June 30, each year. An original and one copy of each report shall be submitted to the General Services Administration, Office of Finance and Administration, Washington, D.C. 20405, not later than September 1.

SUBPART 101-3.3 ANNUAL REPORT—REAL PROPERTY LEASED TO THE UNITED STATES

101-3.306

Subpart 101-3.3—Annual Report— Real Property Leased to the United States

§ 101-3.300 Scope of subpart.

This subpart prescribes the procedure and forms to be used by executive agencies in connection with annual reports on real property leased to the United States.

§ 101-3.301 Reporting agency.

Reports on real property leased to the United States shall be submitted by the agency currently administering the lease and making payments to the lessor, regardless of which agency executed the original lease or is currently using the property.

§ 101-3.302 Coverage.

(a) The annual report of real property leased to the United States shall include all real property leased from private individuals, organizations, and municipal, county, State, and foreign governments, as evidenced by a written agreement involving a monetary consideration and a landlord-tenant relationship. It shall also include right of use and occupancy obtained under eminent domain proceedings or equivalent procedures.

(b) Real property leased rent free or for nominal rental may be included when the property is considered significant by the reporting agency. 35 Comp. Gen. 713 is suggested as a guide to help resolve questions pertaining to the definition of nominal payment.

§ 101-3.303 Exclusions.

Items to be excluded from the annual reports are: (a) real property occupied under permit or other arrangements with other Federal agencies or wholly owned Federal Government corporations; (b) leasehold improvements (Government-

owned buildings or structures located on leased land shall be reported as owned); (c) rights-of-way and easements; and (d) real property leased rent free or for nominal rent when property is not considered significant by the reporting agency.

§ 101-3.304 Reports to be submitted.

(a) Each agency shall prepare, in accordance with instructions in § 101-3.4901-1166A(I) and submit to GSA a report of its leased real property holdings on GSA Form 1166A, Annual Report of Real Property Leased to the United States (see § 101-3.4901-1166A).

(b) Each agency shall prepare, in accordance with instructions in § 101-3.4901-1209A(I) and submit to GSA a separate report on GSA Form 1209A, Comparative Summary of Properties Leased to the United States (see § 101-3.4901-1209A), for each bureau of other major organizational unit, for: (1) properties in the United States; and (2) properties outside the United States.

§ 101-3.305 Optional reporting method.

Agencies with electrical accounting equipment may make arrangements with the General Services Administration, Office of Finance and Administration, to furnish detailed machine listings, together with the supporting punch cards, in lieu of GSA Forms 1166A. However, GSA Forms 1209A shall be submitted as prescribed in § 101-3.304(b).

§ 101-3.306 Preparation and due dates.

The annual inventory reports prescribed in § 101-3.304 shall be prepared as of June 30, each year. An original and one copy of each report shall be submitted to the General Services Administration, Office of Finance and Administration, Washington, D.C. 20405, not later than October 1.

(NEXT PAGE IS 307)

Subparts 101-3.4—101-3.48
[Reserved]

(NEXT PAGE IS 349)

SUBPART 101-3, 49 FORMS AND REPORTS

101-3, 4901

Subpart 101-3.49—Forms and Reports

§ 101-3.4900 Scope of subpart.

This subpart contains illustrations of forms and instructions for their completion, to be used by executive agencies in connection with the submission of annual reports of real property owned by and leased to the United States.

§ 101-3.4901 GSA forms.

The GSA forms illustrated and instructions for their preparation are included in this subpart to provide a ready source of reference. The subsection numbers in this section correspond to the GSA form numbers and related instructions for their preparation. Thus, in § 101-3.4901-1166 appears GSA Form 1166, and in § 101-3.4901-1166(I) appears instructions for the preparation of GSA Form 1166.

(NEXT PAGE IS 351)

SUBPART 101-3.49 FORMS AND REPORTS

101-3.4901-1166(1)

§ 101-3.4901-1166(I) Instructions for the preparation of GSA Form 1166: Annual Report of Real Property Owned by the United States.

(a) Page 1 of Instructions for the preparation of GSA Form 1166:

(a) General Instructions.

GSA Form 1166, Annual Report of Real Property Owned by the United States (subsection 100-3.4901-1166) shall be used by agencies to report their real property holdings, as defined in Subpart 101-3.2.

Agencies obtaining approval from the Administration may use the "optional method of reporting," in lieu of GSA Form 1166 (section 101-3.205 of Subpart 101-3.2).

Reports shall be prepared annually as of June 30, and an original and one copy of each submitted to the Administration not later than September 1.

For purposes of this inventory, the reporting entity shall be an installation. An installation may consist of land, buildings, other structures and facilities, or any combination thereof. Installations may vary in size and may be a national forest, national park, hydro-electric project; or, on the other hand, may be a single office or warehouse building, or an unimproved site. The determination as to the real property to be included in an installation shall be made by the reporting agency. However, it shall be in conformance with the agency's real property and accounting records.

In the case of an installation located in more than one State, the portion located in each State shall be treated as a separate installation and made the subject of a separate report.

A complete report covering the entire installation shall be submitted for:

- (1) Each newly acquired or previously omitted real property installation;
- (2) Each transfer of an installation from another Federal agency which is not merged with an existing installation; and

PART 101-3 ANNUAL REAL PROPERTY INVENTORIES

101-3.4901, 1166(1)

- (b) Page 2 of Instructions for the Preparation of GSA Form 1166.
- (3) Each previously reported installation having an increase or decrease of \$1,000 or more, affecting any line item or total cost for the installation; or for a change in acreage, irrespective of cost. A complete report shall also be submitted for changes in the number and/or floor area of buildings and predominant usage category of land, buildings, or other structures and facilities.

In the case of item (3) above, the adjusted report shall be a complete restatement, giving effect to all realty changes involving the installation, such as; acquisitions, dispositions, new construction, and correction of errors or omissions in the previous report.

A report, requiring no entries for Blocks 11 thru 25 on GSA Form 1166, shall be submitted for:

- (1) Disposal of a complete installation;
- (2) Transfer of a complete installation to another Federal agency;
- (3) An installation declared excess or surplus, in whole or in part (the reporting agency, as defined in § 101-3.201 of Subpart 101-3.2, shall continue to retain accountability and report excess and surplus real property pending its transfer to a Federal agency or disposal); and
- (4) Revision of the name of an installation or of the date or method of acquisition of the real property.

An appropriate notation regarding the above transactions or revisions shall be made in Block 26, Remarks.

A report shall not be submitted for a previously reported installation in which no change has occurred.

(b) Specific Instructions.

(1) Date, Agency, and Property Identification.

Block 1. Report as of. Enter the effective date of the report.

Block 2. Agency Control No. For identification purposes, each reporting agency may assign an agency control number to each installation.

SUBPART 101-3.49 FORMS AND REPORTS

101-3.4901, 1166(1)

(c) Page 3 of Instructions for the Preparation of GSA Form 1166.

- Block 3. GSA Control No. The GSA Control Number consists of two parts, separated by a dash. The first part, comprised of four digits, is the agency-bureau code, while the second part, comprised of five digits, is the installation number. These control numbers are assigned by the Administration.

The reporting agency shall fill in the GSA Control Number for previously reported installations. Enter the same control number shown on the latest machine listings of installations furnished to each reporting agency by the Administration. Use all nine digits, e. g., 1413-07984; not 1413-7984. It is essential that this GSA Control Number be filled in by the reporting agency so that the current report can be identified with the corresponding report previously submitted.

When an installation is reported for the first time, this block shall not be filled in by the reporting agency.

- Block 4. Name of Installation. Enter the name assigned to the installation; such as, U. S. Customs House, Fort Bragg, or Rock Island Arsenal. When an installation is located in more than one State, a separate report is required to cover the portion of the installation located in each State.

Abbreviate the name of the property, when necessary, so that it shall not exceed 23 type spaces, including blank spaces between letters or words. For example: "Yellowstone National Park" which has 25 type spaces may be abbreviated "Yellowstone Nat Park."

- Block 5. Reporting Agency. Enter the name of the reporting agency, that is, the department, commission, administration, or authority. For example: Department of Commerce, Atomic Energy Commission, Veterans Administration, or Tennessee Valley Authority.

PART 101-3 ANNUAL REAL PROPERTY INVENTORIES

101-3, 4901, 1166(1)

(d) Page 4 of Instructions for the Preparation of GSA Form 1166.

Block 6. Bureau of Other Major Organization. Enter the name of the reporting bureau or comparable major organizational unit within the reporting agency. For example: National Bureau of Standards.

(2) Location.

Block 7. State or Continent. Enter the name of the State (in U.S.) or continent (outside U.S.) in which the real property is located. When an installation is located in more than one State, a separate report shall be submitted to cover the portion of the installation located in each State.

Block 8. City or Town. Enter the name of the city or town in or near which the installation is located, provided (1) the installation is in one county only; and (2) the designated city or town is in the same county as the location of the installation (block 9). When these circumstances do not apply, enter "No city identification."

Block 9. County or Country. Enter the name(s) of the county, counties, parish, or parishes (in U.S.) or U.S. possession, or foreign country (outside U.S.) in which the real property is located. Separate reports for each county in the same State are not required. If space is insufficient, complete the list of counties under Remarks, Block 26, or on the reverse of the form.

Block 10. Street Address, RFD, Route No., or Other Local Designation. Enter the street address, RFD, route number, or other local designation.

Geog. Code

Block. Geographical Code. Enter the appropriate numerical code for the location of the installation as shown in Blocks 7, 8, and 9 in the following sequence: State or Continent (2 digits), City or Town (4 digits), County or Country (3 digits). (Example: Coral Gables, Dade County, Florida, will be shown as

SUBPART 101-3.49 FORMS AND REPORTS

101-3.4901, 1166(1)

- (e) Page 5 of Instructions for the Preparation of GSA Form 1166.

09-0670-025, and Paris, France, Europe, will be shown as 93-6300-350.)

Codes shall be obtained from the publication, "Geographical Location Codes," issued by the General Services Administration, Office of Assistant Administrator for Finance and Administration. Do not fill in this space if the geographical location code is not known.

When the location of the installation cannot be identified with any city (Block 8), the code under "City" shall be reported as 9999. When the installation is located in more than one county (Block 9), the code under "County" shall be reported as 999.

- (3) Land. Report all land areas or sites owned by the Government as of the inventory date. In the case of an installation comprised of both Government-owned and trust lands, separate reports on GSA Form 1166 shall be prepared for each.

Do not include the following: (a) land acquired through foreclosure, confiscation, or seizure to be liquidated in settlement of a claim or debt to the Federal Government; (b) rights-of-way and easements granted to the United States Government; (c) lands administered by the United States under trusteeship by authority of the United Nations; and (d) land held under permit from another Government agency.

Block 11. Usage Code and Classification. Enter in this block the present predominant use and related code (see below) of the land area or site being reported. Sites acquired for new projects or on which construction is in process shall be classified for its eventual use. A breakdown of secondary usages is not required. If there are significant secondary usages, mention thereof should be made under Remarks.

PART 101-3 ANNUAL REAL PROPERTY INVENTORIES

101-3, 4901, 1166(1)

(f) Page 6 of Instructions for the Preparation of GSA Form 1166.

Enter one of the following usage codes and classifications in Blocks 11(A) and 11(B), respectively, as appropriate:

<u>Code</u>	<u>Classification</u>
01	<u>Agricultural</u> . Land under cultivation for production of food and fiber.
04	<u>Grazing</u> . Those conservation lands primarily administered for the preservation, protection, management, and development of grass and other forage resources suitable for livestock.
07	<u>Forest and Wildlife</u> . Those conservation lands primarily administered for the preservation, protection, management, and development of timber, wildlife, watershed, and recreational resources.
08	<u>Parks and Historic Sites</u> . Land administered for national parks, historical parks, monuments, military parks, memorial parks, battlefield parks, battlefield sites, historic sites, memorials, cemeteries, parkways, recreation areas, and national capital parks.
10	<u>Office Building Locations</u> . Land on which office buildings are located or are to be constructed.
11	<u>Military</u> (except airfields). Land under the control of Department of Defense (military functions) which cannot be classified elsewhere.
12	<u>Airfields</u> . Land used for military air bases or stations and military or civilian landing fields.
13	<u>Harbor and Port Terminals</u> . Land used for harbor and port facilities.
15	<u>Power Development and Distribution</u> . Land used for power development and distribution projects.

SUBPART 101-3.49 FORMS AND REPORTS

101-3.4901, 1166(1)

(g) Page 7 of Instructions for the Preparation of GSA Form 1166.

<u>Code</u>	<u>Classification</u>
16	<u>Reclamation and Irrigation.</u> Land used for reclamation and irrigation projects.
18	<u>Flood Control and Navigation.</u> Land used for flood control and navigation projects.
19	<u>Vacant.</u> Land not being utilized.
20	<u>Institutional.</u> Land used for institutional purposes such as hospitals, prisons, schools, libraries, chapels, and museums.
30	<u>Housing.</u> Land used primarily for public housing projects, military personnel quarters, and dwellings for other Federal personnel.
40	<u>Storage.</u> Land used primarily for supply depots and other storage areas.
50	<u>Industrial.</u> Land used for industrial plants engaged in the production and manufacture of ammunition, aircraft, ships, vehicles, electronic equipment, chemicals, aluminum, magnesium, etc.
70	<u>Research and Development.</u> Land used directly in basic or applied research in the sciences (including medicine) and in engineering.
80	<u>Other Land.</u> Land which cannot be classified elsewhere.
90	<u>Trust Land.</u> All land held in trust by the reporting agency.

The above usage codes and classifications shall be used exclusively by all agencies for purposes of reporting land on GSA Form 1166.

PART 101-3 ANNUAL REAL PROPERTY INVENTORIES

101-3, 4901, 1166(1)

(h) Page 8 of Instructions for the Preparation of GSA Form 1166.

When the report covers only Government-owned buildings and/or structures and facilities, but the land is (1) leased, (2) held under permit, or (3) jointly held and another agency is reporting such land, so state in this block. Give additional details in Block 26, when necessary. However, no entries shall be made in Blocks 12-16 when land is held under these circumstances.

Block 12. Acquisition Code. Enter the code number for each method of acquisition of land being reported. The codes to be entered in this block are as follows:

<u>Code No.</u>	<u>Method of Acquisition</u>
1.	Public domain (applicable only for installations in the United States).
2.	Purchase, donation, exchange, etc.
3.	Long-term interest (applicable only for installations in the Canal Zone and foreign countries).

Include under Code 1 all public domain lands including those withdrawn from public domain. The term original public domain land embraces all the area title to which was vested in the United States Government by virtue of its sovereignty. Public domain lands are original public domain lands which have never left Federal ownership and also include lands within Federal ownership which were obtained by the Government in exchange for public lands or for timber on such lands. It also includes original public domain lands which have reverted to Federal ownership through the operation of public land laws.

Include under Code 2 any land acquired by purchase, condemnation, donation, exchange, and other methods of acquisition (other than public domain or long-term interest).

SUBPART 101-3.49 FORMS AND REPORTS

101-3.4901, 1166(1)

(1) Page 9 of Instructions for the Preparation of GSA Form 1166.

Include under Code 3 all land in which the United States Government has a long-term interest; such as, that acquired by treaty or long-term lease (e.g., 99 years, in perpetuity) and which the reporting agency, as a matter of policy, considers as the equivalent to ownership by the United States.

Block 13. Date(s) Acquired. Enter the year(s) in which the land was originally acquired by the Federal Government for each method of acquisition set forth in Block 12. For public domain land withdrawals, show the year of the Executive order or the public land order as the year of acquisition. If various portions were acquired in different years, indicate the range of years; e.g., 1910-1921.

Blocks 14. Area - Urban and Rural. For each item in Block 11, and 15. enter the area of the land to the nearest tenth of an acre. If acreage to be reported is a whole number, enter "0" to the right of the decimal point; e.g., 10.0. If acreage to be reported is less than a whole number, enter "0" to the left of the decimal point; e.g., 0.4. If acreage to be reported is less than 0.1 of an acre, enter the letter "N" (negligible).

Urban. Land shall be classified as urban when (1) located in an incorporated place of 2,500 inhabitants or more; (2) in a densely settled unincorporated place of 2,500 inhabitants or more; or (3) in a densely settled urban fringe area around cities of 50,000 inhabitants or more.

Enter in this block the area of urban land, to the nearest tenth of an acre, acquired by each method of acquisition reported in Block 12.

Rural. Classify as rural all properties not classified as urban. Enter in this block the area of rural land, to the nearest tenth of an acre, for each method of acquisition reported in Block 12.

PART 101-3 ANNUAL REAL PROPERTY INVENTORIES

101.3, 4901, 1166(1)

(j) Page 10 of Instructions for the Preparation of GSA Form 1166.

Block 16. Cost. Enter the cost of land to the Federal Government, rounded to the nearest thousand dollars, for each entry in Block 11. For example: if the records indicate a cost of \$500, report as "1"; similarly, enter "1" for cost of \$1,400. If cost is \$1 through \$499, enter the letter "N" (negligible).

No cost shall be entered in Block 16 for the following types of land: (1) land held in trust; (2) unreserved public domain; (3) public domain reserved for national forests, national parks, military installations, or other purposes, and (4) land donated for historical sites. Properties in categories (1) through (4) shall be shown as "0" in this block.

Cost need not be reported for acquired lands which are intermingled with public domain lands and which constitute a relatively minor portion thereof.

The cost of sites for monuments, memorials, and statutes shall be reported (except for sites of the types described in the two preceding paragraphs).

The cost of items incidental to the acquisition or preparation of land for use should generally be included in the cost of the land. Cost may include:

Appraisal	Plats and surveys
Clearing	Removal and relocation of the property of others
Damage to property of others	as part of purchase contract
Drainage	Removal of structures or facilities purchased, but not used
Grading	
Landscaping	Legal fees and expenses

The above land improvements when applied to public domain in lands shall be reported as costs under Other Structures and Facilities, Code 80, All Other,

SUBPART 101-3.49 FORMS AND REPORTS

101-3.4901, 1166(1)

- (k) Page 11 of Instructions for the Preparation of GSA Form 1166.

Blocks 23 and 24, and identified as such in Remarks, Block 26; rather than as costs under Land.

When records for acquisition costs are not available, report estimated costs and enter the letter "E" after the amount. Such estimates shall be based on costs at date of original acquisition by the Government, adjusted for subsequent capital changes.

Estimate, if not known, the "cost" of property acquired through donation, devise, forfeiture, or judicial process. The estimated "cost" should represent the amount the Government would have had to pay for the land if purchased at the date of original acquisition.

- (4) Buildings. Report all federally owned buildings completed and available for service as of the inventory date.

A temporary building (not demountable) on a concrete foundation shall be reported as real property. However, temporary buildings set up for purposes related to construction shall not be reported.

In the case of an installation comprised of both Government-owned and trust buildings, a separate report on GSA Form 1166 shall be prepared for each category. With regard to buildings held in trust by the reporting agency, Blocks 20, 21, and 22 shall not be completed.

For purposes of this inventory, include buildings being acquired under the Public Buildings Purchase Contract Program or Lease-Purchase Agreements, Public Law 519, 83rd Congress, as amended. Buildings shall be reported upon completion of construction.

- Block 17. Usage Code and Classification. The present predominant use of a building shall govern its classification. The various usage categories are preprinted in this block. The coverage of each of these categories follows:

<u>Code</u>	<u>Classification</u>
10	<u>Office</u> . Buildings used primarily for office space.
21	<u>Hospital</u> . Buildings used primarily for furnishing in-patient diagnosis and treatment under the supervision of physicians

PART 101-3 ANNUAL REAL PROPERTY INVENTORIES

101-3, 4901, 1166(1)

(1) Page 12 of Instructions for the Preparation of GSA Form 1166.

<u>Code</u>	<u>Classification</u>
	and which have 24-hour-a-day registered graduate nursing services. Include medical laboratories used in routine testing. Exclude buildings used directly in basic or applied research in medicine which should be reported as Research and Development.
22	<u>Prison.</u> Buildings under the jurisdiction of the Department of Justice used for the confinement of Federal prisoners.
23	<u>School.</u> Buildings used primarily for formally organized instruction; such as, schools for dependent children of Federal employees, Indian schools, and military training buildings.
29	<u>Other Institutional Uses.</u> Buildings used for institutional purposes other than schools, hospitals, and prisons. Include libraries, chapels, museums, out-patient clinics, etc.
30	<u>Housing.</u> Buildings used primarily for dwelling purposes; such as, apartment houses, single or row houses, and barracks. Includes public housing, housing for military personnel, housing for personnel in various Federal agencies, and housing for institutional personnel.
40	<u>Storage.</u> Buildings used for storage purposes; such as, warehouses, ammunition storage, and cover sheds. Also include in this category, garages used primarily for storage of vehicles or materials. Do not include such facilities as water reservoirs and oil storage tanks, which are to be reported as Other Structures and Facilities, Blocks 23 and 24.
50	<u>Industrial.</u> Buildings specifically designed and used primarily for production or manufacturing. Include buildings used for the

SUBPART 101-3.49 FORMS AND REPORTS

101-3.4901, 1166(1)

(m) Page 13 of Instructions for the Preparation of GSA Form 1166.

<u>Code</u>	<u>Classification</u>
	production or manufacture of ammunition, aircraft, ships, vehicles, electronic equipment, chemicals, aluminum, and magnesium. Also include laboratories used for routine testing of industrial products.
60	<u>Service.</u> Buildings used in connection with service activities; such as, maintenance and repair shops, laundry and dry cleaning plants, post exchanges, stores, and airport hangars. Also include garages used primarily for vehicle maintenance and repair.
70	<u>Research and Development.</u> Buildings used directly in basic or applied research in the sciences (including medicine) and in engineering. Include buildings used in the design, development, and testing of prototypes and processes such as chemistry, physics, and medical laboratories and observatories for meteorological research. Do not include medical or industrial laboratories used in routine testing which should be reported as Hospital and Industrial, respectively.
80	<u>All Other.</u> Buildings which cannot be classified elsewhere. Whenever this classification is utilized, give a brief description of use in Remarks block.
99	<u>Trust Buildings.</u> All buildings held in trust by the reporting agency. Whenever this classification is utilized, give a brief description of use in Remarks block.

Block 18. Number of Buildings. Enter the number of buildings for each applicable usage classification printed in Block 17.

PART 101-3 ANNUAL REAL PROPERTY INVENTORIES

101-3.4901.1166(1)

(n) Page 14 of Instructions for the Preparation of GSA Form 1166.

Block 19. Date(s) Acquired. Enter the year the building was originally acquired by the Federal Government. When several buildings of the same classification were acquired in different years and are being reported as a single line item, enter the range of years; e.g., 1930-1942. When a building, previously reported has undergone a major expansion (e.g., addition of a new wing), both the year of original acquisition and the year of expansion should be included in the range of years.

Block 20. Gross Floor Area - Total Square Feet. Enter the total gross floor area (applies to outer dimensions of the building) in square feet for each class of building reported. Include the total floor area of the building(s) regardless of any secondary usages or occupancy by another agency. Floor area for buildings held in trust shall not be reported.

Block 21. Gross Floor Area - Percent Occupied. Enter the estimated percentage of occupancy or use by the Federal Government for each applicable class of building printed in Block 17. However, percent occupied shall not be reported for buildings held in trust by the reporting agency.

For buildings which are outleased 100 percent, enter the letters "OL" in this column. When only a portion of a building is outleased, the percent occupied shall be the percentage used by the Federal Government. A brief statement regarding the outlease shall be included in the Remarks block.

Block 22. Cost. Enter in this block the total cost to the Federal Government for each classification of building reported. Cost of \$500 and over should be rounded to the nearest thousand dollars as described for Block 16. If cost is \$1 through \$499, enter the letter "N" (negligible).

For purposes of reporting federally owned real property, the cost of each building shall include the cost of such fixtures and equipment as are

SUBPART 101-3.49 FORMS AND REPORTS

101-3.4901, 1166(1)

(o) Page 15 of Instructions for the Preparation of GSA Form 1166.

normally required for its functional use. For example, include plumbing, heating and lighting fixtures, elevators, air-conditioning systems, as well as safes and vaults which are built into the building or are permanently affixed thereto, the removal of which would materially damage the structure. However, the cost of machinery and processing equipment, as well as furniture, laboratory equipment, and special use items which are not part of the realty, shall not be included.

The cost of buildings shall include the cost of all capital improvements incurred subsequent to date of original acquisition by the Government. Capital improvements, as prescribed in the GAO Policy and Procedures Manual, Section 7030, Par. 30, are defined as: "Betterments or improvements to realty are capitalized when they: (1) constitute an enlargement of a structure, (2) provide additional or enlarged facilities, or (3) constitute a major renovation or other substantial improvement which materially increases the usefulness, productivity, or other value of real property, or substantially extends the useful life of the real property."

Costs of federally owned buildings located on land not owned by the Government (e.g., land under lease or other right of occupancy) shall be reported. However, the cost of buildings held in trust by the reporting agency shall be excluded.

In the absence of any recorded data as to costs, they shall be estimated and noted by the letter "E" after the amount. Estimates shall be based on costs at date of original acquisition by the Government, adjusted for subsequent capital changes.

Estimate, if not known, the "cost" of the buildings acquired through donation, exchange, devise, forfeiture, or judicial process. The estimated "cost" should represent the amount the Government would have had to pay for the buildings if purchased at the date of original acquisition.

PART 101-3 ANNUAL REAL PROPERTY INVENTORIES

101-3, 4901, 1166(1)

(p) Page 16 of Instructions for the Preparation of GSA Form 1166.

The cost of buildings being acquired under the Public Buildings Purchase Contract Program or Lease-Purchase Agreements, Public Law 519, 83rd Congress, as amended, shall be recorded at purchase price (total amount of principal payments), plus all other capitalized costs, such as: drawings and specifications; architectural, engineering and inspection fees; and miscellaneous project costs. For identification purposes, the letter "P" should be inserted after the amount and a brief explanation given in Block 26, Remarks.

- (5) Other Structures and Facilities. Include only structures and facilities completed and available for service as of the reporting date.

In the case of an installation comprised of both Government-owned and trust structures and facilities, a separate report on GSA Form 1166 shall be prepared for each category.

Block 23. Usage Code and Classification. The various usage categories are preprinted in this block. The coverage of each of these usage categories follows:

<u>Code</u>	<u>Classification</u>
12	<u>Airfield Pavements.</u> Include runways, helicopter landing pads, taxiways, and aprons.
13	<u>Harbor and Port Facilities.</u> Include docks, piers, jetties, and breakwaters.
15	<u>Power Development and Distribution.</u> Include hydroelectric and other power development projects which produce power for resale (generally consisting of dams and powerhouses). Transmission lines which are an integral part of Federal power development systems shall also be included even though the power is produced by another Federal agency.

<u>Code</u>	<u>Classification</u>
	building which is reported separately, the cost of such utility systems shall be included in the cost of the building.
	The usage category for "utility systems" includes heating plants and related steam and gas lines; sewage disposal plants, storm and sanitary sewer lines; water treatment plants, wells, pump houses, reservoirs, and pipelines; and electrical substations, standby or auxiliary power plants, lighting structures, and conduits.
	Structures and facilities utilized by an installation in the production of its own power requirements (not for resale) shall be included in this category.
72	<u>Communications Systems.</u> Include telephone and telegraph lines and radio towers.
73	<u>Navigation and Traffic Aids.</u> Include structures, other than buildings, which provide for aircraft and ship navigation and traffic aids; such as, beacon lights, antenna systems, ground control approach systems, and obstruction lighting.
76	<u>Roads and Bridges.</u> Include federally owned highways, roads, related culverts, and connecting bridges. Also include roads within national parks and forests and other Federal installations.
77	<u>Railroads.</u> Include tracks and bridges, tunnels, and fuel and water stations servicing railroads.
78	<u>Monuments and Memorials.</u> Include all Federal monuments, memorials, and statues.

SUBPART 101-3.49 FORMS AND REPORTS

101-3.4901, 1166(1)

(s) Page 19 of Instructions for the Preparation of GSA Form 1166.

<u>Code</u>	<u>Classification</u>
79	<u>Miscellaneous Military Facilities.</u> Include all structures and facilities of the Department of Defense (military functions) not included in any other classification.
80	<u>All Other.</u> Include sidewalks, parking areas, fences, and trails, which cannot be readily classified under the above categories. Include also, improvements to public domain lands; such as, drainage, grading, and landscaping.
99	<u>Trust.</u> All structures and facilities held in trust by the reporting agency. Identify in Remarks, Block 26.

Block 24. Cost. Enter in this block the total cost to the United States for each classification of other structures and facilities reported. Cost of \$500 and over should be rounded to the nearest thousand dollars as described for Block 16. If cost is \$1 through \$499, enter the letter "N" (negligible).

Costs shall include any capital improvements (as defined under Block 22) incurred subsequent to the date of acquisition.

The cost of Government-owned structures and facilities located on land not owned by the Government (e.g., leased land) shall be included.

Costs shall not be reported for (1) other structures and facilities held in trust and (2) historic structures, monuments, memorials, and statues donated to the Federal Government.

In the absence of any recorded data, costs shall be estimated and noted by the letter "E" after the amount. Estimates shall be based on costs at date of original acquisition by the Government, adjusted for subsequent capital changes.

PART 101-3 ANNUAL REAL PROPERTY INVENTORIES

101-3, 4901, 1166(1)

Estimate, if not known, the "cost" of structures and facilities acquired through donation, exchange, devise, forfeiture, or judicial process. The estimated "cost" should represent the amount the Government would have had to pay for the structures or facilities if purchased at the date of original acquisition.

Block 25. Total Cost: Land, Buildings, and Other Structures and Facilities. Enter the sum of the totals of Blocks 16, 22, and 24.

(6) Remarks.

Block 26. Remarks. Enter in this block any notation necessary to clarify or expand any entry in the report. Reasons for changes in a report for an installation previously reported should be especially noted; e.g., capital improvement, writeoffs, refinement of data, etc.

Other pertinent notations may include: from whom property was acquired, to whom property was sold (public, State, city, etc.), any unusual or significant feature regarding acquisition, omission, transfer, disposal, or revision.

When an installation is considered excess to the needs of the reporting agency, in whole or in part, a notation to this effect should be entered. Include the GSA Control Number assigned to SF 118, Report of Excess Real Property, where applicable (see subpart 101-3.2).

If space provided in this block is insufficient, continue on reverse of the form.

(7) Type of Transaction.

Block 27. Type of Transaction. Check the appropriate box to reflect the nature of the real property change between the current and the prior inventory report.

(u) Page 21 of Instructions for the Preparation of GSA Form 1166.

When practicable, include in Remarks a short notation giving an explanation of the change. Descriptions of the various types of transactions follow:

<u>Code</u>	<u>Descriptions</u>
1	<u>New Acquisition.</u> Include newly acquired installations obtained by purchase, construction, or other means. Do not include transfers from other Federal agencies or additions to installations previously reported.
2	<u>Omission.</u> Include only complete installations erroneously omitted from the inventory for the prior fiscal year.
3	<u>Transfer-In.</u> Include only installations transferred from other Federal agencies or major organizational units within the agency which are not merged with existing installations. (Transfers-in which become part of an existing installation shall be coded 6.)
4	<u>Disposal.</u> Include only complete installations disposed of by the Federal Government through sale, donation, exchange, or other disposition to private citizens and organizations or to State and local governments. Do not include transfers to other Federal agencies or major organizational units within the agency.
5	<u>Transfer-Out.</u> Include only complete installations transferred to other Federal agencies or major organizational units within the agency.
6	<u>Revision.</u> Include all changes not covered by one of the above codes. These changes include additions to installations previously reported, disposition of a part of an installation previously reported, capital improvements, writeoffs, and corrections to prior years reports.

SUBPART 101-3.49 FORMS AND REPORTS

101-3.4901-1166A(1)

§ 101-3.4901-1166A(I) Instructions for the preparation of GSA Form 1166A: Annual Report of Real Property Leased to the United States.

(a) Page 1 of Instructions for preparation of GSA Form 1166A.

(a) General Instructions.

GSA Form 1166A, Annual Report of Real Property Leased to the United States (subsection 101-3.4901-1166A), shall be used by agencies to report their leased real property holdings, as defined in Subpart 101-3.3 of this part.

Reports shall be prepared annually as of June 30, and an original and one copy of each submitted to General Services Administration not later than October 1.

An individual report shall be submitted for a lease or combination of leases covering: (1) land, (2) buildings or portions thereof, (3) other structures and facilities, or (4) combinations thereof. Real property leased to the United States shall be reported as follows:

- (1) Single Leases - Single Reports. Each lease executed for a building location(s), other structures and facilities, or combination thereof (whether or not land is included), with a total annual rental of \$2,000 or more, shall be the subject of a single report. Each lease executed for land only, with an annual rental of \$500 or more, shall be the subject of a single report.
- (2) Multiple Leases - Single Reports. At the discretion of the agency, a lease executed for a building location(s), other structures and facilities, or combinations thereof (whether or not land is included), with a total annual rental of less than \$2,000, may be combined with similar leases to form a single report, provided the location(s) of the properties is in the following geographical areas:
 - (i) The same major city (in the United States only--limited to cities listed in subsection 101-3.4901-1166A(I-A);
 - (ii) The same State (excluding leases for properties in major cities); and
 - (iii) The same U. S. possession or foreign country.

PART 101-3 ANNUAL REAL PROPERTY INVENTORIES

101-3.4901-1166A(1)

(b) Page 2 of Instructions for preparation of GSA Form 1166A.

A lease executed for land only, with an annual rental of less than \$500, may be combined with similar leases to form a single report, provided it meets the location restrictions outlined in b. (1), (2), and (3), above.

When leases have been combined to form a single report, supporting detailed information for each lease shall be available in the files of the reporting agency.

In no case shall one report cover real property in more than one State. When a lease covers property in more than one State, a separate report shall be prepared for the property in each State.

(b) Specific Instructions.(1) Date, Agency, and Property Identification.

Block 1. Report As Of. Enter effective date of the report.

Block 2. Agency Control No. For purpose of identification, each agency may assign a control number for each report submitted.

Block 3. GSA Control No. Leave this space blank. For use by General Services Administration, Central Office only.

Block 4. Name of Property. Enter the commonly used name for the property being reported; such as, U. S. Post Office, American Embassy, or Wilkins Building. When a property has no name, use the street address or other local designation. For consolidated reports covering more than one lease, enter the word "Consolidation" in this block.

Abbreviate the name of the property, when necessary, so that it will not exceed 23 type spaces including blank spaces between letters or words. For example: "First National Bank Building" which has 28 type spaces may be abbreviated "First Nat Bank Bldg."

SUBPART 101-3.49 FORMS AND REPORTS

101-3.4901-1166A(1)

(c) Page 2 of Instructions for preparation of GSA Form 1166A.

Block 5. Reporting Agency. Enter the name of the agency currently administering the lease and making rental payments to the lessor, regardless of which agency made the original lease or is currently using the property. For example: Department of Tennessee Valley Authority.

Block 6. Bureau or Other Major Organization. Enter the name of the reporting bureau or comparable major organizational unit within the reporting agency; for example, National Bureau of Standards.

(2) Location.

Block 7. State or Continent. Enter the name of the State (in U. S.) or continent (outside U. S.) in which the real property is located. When an installation is located in more than one State, a separate report shall be submitted to cover the portion of the installation located in each State.

Block 8. City or Town. Enter the name of the city or town in or near which the real property is located, provided (1) the property is in one county only; and (2) the designated city or town is in the same county as the location of the property (Block 9). When these circumstances do not apply, enter "No city identification."

Block 9. County or Country. Enter the name(s) of the county, counties, parish, or parishes (in U. S.) or U. S. possession, or foreign country (outside U. S.) in which the real property is located. Separate reports for each county in the same State are not required. If space is insufficient, complete the list of counties under Remarks, Block 24, or on the reverse of the form.

Block 10. Street Address, RFD, Route No., or Other Local Designation. Enter the street address, RFD, route no., or other local designation. When the street address is the same as the building name, this block may be left blank.

PART 101-3 ANNUAL REAL PROPERTY INVENTORIES

101-3,4901-1166A(1)

(d) Page 3 of Instructions for preparation of GSA Form 1166A.

Geog. Code Geographical Code. Enter the appropriate
Block numerical geographical code for the location
 of the property as shown in Blocks 7, 8, and
 9 in the following sequence: State or Continent
 (2 digits), City or Town (4 digits), County or
 Country (3 digits). (Example: Coral Gables,
 Dade County, Florida, will be shown as
 09-0670-025.)

Codes may be obtained from the publication
"Geographical Location Codes," issued by
General Services Administration.

Do not fill in this space if the geographical
location code is not known.

When the location of the property or properties
cannot be identified with a city (Block 8), the
code under "City" shall be reported as 9999.
When the property or properties are located in
more than one county (Block 9), the code under
"County" shall be reported as 999.

- (3) Land. Land shall be reported only when specifically provided
for in the lease. Leases may include unimproved lands as well
as lands upon which federally owned buildings or other improve-
ments have been constructed. (The Federal agency controlling
these buildings or other structures shall report them on GSA
Form 1166.)

Easements, rights-of-way, and encroachments shall not be
reported.

Block 11. Usage Code and Classification. Enter the
 predominant use and related code of land area
 or site as of the effective date of the report.
 A breakdown of secondary usages is not re-
 quired.

Leased land shall be classified on the same
basis as federally owned land except for Post
Offices. Land leased in conjunction with a
Post Office and used predominantly as a general
service and access area, shall be reported as

SUBPART 101-3, 49 FORMS AND REPORTS

101-3, 4901-1166A(1)

(e) Page 4 of Instructions for preparation of GSA Form 1166A.

Code 14 - Post Office Land. Applicable definitions of all usage categories, other than Post Office Land, are contained in subsection 100-3, 4901-1166(I).

Blocks 12 and 13. Area - Urban and Rural. For each entry in Block 11, enter the area of the land to the nearest tenth of an acre. If acreage to be reported is a whole number, enter "0" to the right of the decimal point; e.g., 10.0. If acreage to be reported is less than a whole number, enter "0" to the left of the decimal point; e.g., 0.4. If acreage to be reported is less than 0.1 of an acre, enter the letter "N" (negligible).

Block 12. Urban. For purposes of this report, land shall be classified as urban when (1) located in an incorporated place of 2,500 inhabitants or more, (2) in a densely settled unincorporated place of 2,500 inhabitants or more, or (3) in a densely settled urban fringe area around cities of 50,000 inhabitants or more. Enter in this block the total acreage of urban land acquired for each usage category reported in Block 11.

Block 13. Rural. Classify as rural all properties not covered under "urban" as defined above. Enter in this block the total acreage of rural land for each usage category reported in Block 11.

(4) Buildings.

Block 14. Usage Code and Classification. For purposes of this report, the predominant use of the space in each leased building location, as of the effective date of the report, shall govern its classification.

Leased buildings shall be classified on the same basis as federally owned buildings, except for Post Offices. Buildings or portions of buildings leased for use as Post Offices should be reported as Code 14 - Post Office. Applicable definitions of all usage categories, other than Post Offices, are contained in subsection 100-3, 4901-1166(I).

PART 101-3 ANNUAL REAL PROPERTY INVENTORIES

101-3.4901-1166A(1)

(f) Page 5 of Instructions for preparation of GSA Form 1166A.

Block 15. Number of Locations. Enter the number of building locations for each applicable usage classification printed in Block 14. A lease location is the space in each building covered by a lease. When a lease covers several buildings, space in each is considered a location. When several leases cover one building, the space covered by each lease is considered a leased building location.

Block 16. Floor Area Leased - Total Square Feet. Enter the square feet of floor area under lease for each class of building reported. Include the total floor area under lease, regardless of any secondary usages or areas used by other occupying agencies under permit or other arrangements.

(5) Other Structures and Facilities.

Block 17. Place a check mark in the space provided in Block 17 if the lease provides for the rental of any structures or facilities.

Block 18. Enter the usage classification and a brief description of leased structures or other facilities. The usage classification applicable to the federally owned real property, as defined in subsection 100-3.4901-1166(I), shall also be used exclusively for reporting leased structures and facilities in this block.

(6) Lease Terms. When the report covers a single lease, entries shall be made in Blocks 19 through 23.

When a consolidated report is made covering leases within the same installation, State, country, or city, entries shall be made only in Blocks 19 and 23.

Block 19. Number of Leases Reported. Enter the number of leases included in this report.

Block 20. Effective Date. Enter the numerical designation, using six digits, for the month and year that the current lease became effective; e. g., 06-1958 for June 1958.

SUBPART 101-3.49 FORMS AND REPORTS

101-3.4901-1166A(1)

(g) Page 6 of Instructions for preparation of GSA Form 1166A.

- Block 21. Expiration Date. Enter the numerical designation using six digits for the month and year that the current lease will terminate; e. g., 12-1965 for December 1965. If any option has been exercised, the expiration date of the extended period shall be used. In no case shall this date be prior to the effective date of the report. When the expiration date of the lease is indefinite, such as in a month to month or year to year lease, enter 99-9999.
- Block 22. Period of Renewal Option. When the agreement provides that the U. S. Government may renew the lease beyond the expiration date of the current lease, enter the remaining renewal period to the nearest whole year using two digits; e. g., (3 years) 03. Enter an "X" in this block if one of the following conditions exists: (1) the lease contains no renewal provisions; (2) the renewal option is for less than six months; (3) the expiration date of the lease is indefinite.
- Block 23. Annual Rental Rate. Enter the annual rental rate for the leased property to the nearest whole dollar. When the rental period is less than one year or the rental is paid on a monthly, daily, or other than an annual basis, convert the rate to an annual basis. If the rental is nominal or free, but the lease provides for payments to the lessor for utilities and/or services, enter the annual rental rate as specified in the lease. The other amounts paid to the lessor shall not be included in the rental figure. If the agency wishes to report such payments, they shall be entered in the Remarks block.

(7) Remarks.

- Block 24. Remarks. When it is necessary to clarify or expand any entries beyond the space provided in the various blocks, make such notations in this block and continue, as necessary, on the reverse of the form.

PART 101-3 ANNUAL REAL PROPERTY INVENTORIES

101-3,4901-1166A(1)

(h) Page 7 of Instructions for preparation of GSA Form 1166A.

(8) Signature and Date.

Block 25. Prepared By. Type in the name and title of the official responsible for the preparation of the report.

Block 26. Signature. The official designated in Block 25 shall sign his name in this block

Block 27. Date. Enter the date on which the report was prepared.

SUBPART 101-3.49 FORMS AND REPORTS

101-3.4901-1209(1)

**§ 101-3.4901-1209(1) Instructions for the preparation of GSA Form 1209:
Summary of Number of Installations Owned by the United States.**

(a) Page 1 of Instructions for the preparation of GSA Form 1209.

(a) General Instructions.

GSA Form 1209, Summary of Number of Installations Owned by the United States (subsection 10103.4900-1209), shall be used by reporting agencies to summarize the real property holdings, as defined in Subpart 101-3.2 of this part, of each bureau or other organizational unit.

This form shall be submitted even though no inventory changes have occurred since the previous submission. GSA Form 1209 shall be submitted whether inventory reporting is by GSA Form 1166 (subsection 101-3.204 of Subpart 101-3.2) or by detailed machine listings and supporting punch cards (see section 101-3.205 of Subpart 101-3.2).

A separate GSA Form 1209 shall be prepared for each bureau or other comparable organizational unit for (a) properties in the United States, and (b) properties outside the United States. An original and one carbon copy of these forms shall be submitted together with either the related GSA Forms 1166 or related detailed machine listings and supporting punch cards. Reports shall be prepared annually as of June 30, and submitted to General Services Administration not later than September 1.

(b) Specific Instructions.

- (1) Summary Identification. Enter the effective date of the report. Place a check mark in the appropriate box to indicate whether the accompanying GSA Forms 1166 or detailed machine listings cover properties in the United States or outside the United States.
- (2) Reporting Agency. Enter in this block the name of the reporting agency, that is, the department, commission, administration, or authority. For example: Department of Commerce, Atomic Energy Commission, Veterans Administration, or Tennessee Valley Authority.

PART 101-3 ANNUAL REAL PROPERTY INVENTORIES

101-3, 4901-1209(1)

(b) Page 2 of Instructions for the preparation of GSA Form 1209.

- (3) Bureau or Other Major Organizational Unit. Enter on this line the name of the bureau or other comparable major organizational unit within the reporting agency. For example: National Bureau of Standards or Bureau of Land Management.

(4) Items.

- Item A. Installations at End of Prior Year. Enter the number of installations previously reported as of the end of the prior fiscal year. This number must agree with that shown in the detailed electrical accounting machine listings of the previous inventory reports, copies of which have been furnished by General Services Administration to each reporting agency.
- Item B. New Installations Acquired Since Prior Report. Enter (in both columns) the number of installations acquired since the prior report. Do not include omissions (Item C) or transfers from other Federal agencies or transfers from other Federal agencies or major organizational units of the same agency (Item D).
- Item C. Complete Installations Omitted from Prior Reports. Enter (in both columns) the number of complete installations erroneously omitted from the inventory in the prior fiscal year.
- Item D. Installations Transferred from Other Federal Agencies. Enter (in both columns) the number of reports representing transfers of either complete or partial installations from other Federal agencies, or major organizational units of the same agency. Transfers-in which become a part of an existing installation shall be reported in Item G.
- Item E. Complete Installations Disposed of Since Prior Report. Enter (in both columns) the number of complete installations disposed of by the Federal Government since the prior report. Transfers to other Federal agencies or major organizational units of the same agency shall be reported separately in Item F.

SUBPART 101-3.49 FORMS AND REPORTS

101-3.4901-1209(1)

(c) Page 3 of Instructions for the preparation of GSA Form 1209.

Item F. Complete Installations Transferred to Other Federal Agencies. Enter (in both columns) the number of reports representing the transfer of complete installations to other Federal agencies or major organizational units of the same agency.

Item G. Reports Adjusting Those Submitted in Prior Years. Enter the number of reports affecting installations previously reported and still in the inventory for which changes have occurred during the fiscal year. Include all revised reports not specifically provided for in Items B through F, above.

Item H. Installations at End of Current Year. Enter the sum of Items A, B, C, and D less the sum of Items E and F. This figure represents the total number of installations controlled by the reporting agency as of the inventory date.

Item I. Total Number of GSA Forms 1166 Submitted. Enter the sum of Items B, C, D, E, F, and G. This figure represents the total number of GSA Forms 1166 currently being submitted.

- (5) Remarks. Enter a brief summary statement of all major or significant changes in the bureau's or agency's real property inventory during the fiscal year. Summary may include changes in acreage, buildings, floor area, costs, predominant usages of land, buildings, and other structures and facilities. Cite examples of changes and identify by GSA control numbers.

Include significant trends, new or continuing programs or policies or any other pertinent information reflecting the bureau's or agency's real property activities for the fiscal year.

- (6) Signature and Date.

Prepared By. Type in the name and title of the official responsible for the preparation of the report.

SUBPART 101-3.49 FORMS AND REPORTS

101-3.4901-1209A(1)

§ 101-3.4901-1209A(I) Instructions for the preparation of GSA Form 1209A:
Comparative Summary of Properties Leased to the United States.

(a) Page 1 of Instructions for the preparation of GSA Form 1209A.

(a) General Instructions.

GSA Form 1209A, Comparative Summary of Properties Leased to the United States (subsection 101-3.4901-1209A), shall be used by reporting agencies to summarize leased real property holdings, as defined in Subpart 101-3.3 of this part, of each bureau or other organizational unit.

GSA Form 1209A is intended to provide (a) a control over individual inventory reports on leased properties submitted on GSA Form 1166A for the current year, and (b) a comparison between data reported for the prior and current years to show changes in lease data between inventory reports.

A separate GSA Form 1209A shall be prepared for each bureau or other comparable organizational unit for (a) properties in the United States, and (b) properties outside the United States. An original and one carbon copy of this form, together with the related GSA Forms 1166A, shall be prepared annually as of June 30, and submitted to General Services Administration by October 1.

(b) Specific Instructions.

- (1) Summary Identification. Enter the current and prior year dates for which data are being reported.

Check the applicable block in the upper right corner of the form to indicate if the summary is for real property located (a) in the United States, or (b) outside the United States.

- (2) Agency and Bureau Identification.

Reporting Agency. Enter in this block the name of the reporting agency, that is, the controlling department, commission, administration, or authority. For example: Department of Commerce, Atomic Energy Commission, Veterans Administration, or Tennessee Valley Authority.

PART 101-3 ANNUAL REAL PROPERTY INVENTORIES

101-3, 4901-1209A(1)

(b) Page 2 of Instructions for the preparation of GSA Form 1209A.

Bureau or Other Major Organization. Enter in this block the name of the bureau, or comparable major organizational unit, within the reporting agency: for example, National Bureau of Standards.

(3) Summary Data.

Column (c) Current GSA Forms 1166A. This column shall contain a summarization and consolidation of statistics included in the Annual Reports of Real Property Leased to the United States, GSA Forms No. 1166A, submitted for the current inventory. Data for each line of this column shall be entered as described below:

- Line 1. Enter the total number of GSA Forms 1166A submitted in the current report.
- Line 2. Enter the total number of leases in effect on the inventory date by adding the entries in Block 19 of all GSA Forms 1166A submitted.
- Line 3. Enter the total acreage leased by adding the totals of Blocks 12 and 13 of all GSA Forms 1166A submitted.
- Line 4. Enter the total number of building locations leased by adding the totals of Block 15 on all GSA Forms 1166A submitted.
- Line 5. Enter the total square feet of floor area leased by adding the totals of Block 16 of all GSA Forms 1166A submitted.
- Line 6. Enter the total annual rental reported for leased real property by adding the entries in Block 23 of all GSA Forms 1166A submitted.

Column (d) Prior GSA Forms 1166A. This column shall not be completed for the first year an agency submits its report. Data for completion of this column shall be obtained from the previous year's detailed listing of leases furnished to each agency by the General Services Administration.

SUBPART 101-3.49 FORMS AND REPORTS

101-3.4901-1209A(1)

- (c) Page 3 of Instructions for the preparation of GSA Form 1209A.

Column (e) Difference. Enter on each line the result of column (c) minus column (d). Enter negative quantities in parentheses, e.g., (312). Column (e) shall not be completed for the initial report submitted by an agency.

- (4) Remarks. Significant changes in leases between the prior and current report shall be explained or commented on in this block. When as a result of a new program or termination of an old program, an agency's leasing activity changes, the cause thereof shall be noted. Property management activities of a bureau or other major organization which result in net economies to the Government shall be explained. Program plans which will affect future leasing operations shall also be noted. All items which the bureau believes would interest the Congress, regulatory executive agencies, or the general public shall be described in this block.

- (5) Signature and Date.

Prepared By. Type in the name and title of the official responsible for the preparation of the report.

Signature. The official designated as responsible for the preparation of the report shall sign his name in this block.

Date. Enter date on which the report was prepared.
